Picture respectful, responsible, obedient children who entertain themselves without television or video games, do their own homework, and have impeccable manners. A pie-in-the-sky fantasy? Not so, says family psychologist and bestselling author John Rosemond. Any parent who so desires can grow children who fit that description -- happy, emotionally healthy children who honor their parents and their families with good behavior and do their best in school. In the 1960s, American parents stopped listening to their elders when it came to child rearing and began listening instead to professional experts. Since then, raising children has become fraught with anxiety, stress, and frustration. The solution, says John, lies in raising children according to biblical principles, the same principles that guided parents successfully for hundreds of years. They worked then, and they still work now! Through his nationally syndicated newspaper column and eleven books, John has been helping families raise happy, well-behaved children for more than thirty years. In Parenting by The Book, which John describes as both a "mission and a ministry," he brings parents back to the uncomplicated basics. Herein find practical, Bible-based advice that will help you be the parent you want to be, with children who will be, as the Bible promises, "a delight to your soul" (Pro. 29-17). As a bonus, John also promises to make you laugh along the way.

How to Talk So Little Kids Will Listen Three Rivers Press

With the high rate of divorce, children are more likely than ever before to be raised by a single parent. Now, from the author of Positive Discipline, here is the definitive book for single parents to raising responsible, respectful children.

Parenting by the Book Harmony Safe, nurturing, and positive parent-child interactions lay the foundations for healthy child development. How children are raised in their early years and beyond affects many different aspects of their lives, including brain development, language, social skills, emotional regulation, mental and physical health, health risk behavior, and the capacity to cope with a spectrum of major life events.

As such, parenting is the most important potentially modifiable target of preventive intervention. The Power of Positive Parenting provides an in-depth description of "Triple P," one of the most extensively studied parenting programs in the world, backed by more than 30 years of ongoing research. Triple P has its origins in social learning theory and the principles of behavior, cognitive, and affective change, and its aim is to prevent severe behavioral, emotional, and developmental problems in children and adolescents by enhancing the knowledge, skills, and confidence of parents. Triple P incorporates five levels of intervention on a tiered continuum of increasing strength for parents of children from birth to age 16. The programs comprising the Triple P system are designed to create a family-friendly environment that better supports parents, with a range of programs tailored to their differing needs. This volume draws on the editors' experience of developing Triple P, and chapters address every aspect of the system, as well as how it can be applied to a diverse range of child and parent problems in different age groups and cultural contexts.

Taming the Spirited Child Harmony Nelsen's popular Positive Discipline philosophy is used in hundreds of schools as a foundation for fostering cooperation, problem-solving skills, and mutual respect in children. In this latest edition, teachers learn how to create and maintain an atmosphere where learning can take place--and where students and teachers can work together to solve problems.

The No-Cry Discipline Solution: Gentle Ways to Encourage Good Behavior Without Whining, Tantrums, and Tears Penguin

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in

effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
