Greek Tragedy Cambridge University Press

This book reports on a study on physics problem solving in real classrooms situations. Problem solving plays a pivotal role in the physics curriculum at all levels. However, physics students' performance in problem solving all too often remains limited to basic routine problems, with evidence of poor performance in solving problems that go beyond equation retrieval and substitution. Adopting an action research methodology, the study bridges the 'research-practical divide' by explicitly teaching physics problem-solving strategies through collaborative group problem-solving sessions embedded within the curriculum. Data were collected using external assessments and video recordings of individual and collaborative group problem-solving sessions by 16-18 year-olds. The analysis revealed a positive shift in the students' problem-solving patterns, both at group and individual level. Students demonstrated a deliberate, well-planned deployment of the taught strategies. The marked positive shifts in collaborative competences, cognitive competences, metacognitive processing and increased self-efficacy are positively correlated with attainment in problem solving in physics. However, this shift proved to be due to different mechanisms triggered in the different students.

The subject of this book is an important and diverse field of electric machines and drives. The twelve chapters of the book written by renowned authors, both academics and practitioners, cover a large part of the field of electric machines and drives. Various types of electric machines, including three-phase and single-phase induction machines or doubly fed machines, are addressed. Most of the chapters focus on modern control methods of induction-machine drives, such as vector and direct torque control. Among others, the book addresses sensorless control techniques, modulation strategies, parameter identification, artificial intelligence, operation under harsh or failure conditions, and modelling of electric or magnetic quantities in electric machines. Several chapters give an insight into the problem of minimizing losses in electric machines and increasing the overall energy efficiency of electric drives.

This textbook is endorsed by OCR and supports the specification for GCSE Ancient History (first teaching September 2017). It covers the whole of Component 1, both the compulsory Period Study and the three optional Depth Studies: Period Study: The Persian Empire, 559–465 BC by James Renshaw Depth Study: From Tyranny to Democracy, 546–483 BC by Sam Baddeley Depth Study: Athens in the Age of Pericles, 462–429 BC by Paul Fowler and James Renshaw Depth Study: Alexander the Great, 356–323 BC by Lucy Nicholas Was propaganda Persia's greatest weapon? How did Athens create democracy? Does Pericles' Athens deserve to be remembered as civilised or barbaric? How did Alexander dominate the ancient world by the age of 32? This book raises these and other key questions. GCSE students and their teachers will explore key political and social

developments of the Greek and Persian worlds through the eyes of ancient historians and archaeology. This book invites us to look at ancient societies in a new light and helps explain the development of the modern world. The ideal preparation for the final examinations, all content is presented by experts and experienced teachers in a clear and accessible narrative. Ancient literary and visual sources are described and analysed, with supporting images. Helpful student features include study questions, further reading, and boxes focusing in on key people, events and terms. Practice questions and exam guidance prepare students for assessment. An Introduction to Greek Art Penguin UK

The world is awash with digital data from social networks, blogs, business, science and engineering. Data-intensive computing facilitates understanding of complex problems that must process massive amounts of data. Through the development of new classes of software, algorithms and hardware, data-intensive applications can provide timely and meaningful analytical results in response to exponentially growing data complexity and associated analysis requirements. This emerging area brings many challenges that are different from traditional high-performance computing. This reference for computing professionals and researchers describes the dimensions of the field, the key challenges, the state of the art and the characteristics of likely approaches that future data-intensive problems will require. Chapters cover general principles and methods for designing such systems and for managing and analyzing the big data sets of today that live in the cloud and describe example applications in bioinformatics and cybersecurity that illustrate these principles in practice.

Cognitive and Metacognitive Problem-Solving Strategies in Post-16 Physics Forgotten Books

Though in later antiquity the social comedies of Menander ranked second in popularity only to Homer, his plays were for centuries thought to be irretrievably lost. Only in this century have instances begun to re-emerge from the sands of Egypt, and it was not until 1958 that a complete play, *Dyskolos* or *The Bad-Tempered Man*, came to light. With this we can now gauge in full the skill that Menander brought to his works, even in the early phase of his career. In preparing this edition, the author aims to make accessible to readers some of the consummate sophistication in dramatic technique and use of language that once produced the question, "Menander and Life, which of you imitated the other?" Greek text with facing translation, commentary and notes.

