For the past 140 years, Germany has been the central power in continental Europe. Twenty-five years ago a new German state came into being. How much do we really understand this new Germany, and how do its people understand themselves? Neil MacGregor argues that, uniquely for any European country, no coherent, overarching narrative of Germany's history can be constructed, for in Germany both geography and history have always been unstable. Its frontiers have constantly shifted. Königsberg, home to the greatest German philosopher, Immanuel Kant, is now Kaliningrad, Russia; Strasbourg, in whose cathedral Wolfgang von Goethe, Germany's greatest writer, discovered the distinctiveness of his country's art and history, now lies within the borders of France. For most of the five hundred years covered by this book Germany has been composed of many separate political units, each with a distinct history. And any comfortable national story Germans might have told themselves before 1914 was destroyed by the events of the following thirty years. German history may be inherently fragmented, but it contains a large number of widely shared memories, awarenesses, and experiences; examining some of these is the purpose of this book. MacGregor chooses objects and ideas, people and places that still resonate in the new Germany—porcelain from Dresden and rubble from its ruins, Bauhaus design and the German sausage, the crown of Charlemagne and the gates of Buchenwald—to show us something of its collective imagination. There has never been a book about Germany quite like it.

Following his much-acclaimed *The Baroque Clarinet* and *The Clarinet in the Classical Period*, Albert R. Rice now turns his signature detailed attention to large clarinets - the clarinet d'amour, the basset horn, the alto clarinet, bass and contra bass clarinets. Each chapter is devoted to a specific instrument, and offers a fascinating insider's look at its defining characteristics, a comprehensive history of its evolution, meticulously-researched information on its makers and aspects of construction, and a thorough discussion of its music. Rice illustrates how the introduction of large clarinets into chamber ensembles, wind bands, and opera orchestras was the result of experiments meant to address specific musical needs. Along the way, he brings to life the musicians, virtuosi,

soloists, and orchestral and band musicians, as well as the instruments' makers and the composers from J. C. Bach to Smetana who wrote for them. Based on careful study of primary sources - musical compositions, patents, memoirs and diaries, and unfettered access to historical instruments themselves--Rice's expert presentation is nothing short of exhaustive. From the Clarinet d'Amour to the Contrabass will engage all who love the clarinet and its music.

Parliaments are both representative assemblies of the people and monuments of political and national identity. This catalogue for the Austrian contribution to the 14th International Architecture

Exhibition in Venice features 196 national parliaments of the world. It fans out a comparison of the various messages to be conveyed by the architecture of parliament buildings: perpetuity, conformity with historical precedents or the fervent manifestation of a new beginning. However, neatly ordered by name and presented in a homogeneous fashion, their monumentality is somewhat lessened. The cold light of analysis brings forward numerous formal similarities of buildings that serve completely different political regimes.

Two tales of a city: The historical race to reach one of the world's most mythologized places, and the story of how a contemporary band of archivists and librarians, fighting to save its ancient manuscripts from destruction at the hands of al Qaeda, added another layer to the legend. To Westerners, the name "Timbuktu" long conjured a tantalising paradise, an African El Dorado where even the slaves wore gold. Beginning in the late eighteenth century, a series of explorers gripped by the fever for "discovery" tried repeatedly to reach the fabled city. But one expedition after another went disastrously awry, succumbing to attack, the climate, and disease. Timbuktu was rich in another way too. A medieval centre of learning, it was home to tens of thousands of ancient manuscripts, on subjects ranging from religion to poetry, law to history, pharmacology, and astronomy. When al-Qaeda-linked jihadists surged across Mali in 2012, threatening the existence of these precious documents, a remarkable thing happened: a team of librarians and archivists joined forces to spirit the manuscripts into hiding. Relying on extensive research and firsthand reporting, Charlie English expertly twines these two suspenseful strands into a fascinating account of one of the planet's extraordinary places, and the myths from which it has become inseparable

NAMED A MOST ANTICIPATED BOOK OF THE YEAR BY KIRKUS REVIEWS A riveting study of the intersections between Jewish and Latin American culture, this immigrant family memoir recounts history with psychological insight and the immediacy of a thriller. In *Nuestra América*, eminent anthropologist and historian Claudio Lomnitz traces his grandparents' exile from Eastern Europe to South America. At the same time, the book is a pretext to explain and analyze the worldview,

culture, and spirit of countries such as Peru, Colombia, and Chile, from the perspective of educated Jewish emigrants imbued with the hope and determination typical of those who escaped Europe in the 1920s. Lomnitz's grandparents, who were both trained to defy ghetto life with the pioneering spirit of the early Zionist movement, became intensely involved in the Peruvian leftist intellectual milieu and its practice of connecting Peru's indigenous past to an emancipatory internationalism that included Jewish culture and thought. After being thrown into prison supposedly for their socialist leanings, Lomnitz's grandparents were exiled to Colombia, where they were subject to its scandals, its class system, its political life. Through this lens, Lomnitz explores the almost negligible attention and esteem that South America holds in US public opinion. The story then continues to Chile during World War II, Israel in the 1950s, and finally to Claudio's youth, living with his parents in Berkeley, California, and Mexico City.
