Oil pulses through our daily lives. It is the plastic we touch, the food we eat, and the way we move. Oil politics in the twentieth century was about the management of abundance, state power and market growth. The legacy of this age of plenty includes declining conventional oil reserves, volatile prices, climate change, and enduring poverty in many oil rich countries. The oil sector is now in need of reform. Yet no one seems at the helm, leaving a vital source of energy at the whim of dictators, speculators and corporate operators, and our societies locked into unsustainable growth models. In this in-depth primer to the world's wealthiest industry, authors Gavin Bridge and Philippe Le Billon take a fresh look at the contemporary geopolitics of oil. Going beyond simple assertions of peak oil and an oil curse, they point to an industry reordered by internationalized state oil companies, Asian consumerism shifting demand, the insecurities and violent assertiveness of declining powers, and the dilemmas of post-oil energy transition. As a new geopolitics of oil emerges, the need for effective global oil governance becomes imperative. Praising the growing influence of civil society and attentive to the institutionalization of producer-consumer cooperation, this book identifies challenges and opportunities to curtail price volatility, curb demand and the growth of dirty oil, de-carbonise energy systems, and improve governance in oil producing countries.

Dapper, debonair, and wise, the great enchanter Chrestomanci has nine lives and a strong personality as well as strong magic. That personality reverberates in each of these four dazzling stories. A warlock tries to escape Chrestomanci's justice by fleeing to another world-with hilarious results. Cat Chant and Tonino Montana reluctantly join forces when Chrestomanci sends them on a visit that turns suddenly dangerous. The youngest best-selling dreamer needs Chrestomanci's help when she finds she can't dream anymore. And as the gods of an ever-so-orderly world try to destroy the young Sage of Dissolution, Chrestomanci lends a hand. Like Chrestomanci himself, acclaimed author Diana Wynne Jones has a graceful flair, which sparkles in the remarkable wit, imagination, and intelligence of these fast-paced tales.

It is widely believed that natural mineral resources are desirable. However there is growing evidence that this may not always be the case. Indeed, it seems that natural assets can distort the economy to such a degree that the benefit actually becomes a curse. In *Sustaining Development in Mineral Economies*, Richard Auty highlights these drawbacks and the devastating effect they can have on developing economies. With reference to six ore-exporters (viz. Peru, Bolivia, Chile, Jamaica, Zambia and Papua New Guinea) he outlines how things can go badly wrong. He particularly stresses the need to avoid 'Dutch Disease' whereby competitiveness is drained out of the agriculture and manufacturing sectors so that in the long term growth falters.

*The Handbook of Sustainability Literacy* Penguin

First published in 1996. "Environment" challenges modern knowledge and its institutions: academic disciplines, research groups, journals and presses, syllabuses and texts, professions and data banks, media experts and policy advisors. The language of environment makes no policy proposals, it is not prescriptive. But it is an attempt to think about the cultural context of all proposals and prescriptions, the cultures of authority and expertise in our time. How is knowledge made to count, and how do all the different claims connect, or collide?

'For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians. Standish's careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq, Iran and Afghanistan on a map.' Prof. Dennis Hayes – Oxford Brookes University, UK 'A prescient and critical analysis of the changing face of geography teaching. This book deserves to be widely read and debated. Alex Standish's book puts current trends in geography teaching in historical and critical context. It comprises a forthright and timely defence of geographical education for its own sake.' Dr Jim Butcher, FRSA, Department of Sport Science, Tourism and Leisure, Canterbury Christ Church University. Since the early 1990s, educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools, from a subject which encourages students to explore spatial concepts, ideas and skills, to a more ethics based subject concerned with the promotion of environmentalism, cultural diversity and social justice. In this book the new approach is critically examined, within a historical and ideological context, addressing a number of fundamental questions: Should geography be used as a tool for the delivery of citizenship ideals? How does this affect the intellectual and moral value of geographical education for young people? If the state and teachers are taking more responsibility for the values, attitudes and emotional responses of students, how will they learn to develop these qualities for themselves? If global perspectives shift the focus of education from learning about the outside world to learning about the self, what is its vision of social progress and conception of social change? This book advocates a return to liberal models of education, arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject, and the freedom of young people to shape the world in which they live. A vital resource for teachers and student teachers alike, *Global Perspectives in the Geography Curriculum* makes a significant contribution to the growing debate about the future direction of the discipline itself.

Peeling the Onion John Wiley & Sons

In this extraordinary memoir, Nobel Prize-winning author Günter Grass remembers his early life, from his boyhood in a cramped two-room apartment in Danzig through the late 1950s, when *The Tin Drum* was published. During the Second World War, Grass volunteered for the submarine corps at the age of fifteen but was rejected; two years later, in 1944, he was instead drafted into the *Waffen-SS*. Taken prisoner by American forces as he was recovering from shrapnel wounds, he spent the final weeks of the war in an American POW camp. After the war, Grass resolved to become an artist and moved with his first wife to Paris, where he began to write the novel that would make him famous. Full of the bravado of youth, the rubble of postwar Germany, the thrill of wild love affairs, and the exhilaration of Paris in the early fifties, *Peeling the Onion*--which caused great controversy when it was published in Germany--reveals Grass at his most intimate.

Alfred Hitchcock and the Three Investigators in The Secret of Terror Castle Random House Books for Young Readers

There are good witches and bad witches, but the law says that all witches must be burned at the stake. So when an anonymous note warns, "Someone in this class is a witch," the students in 6B are nervous—especially the boy who's just discovered that he can cast spells and the girl who was

named after the most famous witch of all. Witch Week features the debonair enchanter Chrestomanci, who also appears in *Charmed Life*, *The Magicians of Caprona*, and *The Lives of Christopher Chant*. Someone in the class is a witch. [A Long Way Down](#) Grand Central Publishing

"On Easter Sunday, 1475, the dead body of a two-year-old boy named Simon was found in the cellar of a Jewish family's house in Trent, Italy. Town magistrates arrested all eighteen Jewish men and one Jewish woman living in Trent on the charge of ritual murder - the killing of a Christian child in order to use his blood in Jewish religious rites. Under judicial torture and imprisonment, the men confessed and were condemned to death; their women-folk, who had been kept under house arrest with their children, denounced the men under torture and eventually converted to Christianity. A papal hearing in Rome about possible judicial misconduct in Trent made the trial widely known and led to a wave of anti-Jewish propaganda and other accusations of ritual murder against the Jews." "In this engrossing book, R. Pochia Hsia reconstructs the events of this tragic persecution, drawing principally on the Yeshiva Manuscript, a detailed trial record made by authorities in Trent to justify their execution of the Jews and to bolster the case for the canonization of "little Martyr Simon." Hsia depicts the Jewish victims (whose testimonies contain fragmentary stories of their tragic lives as well as forced confessions of kidnap, torture, and murder), the prosecuting magistrates, the hostile witnesses, and the few Christian neighbors who tried in vain to help the Jews. Setting the trial and its documents in the historical context of medieval blood libel, Hsia vividly portrays how fact and fiction can be blurred, how judicial torture can be couched in icy orderliness and impersonality, and how religious rites can be interpreted as ceremonies of barbarism."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