Plays for Youth Theatres and Large Casts Letts & Lonsdale

A classic anthology for GCSE. The eight thematic sections of poetry include works by Catullus, Horace, Lucretius, Martial, Ovid, Petronius, Seneca and Virgil. The eight sections of adapted prose include sections from Apuleius, Caesar, Cicero, Pliny, Sallust, Tacitus, and the Acts of the Apostles in the Vulgate. Glosses and other explanations are provided opposite each of the texts, and the writing is illustrated throughout by paintings and photographs of artifacts in the Roman world. For the student, there is a complete vocabulary at the end of the book. For the teacher, there is an accompanying handbook giving additional suggestions for discussions in the classroom.

The present work is intended to assist academics, researchers and proponents of online learning and teaching. Academics will be able to share the findings presented in this book, and the Social Networking and Education Model (SNEM), with their students (i.e. Masters and PhD). It is envisaged that this book will assist researchers and anyone interested in online learning to understand the opportunities and risks associated with the use of Social Networking in the education sector, and assist them to implement SN by means of the new SNEM model. The reader will benefit from our examinations of the risks and opportunities associated with the use of Social Networking in the education sector in various regions around the world: Asia-Pacific, Europe, Mediterranean, America, Middle East and the Caribbean. In addition, a Social Networking and Education Model (SNEM) will be developed to promote and implement Social Networking in the education sector.

Plutarch's Life of Themistocles Hodder Education

The biographies collected in this volume bring together Plutarch's Lives of those great men who established the city of Rome and consolidated its supremacy, and his Comparisons with their notable Greek counterparts. Here he pairs Romulus, mythical founder of Rome, with Theseus, who brought Athens to power, and compares the admirable Numa and Lycurgus for bringing order to their communities, while Titus Flamininus and Philopoemen are portrayed as champions of freedom. As well as providing an illuminating picture of the first century AD, Plutarch depicts complex and nuanced heroes who display the essential virtues of Greek civilization - courage, patriotism, justice, intelligence and reason - that contributed to the rise of Rome. These new and revised translations by W. Jeffrey Tatum and Ian Scott-Kilvert capture Plutarch's elegant prose and narrative flair. This edition also includes a general introduction, individual introductions to each of the Lives and Comparisons, further reading and notes. The Rise of Rome is the penultimate title in Penguin Classics' complete revised Plutarch in six volumes. Other titles include *Rome In Crisis*, *On Sparta*, *Fall of the Roman Republic*, *The Age of Alexander* and *The Rise and Fall of Athens* (forthcoming 2014).

Plutarch traces the fortunes of Athens through nine lives - from Theseus, its founder, to Lysander, its Spartan conqueror - in this seminal work *What makes a leader?* For Plutarch the answer lay not in great victories, but in moral strengths. In these nine biographies, taken from his *Parallel Lives*, Plutarch illustrates the rise and fall of Athens through nine lives, from the legendary days of Theseus, the city's founder, through Solon, Themistocles, Aristides, Cimon, Pericles, Nicias and Alcibiades, to the razing of its walls by Lysander. Plutarch ultimately held the weaknesses of its leaders responsible for the city's fall. His work is invaluable for its imaginative reconstruction of the past, and profound insights into human life and achievement. This edition of Ian Scott-Kilvert's seminal translation, fully revised with a new introduction and notes by John Marincola, now also contains Plutarch's attack on the first historian, 'On the Malice of Herodotus'.

The History in Focus series aims to provide coverage of the major GCSE and S Grade syllabuses.

This is the second book in the series, and includes: narrative supported by sources which offer pupils an explanation of the core content; tasks to familiarize pupils with the content and develop their evaluative skills; and investigations which hone pupils' skills and historical analysis. The book also tackles such option topics as Britain's multi-ethnic society, and supports coursework and independent learning both through the core text and the related Teacher's Resource Book.
