The theme of leadership  
in this publication is  
related to the role of  
governments and  
international institutions  
in protecting the well

being of children. It is in  
three sections; the first  
"birth and broken  
promises", contrasts the  
reality of the life of a child  
born eleven years ago  
with the promises made  
at the World Summit for  
Children, held in New York  
in 1990. The section, "to  
change the world with  
children", looks at the way  
UNICEF has called

attention to the plight of  
children. The last section,  
"actions that can change  
the world", concludes that  
investing in children is the  
best investment a country  
can make and that no  
country has made a leap  
to sustainable  
development without  
investing significantly in  
its children.

NATIONAL BESTSELLER • "In this highly opinionated and highly readable history, Kurlansky makes a case for why 1968 has lasting relevance in the United States and around the world."—Dan Rather To some, 1968 was the year of sex, drugs, and rock and roll. Yet it was also the year of the Martin Luther King, Jr., and Bobby Kennedy assassinations; the riots at the Democratic National Convention in Chicago; Prague Spring;

the antiwar movement and the Tet Offensive; Black Power; the generation gap; avant-garde theater; the upsurge of the women's movement; and the beginning of the end for the Soviet Union. In this monumental book, Mark Kurlansky brings to teeming life the cultural and political history of that pivotal year, when television's influence on global events first became apparent, and spontaneous uprisings occurred simultaneously around the world.

Encompassing the diverse realms of youth and music, politics and war, economics and the media, 1968 shows how twelve volatile months transformed who we were as a people—and led us to where we are today.

From the Pulitzer Prize-winning author of *Night Watch*: the reputation-making debut short story collection that paved the way for a new generation of writers. • “Brilliant ... Phillips is a virtuoso.”  
—The Chicago Tribune

Jayne Anne Phillips's reputation-making debut collection paved the way for a new generation of writers. Raved about by reviewers and embraced by the likes of Raymond Carver, Frank Conroy, Annie Dillard, and Nadine Gordimer, *Black Tickets* now stands as a classic. With an uncanny ability to depict the lives of men and women who rarely register in our literature, Phillips writes stories that lay bare their suffering and joy. Here are the abused and the abandoned, the violent

and the passive, the impoverished and the disenfranchised who populate the small towns and rural byways of the country. A patron of the arts reserves his fondest feeling for the one man who wants it least. A stripper, the daughter of a witch, escapes from poverty into another kind of violence. A young girl during the Depression is caught between the love of her crazy father and the no less powerful love of her sorrowful mother. These are great American stories that have earned a

privileged place in our literature.

This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann, Ph.D. He traces LSD's path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. In *LSD: My Problem Child*, we follow Dr. Hofmann's trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other

notable figures about his remarkable discovery. Underlying it all is Dr. Hofmann's powerful conclusion that mystical experiences may be our planet's best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend "the wonder, the mystery of the divine, in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people." More than sixty years after the birth

of Albert Hofmann's problem child, his vision of its true potential is more relevant, and more needed, than ever.

As public education declined and many Americans despaired of their children's future, Pulitzer Prize-winning journalist Jonathan Freedman volunteered as a writing mentor in some of California's toughest innercity schools. He discovered a program called AVID that gave him hope. In this work of

creative non-fiction, Mr. Freedman interweaves the lives of AVID's founder, Mary Catherine Swanson, and six of her original AVID students over a 20-year period, from 1980 to 2000. With powerful personalities, explosive conflicts, and compelling action, *Wall of Fame* portrays the dramatic story of how one teacher in one classroom created a pragmatic program that has propelled thousands of students to college. This story of determination, courage, and hope

inspires a new generation of teachers, students, and parents to fight for change from the bottom up.

The original woodcuts from the Cologne Bible (1479) taught Bible stories soon after printing began, and, at the same time, became favorites for coloring. The Creation of Eve, Cain and Abel, Noah's Ark, The Tower of Babel, Abraham and Isaac, and Moses and the Burning Bush are only a

few of the 46 stories depicted in this collection.

