Dictionnaire Géographique Et Statistique Sur Un Plan Entièrement Nouveau McGill-Queen's Press - MQUP
 The thinking of Antoine-Augustin Cournot has inspired a growing literature in economy and epistemology, but as of yet, his sociological thought has not been explicitly discussed and contextualized within the discipline. From the 1850s to the end of the 1870s, Cournot contributed significantly to the history of French sociology, particularly in the development

of one essential idea: that forms of knowledge are intimately linked to the progress of reason. Philosophy, therefore, becomes interested in the development of the sciences, evolving as they do from the process of rationalizing human societies. Cournot's comparative-historical sociology, "rediscovered" especially by Gabriel Tarde in the 20th century, seeks to understand how a macro-sociological trend can depend on the aggregation of a host individual decisions and actions, or to discern a certain order out of apparent chaos.
Sessional Papers De Boeck Supérieur
 " Il y a trois types de mensonges : les mensonges, les gros mensonges, et la statistique " rappelait un Premier ministre britannique à la fin du XIXe siècle.

L'objectif de cet ouvrage est de vous donner assez de connaissances en statistique pour comprendre et critiquer des analyses impliquant des données numériques, et distinguer les conclusions légitimes et utiles des déclarations insensées et mensongères. Conscients que vous n'avez pas nécessairement une formation mathématique poussée, les auteurs ont pris soin de vous présenter les concepts et les méthodes de la statistique de manière simple et claire. Ils vous guideront pas à pas dans les méandres de la statistique descriptive puis de la statistique inférentielle.

Modern Group Theoretical Methods in Physics John Benjamins Publishing Company

"Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement.

Sessional Papers of the Dominion of Canada Springer

The contributions to this volume were written by historians, legal historians and art historians, each using his or her own methods and sources, but all concentrating on topics from the broad subject of historical legal iconography. How have the concepts of law and justice been represented in (public) art from the Late Middle Ages onwards? Justices and rulers had their courtrooms, but also churches, decorated with inspiring images. At first, the religious influence was enormous, but starting with the Early Modern Era, new symbols and allegories began appearing. Throughout history, art has been used to legitimise the act of judging, but artists have also satirised the law and the lawyers; architects and artisans have engaged in juridical and judicial projects and, in some criminal cases, convicts have even been sentenced to produce works of art. The book illustrates and contextualises the various interactions between law and justice on the one hand, and their artistic representations in paintings, statues, drawings, tapestries, prints and books on the other.

Victim Policies and Criminal Justice on the Road to Restorative Justice BRILL

This edited volume investigates the reconfiguration of gender in French banlieue cinema, interrogating whether the films produced over the last two decades provide new and viable models of resistance to dominant modes of power. Contributors take a critical approach which identifies gender as a marker of both body and identity politics to highlight the need to overcome a binary approach to banlieue aesthetics, which limits inquiry into the basis of conflict. Given that a feminization—and, to some extent, queering—of the once exclusively-masculine space is underway, contributors ultimately conclude that the banlieue and its on-screen representations cannot be properly understood unless intersectionality as a systematic approach is applied as an interpretive lens. Scholars of film, gender studies, and sociology will find this book particularly useful.

On the Dark Side of Chronic Depression Walter de Gruyter GmbH & Co KG

Published papers whose appeal lies in

their subject-matter rather than their technical statistical contents. Medical, social, educational, legal, demographic and governmental issues are of particular concern.

Sessional Papers Springer Science & Business Media

Les instruments jouent un rôle primordial dans l'avancée scientifique et technologique. Les ouvrages de cette mini-série consacrée à l'optique dans les instruments ont pour but de montrer que l'optique et les composants optiques constituent souvent la partie essentielle autour de laquelle interviennent l'électronique, la mécanique et l'informatique. Le premier tome a décrit les bases nécessaires à la compréhension des phénomènes physiques mis en jeu. Ce second tome a pour but d'illustrer par divers exemples le rôle fondamental de l'optique dans l'instrumentation destinée à la biologie et à la médecine. Sont développés quelques instruments utilisés en routine pour l'analyse et la caractérisation, des instruments de très haute complexité permettant aux chercheurs d'avoir accès à des mesures ultra précises ainsi que des technologies prometteuses actuellement en développement. Enfin ces exemples permettront de voir l'impact des lasers non seulement dans l'instrumentation mais aussi dans les soins médicaux depuis l'ophtalmologie jusqu'à la chirurgie et le traitement de nombreuses maladies.

"Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement.

National Union Catalog Leuven University Press

This edited volume contains 22 papers organized into three sections under the following headings: part I is entitled On Promoting Victim Policies; Part II On Reforming Criminal Justice; and Part III On Restorative Justice. All three areas are ones to which Tony Peters, former Professor of Criminology in Leuven, has made a significant contribution and for which he is known as an international authority. During his long and productive academic career Tony Peters led many struggles for criminal justice reform. He was a leading figure in the movement to recognize crime victims' plight and to reaffirm their rights. In Belgium, he spearheaded the early initiatives in restorative justice and became one of its outspoken proponents nationally and internationally. There is no doubt that these three major topics and the various

developments and reforms that are addressed in the papers will dominate the thinking about, and the practice of, criminal justice in the years to come. Thus, in addition to paying homage to a congenial friend and an illustrious colleague, it is hoped that this book will appeal and prove useful to all those who have an interest in victims issues, in criminal justice reform, and last but not least, in the promising paradigm of restorative justice.

