This book documents the successful use of information and communication technology (ICT) in rural development. The book begins with an introductory chapter that traces the history of ICT use in rural India, examines some of the problems that have afflicted the implementation of rural development programmes, at the same time showing how ICT applications could help overcome them, assesses the early efforts in ICT use, and proposes a scheme by which to classify ICT applications. Written by administrators who lead projects in their areas, sixteen case studies follow, which spell out the various applications of ICT that have made a difference in the delivery of services or products in rural India. Among the services covered are health care, milk distribution, disaster management, postal services, telephones, and services for the disabled. These applications of ICT cover the

use of simple and inexpensive technologies at one end, and sophisticated satellite-based communication at the other. An important collection that delineates the main elements of a strategy that can be used by governmental agencies to derive maximum developmental impact from investments in ICT

Jessica Martin is not a nice girl. As Prom Queen and Captain of the cheer squad, she'd ruled her school mercilessly, looking down her nose at everyone she deemed unworthy. The most unworthy of them all? The "freak," Manson Reed: her favorite victim. But a lot changes after high school. A freak like him never should have ended up at the same Halloween party as her. He never should have been able to beat her at a game of Drink or Dare. He never should have been able to humiliate her in front of everyone. Losing the game means taking the dare: a dare to serve Manson for the entire night as his slave. It's a dare that Jessica's pride - and curiosity - won't allow her to refuse. What ensues is a dark game of pleasure and pain, fear and desire. Is it only a game? Only revenge? Only a dare? Or is it something more? *The Dare* is an 18+ erotic romance novella and a prequel to the *Losers Duet*. Reader discretion is strongly advised. This book contains graphic sexual scenes, intense scenes of BDSM, and strong language. A full content note can be found in the front matter of the book.

 The Bill provides for the Post Office to be converted from a statutory corporation to a public limited company, with ownership remaining with the Crown. It introduces a new system of licensing and regulation for postal services operators and providers, and gives the independent regulator, the new Postal Services Commission, new powers and duties to protect and promote the interests of users. The Post Office Users' National Council is replaced by the Consumer Council for Postal Services, to bring postal services into line with consumer representation in the other utilities.

Across the nineteenth century European history, philology, archaeology, art, and architecture turned from a common classical vocabulary and ideology to images of pasts and origins drawn primarily from the Middle Ages. The result was a paradox, as scholars and artists, schooled in the same pan-European vocabularies and methodologies nevertheless sought to discover through them unique and, frequently, oppositional national identities. These essays, edited by Patrick J. Geary and Gábor Klaniczay, focus on this all-European phenomenon with a special focus on Scandinavia and East-Central Europe, bearing witness to the inextricable links between cultural and scientific engagement, the search for national identity, and political agendas in the long nineteenth century that made the search for archaic origins an entangled history. Contributors include: Walter Pohl, Ian Wood, Sverre Bagge, Maciej Janowski, Sir David Wilson, Anders Andrén,

Ernő Marosi, Carmen Popescu, Ahmet Ersoy, Michael Werner, Joep Leerssen, R. Howard Bloch, Pavlína Rychterová, Tommaso di Carpegna Falconieri, Stefan Detchev, Florin Curta, and Péter Langó.

This book addresses the emerging technology for Orthogonal Frequency Division Multiple Access (OFDMA), covering OFDMA physical layer as well as network technology. The book also includes information on IEEE 802.16e and WiMAX networks and also offers a comparison with other OFDMA technologies. OFDMA is the fastest growing area in the wireless marketplace, and the backbone of systems used in WiMAX. WiMAX is the technology that enables wireless users to communicate at any time from any location without having to find a WiFi hotspot.

'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New Yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded

barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, *Yvain*, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. *Yvain* is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

A concise introduction to IMT-Advanced Systems, including LTE-Advanced and WiMAX There exists a strong demand for fully extending emerging Internet services, including collaborative applications and social networking, to the mobile and wireless domain. Delivering such services can be possible only through realizing broadband in the wireless. Two candidate technologies are currently competing in fulfilling the requirements for wireless broadband networks, WiMAX and LTE. At the moment, LTE and its future evolution LTE-Advanced are already gaining ground in terms of vendor and operator support. Whilst both technologies share certain attributes (utilizing Orthogonal Frequency Division Multiple Access (OFDMA) in downlink, accommodating smart antennas and full support for IP-switching, for example), they differ in others (including uplink technology, scheduling, frame structure and mobility support). Beyond technological merits, factors such as deployment readiness, ecosystem maturity and

migration feasibility come to light when comparing the aptitude of the two technologies. LTE, LTE-Advanced and WiMAX: Towards IMT-Advanced Networks provides a concise, no-nonsense introduction to the two technologies, covering both interface and networking considerations. More critically, the book gives a multi-faceted comparison, carefully analyzing and distinguishing the characteristics of each technology and spanning both technical and economic merits. A "big picture" understanding of the market strategies and forecasts is also offered. Discusses and critically evaluates LTE, LTE-Advanced and WiMAX (Legacy and Advanced) Gives an overview of the principles and advances of each enabling technology Offers a feature-by-feature comparison between the candidate technologies Includes information which appeals to both industry practitioners and academics Provides an up-to-date report on market and industry status

Exploring the Turkish Linguistic Landscape provides in-depth analyses of different aspects of Turkish in the domains of phonology, morphology and syntax, discourse and language acquisition relevant to recent theoretical discussions. While some of the papers in the volume offer new analyses to known linguistic puzzles, others raise new questions which have not been addressed in the literature before. This collection of original articles written by colleagues and students of Prof. Eser Erguvanli-Taylan, honoring her contribution to the field of linguistics, features articles on vowel reduction, consonant clusters, negation, conditionals, voice morphology, evidentiality, acquisition of irregular morphology, complementation and subordination in varieties of Turkish. It will be of interest to a wide audience ranging from theoreticians to typologists and is expected to generate further research on Turkish, as well as to contribute to the cross-linguistic literature on the issues addressed in the volume.
