The subject of tropical
cyclones in Southern
Africa, also known as
hurricanes or typhoons in
other regions of the world,
has been growing over
the past few decades.
However, there is still
limited literature on
foundational and
fundamental topics on the
matter. To this end, this
book addresses this gap,

citing some examples from both historic and recent tropical cyclones. The book presents meteorological and climatic aspects of tropical cyclones, including reviews on forecasting, warning message dissemination and public response aspects of early warning systems with a focus on the Tropical Cyclones Idai and Kenneth. Fundamentals in disaster risk reduction (DRR) are also discussed moving from the provisions of the Hyogo Framework for

Action (2005–2015), to the Sendai Framework for Disaster Risk Reduction (2015–2030). Climate change issues are central to the publication, as well as the role of information and communication technologies in DRR and management. The book also tackles some challenges and opportunities associated with the implementation of regional legal and institutional frameworks on DRR. The book comes as part of a series with three volumes. The other volumes include

“Cyclones in Southern Africa Vol. 1: Interfacing the Catastrophic Impact of Cyclone Idai with SDGs in Zimbabwe” and “Cyclones in Southern Africa Vol 3: Implications for the Sustainable Development Goals”. To this end, this book is suitable as a read for several professionals and disciplines such as tourism and hospitality studies, economics, sustainable development, development studies, environmental sciences, arts, geography, life sciences, politics, planning and public

health.

South African Human Resource Management IGI Global

This book focuses on essential findings concerning emerging practices of student learning through the teaching and learning benefits of the electronic portfolio (ePortfolio) in a range of disciplines at Australian universities. It explores the latest research on ePortfolios, teaching quality, future research directions for tertiary learning and teaching, institutional

agendas in higher education, and the role that the ePortfolios can play in supporting improvements in pedagogic practice and student outcomes. Included in these agendas is research into the development of higher education through the technologising of pedagogy, learner identities in discrete disciplines, and the praxis of individual university teachers. The book covers accounts of academic learning success and challenges across current

higher education subject areas. By presenting case study accounts of ePortfolio use, it reveals the importance of defining and documenting how we can meaningfully develop learner portfolios in research, teaching and learning at Australian universities. With an intentional research base, the book draws on work conducted inside and outside Australia and highlights how the ePortfolio can help tertiary staff prepare for the impact of a student-created portfolio on

teaching, learning, and subsequent academic scholarship.

v. 3: The third volume in the series examines the role of anti-apartheid movements around the world. The global anti-apartheid movement was very successful in creating awareness of the liberation struggle in South Africa, and in contributing to the downfall of the apartheid government. This volume,

in 2 parts, brings together analyses which in the main are written by activist scholars with deep roots in the movements and organizations they are writing about.

The Statesman's Yearbook 2005 HSRC Press

This Festschrift has been compiled by Sanchen Henning in honour of the work of Professor Frans Cilliers. On behalf of colleagues and friends in South Africa and abroad, she illustrates their appreciation and respect for his role as scholar in Systems Psychodynamics.

He produced various pioneering research projects in Organisational Psychology as his field of study, through the Systems Psychodynamic lens. A specific feature and contribution of the book is the application of Systems Psychodynamics to organisational matters and leadership consulting as well as to the lived experiences of postgraduate students and academics. The chapters include themes relevant on individual, group and organisational levels and are intended to

contribute to the body of knowledge in the field. The Calendar Springer Nature Different levels in health sciences, in particular public health, have acknowledged the significant role of epidemiology methods for early detection of emerging infections, alert systems, and preparedness interventions. Therefore, it is important to understand how epidemiological research is conducted and how it can be used at various

levels to make exposure or incidence data on a general population available. In this, epidemiological research connected to both human and technology interactions is of primary importance. Epidemiological Research Applications for Public Health Measurement and Intervention provides relevant theoretical frameworks and the latest empirical research findings in the field of epidemiology. The chapters within this essential reference source

enhance the knowledge of epidemiological research and measurement to investigate, detect, and monitor emerging pathological infections. While highlighting topics that include the history of epidemiology; the applications of epidemiology; and also the uses, principles, and roles of epidemiology, this book is ideally intended for professionals and researchers working in the field of health sciences in various disciplines and government officials,

policymakers, practitioners, stakeholders, researchers, academicians, and students who are interested in epidemiological research and measurement for increasing the effectiveness of public health practice.

A Bold Profession BRILL In 2013 and in 2014 respectively, the South African Association of Political Studies (SAAPS) and Politikon (the South African Journal of Political Studies) celebrate their 40th anniversary. Also, in

April 2014 South Africa celebrates twenty years since the advent of the post-Apartheid democracy, and the birth of the 'rainbow nation'. This book provides a timely account of the birth and evolution of South African politics over the past four decades, but also of the study of Political Science and International Relations in this country. Fourteen political scientists contribute chapters to this volume, situating the study of politics within its global context and

recounting the development of politics as a field of study at South African universities. The fourteen contributions evaluate the state of the discipline(s) and suggest conclusions that are surprising and in many instances unsettling, not only with regards to what and how politics is taught, but also how its study has variously gained and lost pertinence for South Africans' understanding of their own polity as well as its place in the world. The implications are uncomfortable, and pose

interesting challenges for South African scholarship, pedagogy and national self-reflection. This book was published as a special issue of *Politikon*.