Applied Psychology Springer

Upon the request of the International Union of Theoretical and Applied Mechanics (IUTAM) the Swedish National Committee for Mechanics organized a colloquium on fatigue, which was held at the Royal Institute of Technology (Kungl. Tekniska Hogskolan) in Stockholm, May 25-27, 1955. 35 lectures were delivered, principally dealing with problems of statistical and basic nature. Among the topics were to be found statistical theory of fatigue, cumulative damage, mechanism of fatigue, metallurgical aspects on fatigue, velocity of fatigue cracks, fatigue at elevated temperature, and fatigue at combined stresses. Lectures were going on simultaneously in two sections. Each lecturer had 15 minutes for presentation of his communication, and afterwards 15 minutes were reserved for discussion. Abstracts of the lectures were distributed about a month before the colloquium. The colloquium was attended by 149 participants from the following countries: Denmark (1), Finland (2), France (5), Germany (6), Italy (2), Netherlands (2), Norway (2), Poland (2), Saar (1), Spain (3), Sweden (100), Switzerland (1), United Kingdom (10), USA (8), USSR (3), and Yugoslavia (1). A complete list of the participants will be found below. The languages of the Colloquium were English, French, German and Italian. No lectures were delivered in Italian. Also, all contributions to the discussions have been translated to one of the first three languages. Statements and opinions advanced are always those of the individual authors or participants in the discussions.

European Population: Demographic dynamics Springer Science & Business Media

This book describes the repertoire and uses of referring expressions by French-speaking children and their interlocutors in naturally occurring dialogues at home and at school, in a wide range of communicative situations and activities. Through the lens of an interactionist and dialogical perspective, it highlights the interaction between the formal aspects of

the acquisition of grammatical morphemes, the discourse-pragmatic dimension, and socio-discursive, interactional and dialogical factors. Drawing on this multidimensional theoretical and methodological framework, the first part of the book deals with the relation between reference and grammar, while the second part is devoted to the role of the communicative experience. Progressively, a set of arguments is brought out in favor of a dialogical and interactionist account of children's referential development. This theoretical stance is further discussed in relation to other approaches of reference acquisition. Thus, this volume provides researchers and students with new perspectives and methods for the study of referring expressions in children.

Theory and Problems of Statistics INED

Le Bureau fédéral de la statistique a balisé l'évolution du Canada d'une économie de base à une puissance industrielle adulte, au seuil de l'ère de l'information. Tout au long de cette évolution, la nécessité d'obtenir des informations a progressé à la fois en quantité et en complexité alors même que les techniques destinées à recueillir, dépouiller, analyser et divulguer ces informations subissaient de profondes transformations. David A. Worton se penche sur la manière dont le système statistique canadien a fait face à ces profonds changements et décrit les importantes contributions que le Canada a apportées à la statistique et à sa production.

Répertoire des sources statistiques françaises Springer Science & Business Media

Advances in Catalysis

League of Nations Publications Ellipses Marketing

This book brings together cutting-edge expertise from psychoanalysis, psychiatry, neuroscience and social science to shed

light on the dark side of chronic depression. Considering different forms of depression on a continuum, the book develops new diagnostical considerations on depression. It includes detailed case studies from clinical psychoanalytical practice, conceptual considerations and historical analyses to current empirical and neurobiological studies on depression. The book is unique in bridging a gap between Anglo-Saxon/German psychoanalysis and French traditions in relation to clinical treatment techniques and conceptualizations of depression and trauma. Chapters present new research on the social, biographical, genetic and neurobiological determinants of severe depressive disorder and explore how these can be differentiated and expanded in the face of new cultural realities as well of new findings particularly in modern neurosciences. The book explores new understanding and discussion of treatment options for depression and will be essential reading for researchers and students in the field of depression and mental health research. It will also enrich the conceptual and clinical knowledge of psychoanalysts and psychotherapy researchers and students.

Statistique descriptive Academic Press

"Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as an addendum to vol. 26, no. 7.

A Journey in Languages and Cultures Lavoisier

Now available as single volumes as well as in a 13-volume set, the rare proceedings collected here were originally published between 1920 and 1958. This set documents international activity in applied psychology between the wars and during the post-War reestablishment of international scientific collaboration. The proceedings of each Congress are reproduced with a short individual preface discussing their content and import.

Memoires de la Societe

D'Anthropologie de Paris Firenze University Press

The NATO Advanced Study Institute on Numerical Taxonomy took place on the 4th - 16th of July, 1982, at the Kur- und Kongresshotel Residenz in Bad Windsheim, Federal Republic of Germany. This volume is the proceedings of that meeting, and contains papers by over two-thirds of the participants in the Institute. Numerical taxonomy has been attracting increased attention from systematists and evolutionary biologists. It is an area which has been marked by debate and conflict, sometimes bitter. Happily, this meeting took place in an atmosphere of "Gemütlichkeit", though scarcely of unanimity. I believe that these papers will show that there is an increased understanding by each taxonomic school of each others' positions. This augurs a period in which the debates become more concrete and specific. Let us hope that they take place in a scientific atmosphere which has occasionally been lacking in the past. Since the order of presentation of papers in the meeting was affected by time constraints, I have taken the liberty of rearranging them into a more coherent subject ordering. The first group of papers, taken from the opening and closing days of the meeting, debate philosophies of classification. The next two sections have papers on congruence, clustering and ordination. A notable concern of these participants is the comparison and testing of classifications. This has been missing from many previous discussions of numerical classification.

La statistique en clair Rowman & Littlefield

This text underlines the importance for scholars to have at their disposal reliable scientific text editions of Aristotle's works in the Semitico-Latin, and the Graeco-Latin, translation and commentary traditions.
