JACOBS FREDERICK

A Hole in the Bottom of the Sea Peep Inside

The heart of this book is a new approach to the teaching of language and literacy. Its focus is exemplary classroom practice built on rigorous theory and evidence. The approach combines new theory and dynamic practice in its advocacy for contextualised teaching. This book shows how the teaching of smaller units of language, such as sentences, words, letters and phonemes, follows naturally from the context of whole texts. The book offers: practical examples, photographs from settings, case studies and action points to help any practitioner working with young children to develop one of the most crucial life skills, advice on how to build on children's motivation using whole texts, clear guidance on phonics teaching in an appropriate context and a unique blend of new theory and dynamic practice.

Little Transfer Book Under the Sea

Hoxton mini Press

Hauntingly beautiful photographs of dogs in cars As a child, photographer Martin Usborne was once left in a car. This was not for long, but he wondered if anyone would come back. Around the same age he fell in love with dogs - they could not speak, just as he felt he was silent in that car. Thirty years later the two experiences came together in this cinematic and darkly humorous project that looks at the way humans are able to silence the animals they love best. No dogs were harmed in the making of this project.