Army-Navy-Air Force Register and Defense Times Springer

The application of artificial intelligence in networks and systems is a rapidly evolving field that has the potential to transform a wide range of industries. The refereed proceedings in this book is from the Artificial Intelligence Application in Networks and Systems session of

the Computer Science Online Conference 2023 (CSOC 2023), which was held online in April 2023. The section brings together experts from different fields to present their research and discuss the latest trends and challenges. One of the key themes in this section is the development of intelligent systems that can learn, adapt, and optimize their performance in real time. Researchers are exploring how AI algorithms can be used to create autonomous networks and

systems that can make decisions without human intervention. Furthermore, this section highlights the use of AI in improving network performance and efficiency. Researchers are exploring how AI algorithms can be used to optimize network routing, reduce congestion, and improve the quality of service. These efforts can help organizations save costs and improve user experience.

This book constitutes the proceedings of the 11th

International Workshop on Fuzzy Logic and Applications, WILF 2016, held in Naples, Italy, in December 2016. The 22 revised full papers presented together with 2 invited lectures were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on fuzzy measures and transforms; granularity and multi-logics, clustering and learning; knowledge systems; and soft computing and applications.

Finweek Springer Nature Filled with over 65 valuable case studies, role plays, video-based discussions, simulations, reflective exercises and other experiential activities, Teaching Human Resource Management enables HR professors, practitioners and students at all levels, to engage and enhance knowledge and skills on a wide range of HR concepts. This book breathes life into the teaching of Human Resource Management and readers will be able to

better relate theoretical concepts to workplace decisions and dilemmas.

This 6-volume set LNAI 14875-14880 constitutes - in conjunction with the 13-volume set LNCS 14862-14874 and the 2-volume set LNBI 14881-14882 - the refereed proceedings of the 20th International Conference on Intelligent Computing, ICIC 2024, held in Tianjin, China, during August 5-8, 2024.

The total of 863 regular papers were carefully reviewed and selected from 2189 submissions. The intelligent computing annual conference primarily aims to promote research, development and application of advanced intelligent computing techniques by providing a vibrant and effective forum across a variety of disciplines. This conference has a further aim of increasing the awareness of industry of advanced intelligent computing techniques and the economic benefits

that can be gained by implementing them. The intelligent computing technology includes a range of techniques such as Artificial Intelligence, Pattern Recognition, Evolutionary Computing, Informatics Theories and Applications, Computational Neuroscience & Bioscience, Soft Computing, Human Computer Interface Issues, etc.

Epidemiological Research Applications for Public Health Measurement and Intervention Springer

Distance education is arguably one of the major developments in education during the 20th Century. This title explores the array of distance education theories and practices as they have been shaped by the late-20th Century and then positions these in terms of the contemporary circumstances of the 21st Century.

Has it been your dream to become a paralegal or lawyer? Perhaps you have a desire to obtain a degree or further your education in one of the many law or law-related fields. Yet due to your schedule or circumstances, you simply cannot attend a residential school full time. Well this guide is

your answer. It contains over 400 schools offering Distance Learning in such programs. Also included in this Guide are sections covering Designations, Paralegal Exams, Admission to Law School, Studying Law, Qualifying for the Bar, Bar Associations, Law Societies, and much more. The Schools are located through-out the World and their programs can be completed with little or no residency
McGregor's who Owns Whom in South Africa
University of Adelaide

Press Book & CD. This fourth edition makes it clear that all who are interested in the sustainability of South Africa -- and Africa -- must put human resource management (HRM) at the very core of the management of organisations generally. The content is aligned to outcomes that are geared towards analytical and critical thinking about the theory and practice of HRM in South Africa. The African context is addressed, and ample information about HRM

aspects 'elsewhere in Africa' is provided. This edition breaks away even further from the traditional structure of so many standard HRM textbooks. It challenges a broadening of the 'agenda' and scope of HRM work: HRM is not only about managing employees, but also about managing the work and the people who do the work of and in organisations. This may involve alternative ways of getting the work of organisations done superiorly. This book will

help you to apply HRM effectively to achieve its ultimate aim, namely to add value to people, to organisations and to society. This comprehensive book is organised around themes such as: Developing an appreciation for the context of HRM in South Africa; Strategising, designing and planning as preparatory HRM work; Sourcing work talent; Facing the countrys people empowerment challenge; Meeting the reward and care challenge; Handling

labour and employee relations challenges; Championing change and transformation; Managing HRM-related information, including HRM and sustainability reporting. Based on most recent theoretical developments, the emphasis is on the practical applications. Samples of relevant documents are included, and an accompanying CD contains a wealth of relevant resources as well as a continuing, integrating case study that serves as a basis for these applications, and

individual and group activities. As a package, South African Human Resource Management will be extremely valuable to both current and aspirant managers, and human resource practitioners. Drum Springer Nature This book tells the story of the renaissance of the Kurna language, the language of Adelaide and the Adelaide Plains in South Australia, principally over the earliest period up until 2000, but with a summary and brief discussion of

developments from 2000 until 2016. It chronicles and analyses the efforts of the Nunga community, and interested others, to reclaim and relearn a linguistic heritage on the basis of mid-nineteenth-century materials. This study is breaking new ground. In the Kurna case, very little knowledge of the language remained within the Aboriginal community. Yet the Kurna language has become an important marker of identity and a means by which Kurna people can further the

struggle for recognition, reconciliation and liberation. This work challenges widely held beliefs as to what is possible in language revival and questions notions about the very nature of language and its development.

South African Journal of Labour Relations Artworks Pub.

Direct and sometimes heated, these essays from prominent South African leaders consider the success of justice and reconciliation in the years since the end of

apartheid. Presenting both the good and bad news, the contributors move beyond current thinking to discuss both practical and visionary ways to confront a contested legacy, take stock of social changes, and define future possibilities for reconciliation in South Africa.
