CRNA Certification Exam Review is the ideal study guide for new and recertifying nurses preparing for the Certified Registered Nurse Anesthetists (CRNA) certification exam. Built to mirror the Council on Certification of Nurse Anesthetists (CCNA) test blueprint, it offers 1,600 practice questions with comprehensive answer rationales. CRNA Certification Exam Review explores basic sciences, equipment, instrumentation and technology, basic and advanced principles of anesthesia, and professional issues. Included with each new print book is an Access Code for Navigate TestPrep, a dynamic and fully hosted online assessment tool designed to help nurses prepare for certification examinations by offering case-based questions, detailed rationales, and robust reporting. * Randomized questions create new exams on each attempt * Monitors results on practice examinations with score tracking and time on each task * Reporting tools evaluate progress and results on each attempt * Includes bonus questions not found in the book

Stoelting's Pharmacology & Physiology in Anesthetic Practice Churchill Livingstone

Actual case studies in a Q & A format explore contemporary problems in anesthesia, and provide practical solutions based on a careful examination of all of the important scientific and clinical principles for each case. The 3rd Edition offers brand-new coverage of key

topics in the cardiovascular, respiratory, central nervous system, abdomen, and post-anesthesia care sections as well as a completely new section on trauma. It also addresses important topics such as hemophilia, infant anesthesia, lower extremity anesthesia, and celiac plexus blocks. All of the existing cases are thoroughly revised to include new treatments and practice guidelines, and new knowledge of the relevant pharmacology. It's an ideal review tool for board preparation, and a handy resource for practice. Offers solutions to frequently occurring practical problems through discussions of pathophysiology, pharmacology, preoperative evaluation, and intraoperative care. Facilitates the proper identification of both common and rare clinical problems. Examines the crucial scientific and clinical principles for each case study. A completely new section on trauma features five new cases: blunt vs. penetrating trauma . neck and airway trauma . thoracic trauma . closed head injury with open femur fracture . and burns. The cardiovascular section offers new cases relating to: cardiac tamponade . cardiomyopathy . noncardiac surgery after heart transplantation . coronary artery bypass grafting . and do-not-resuscitate. The respiratory section features new cases on post-thoracotomy complications and thoracoscopy. The central nervous system content is enriched with cases on monitoring in spinal injury . transsphenoidal hypophysectomy . and magnetic resonance imaging. The abdominal section offers new cases on endovascular surgery . morbid obesity . laparoscopy . carcinoid and kidney transplant. Important topics such as hemophilia . infant anesthesia . lower extremity anesthesia . and celiac plexus

blocks are now covered. Postanesthesia care is expanded to include pulmonary function testing . respiratory failure . delayed emergence . coma and brain death . and anaphylaxis. The existing cases are thoroughly revised to include the new treatments, treatment guidelines, and the relevant pharmacology.

Oxford Handbook of Anaesthesia Elsevier

This concise, evidence-based board review book, organized according to the ABA keyword list, covers all the fundamental concepts needed to pass written and re-certification board examinations. Each chapter begins with a case scenario or clinical problem from everyday practice, followed by concise discussion and clinical review questions and answers. Discussion progresses logically from preoperative assessment and intraoperative management to postoperative pain management, enhancing the reader's knowledge and honing diagnostic and clinical management skills. New guidelines and recently developed standards of care are also covered. Serving as a companion to the popular textbook *Essential Clinical Anesthesia*, this resourceful work reflects the clinical experiences of anesthesia experts at Harvard Medical School as well as individually known national experts in the field of anesthesiology. This practical review is an invaluable resource for anesthesiologists in training and practice, whether studying for board exams or as part of continuing education and ABA recertification.

Miller's Anesthesia Review E-Book Lippincott Williams & Wilkins

The Oxford Handbook of Anaesthesia has been completely updated for the second edition. All chapters have been rewritten and a number of new expert authors have been brought on board. Additional new material includes anaesthesia for the critically ill, and a comprehensive section on anaesthetic risk including anaesthetic risk tables. The first section deals with preoperative issues affecting the administration of anaesthesia.

Practical advice is provided covering the impact of medical disease on anaesthesia. The second section describes practical anaesthetic techniques for surgical specialties, including most subspecialties such as thoracic and neuroanaesthesia.

Separate, comprehensive sections on paediatric and obstetric anaesthesia are included. The management of emergencies arising during anaesthesia are fully covered with helpful action plans and algorithms throughout.

Uncommon conditions and their management are included, and there is an extensive drug formulary and guide to infusion drugs. As with the first edition, this new edition will be the essential handbook for anaesthetists, both junior and experienced, for registrars and those sitting exams, as well as ODPs and nurses involved in theatre area work and pre-assessment.

It is the one book for anyone working in anaesthesia to keep to hand at all times!
