What does it mean to be human? Why do we feel and behave in the ways that we do? The classic answer is that we have a special kind of intelligence. But to understand what we are as humans, we also need to know what we are like motivationally. And what is central to this story, what is special about human motivation, is that humans want to share with others their inner experiences about the world--share how they feel, what they believe, and what they want to happen in the future. They want to create a shared reality with others. People have a shared reality together when they experience having in common a feeling about something, a belief about something, or a concern about something. They feel connected to

another person or group by knowing that this person or group sees the world the same way that they do--they share what is real about the world. In this work, Dr. Higgins describes how our human motivation for shared reality evolved in our species, and how it develops in our children as shared feelings, shared practices, and shared goals and roles. Shared reality is crucial to what we believe--sharing is believing. It is central to our sense of self, what we strive for and how we strive. It is basic to how we get along with others. It brings us together in fellowship and companionship, but it also tears us apart by creating in-group "bubbles" that conflict with one another. Our shared realities are the best of us, and the worst of us.

Darius doesn't think he'll ever be enough, in America or in Iran. Hilarious and heartbreaking, this unforgettable debut introduces a brilliant new voice in contemporary YA. Winner of the William C. Morris Debut Award "Heartfelt, tender, and so utterly real. I'd live in this book forever if I could." —Becky Albertalli, award-winning author of *Simon vs. the Homo Sapiens Agenda* Darius Kellner speaks better Klingon than Farsi, and he knows more about Hobbit social cues than Persian ones. He's a Fractional Persian—half, his mom's side—and his first-ever trip to Iran is about to change his life. Darius has never really fit in at home, and he's sure things are going to be the same in Iran. His clinical depression doesn't exactly help matters, and trying to explain his medication to his grandparents only makes things harder. Then Darius meets Sohrab, the boy next door, and everything changes. Soon, they're spending their days together, playing soccer, eating faludeh, and talking for hours on a secret rooftop overlooking the city's skyline. Sohrab calls him Darioush—the original Persian version of his name—and Darius has never felt more like himself than he does now that he's Darioush to Sohrab. Adib Khorram's brilliant debut is for anyone who's ever felt not good enough—then met a friend who makes them feel so much better than okay.

A Washington Post Bestseller Hello? Are you there? Can you hear me? Communicating virtually is cool, useful, and ubiquitous. But whenever there's a glitch with the technology or a message is unclear, we're reminded that the quality of human connection we experience in many forms of virtual communication is awful. We've all felt disconnected and bored in a video conference, frustrated that we're not getting through on the phone, or upset when our email is badly misinterpreted. The truth is, virtual communication breeds misunderstanding because it deprives us of the emotional knowledge that helps us understand context. How can we fix this? In this powerful, practical book, communication expert Nick Morgan outlines five big problems with communication in the virtual world--lack of feedback, lack of empathy, lack of control, lack of emotion, and lack of connection and commitment--sharply highlighting what is lost in our accelerating shift to a more virtual world. And he provides a clear path forward for helping us connect better with others. Morgan argues that while virtual communication will never be as rich or intuitive as a face-to-face meeting, recent research suggests that what will help--and what we need to learn--is to consciously deliver a whole set of cues, both verbal and nonverbal, that we used to deliver unconsciously in the pre-virtual era. He explains and guides us through this important process, providing rules for virtual feedback, an

empathy assessment and virtual temperature check, tips for creating trust in a virtual context, and advice for specific digital channels such as email and text, the conference call, Skype, and more. Whether you're an entrepreneur, an independent professional, or a manager in an organization that has more than one office or customers who aren't nearby, Can You Hear Me? is your essential communications manual for twenty-first-century work.