*Debate* Multidisciplinary Association for Psychedelic Studies Publishers Weekly bestseller · A joyful and accessible homeschool guide to making learning a part of everyday life Parents who are deeply invested in their children's education can be hard on themselves and their kids. When exhausted parents are living the day-to-day grind, it can seem impossible to muster enough energy to make learning fun or interesting. How do parents nurture a love of

learning amid childhood chaos, parental self-doubt, the flu, and state academic standards? In this book, Julie Bogart distills decades of experience-- homeschooling her five now grown children, developing curricula, and training homeschooling families around the world--to show parents how to make education an exciting, even enchanting, experience for their kids, whether they're in elementary or high school. Enchantment is about ease, not striving.

Bogart shows parents how to make room for surprise, mystery, risk, and adventure in their family's routine, so they can create an environment that naturally moves learning forward. If a child wants to pick up a new hobby or explore a subject area that the parent knows little about, it's easy to simply say "no" to end the discussion and the parental discomfort, while dousing their child's curious spark. Bogart gently invites parents to model brave learning for

their kids so they, too, can approach life with curiosity, joy, and the courage to take learning risks.

"Is this right? Is this how it's supposed to look?" Adolescent writers often ask these kinds of questions because traditional grammar instruction focuses too much on what's right or what's wrong. The fear of making a mistake hides the true power of conventions - the creation of meaning, purpose, and

effect, the ultimate reading-writing connection. Join Jeff Anderson, with Travis Leech and Melinda Clark, as they explore grammar in a new way in *Patterns of Power: Inviting Adolescent Writers into the Conventions of Language, Grades 6-8*. Let's lift middle school writers by focusing on possibility and producing effective writing that will transfer to the classroom and beyond. Inside *Patterns of Power, Grades 6-8*, teachers will find a quick yet comprehensive

explanation of the invitational process--the easy-to-follow, brain-based process created to invite adolescent writers to learn about and apply conventions of the English language through the celebration of author's purpose and craft. This process is the foundation on which 55 authentic, flexible, and effective lesson sets were built. Through practical guidance and ready-to-use lessons, you'll be fully equipped to teach grammar in an engaging and authentic way in just

10 minutes a day. Inside you'll find: 55 standards-aligned lesson sets that include excerpts from high-interest, authentic, and diverse young adult and middle grade mentor texts Real-life classroom examples and tips gleaned from the authors' work facilitating the Patterns-of-Power process in hundreds of classrooms Resources to use in classroom instruction or as handouts for student literacy notebooks With hundreds of teach-tomorrow visuals and implementation supports

that include quick-reference guides as well as soundtrack lists to infuse the joy of music into grammar instruction, Patterns of Power, Grades 6-8 gives you everything you need to inspire your adolescent writers to move beyond limitation and into the endless possibilities of what they can do as writers. [LSD, My Problem Child](#) Createspace Independent Publishing Platform An examination of young people's everyday new media practices—including

video-game playing, text-messaging, digital media production, and social media use. Conventional wisdom about young people's use of digital technology often equates generational identity with technology identity: today's teens seem constantly plugged in to video games, social networking sites, and text messaging. Yet there is little actual research that investigates the intricate dynamics of youths' social and recreational use of digital media. Hanging Out, Messing Around, and

Geeking Out fills this gap, reporting on an ambitious three-year ethnographic investigation into how young people are living and learning with new media in varied settings—at home, in after-school programs, and in online spaces. Integrating twenty-three case studies—which include Harry Potter podcasting, video-game playing, music sharing, and online romantic breakups—in a unique collaborative authorship style, Hanging Out, Messing Around, and

Geeking Out is distinctive for its combination of in-depth description of specific group dynamics with conceptual analysis. Illustrated Bible Stories Houghton Mifflin Harcourt Although rarely explored in academic literature, most inhabitants and visitors interact with an urban landscape on a day-to-day basis is on the street level. Storefronts, first floor apartments, and sidewalks are the most immediate and common experience of a city. These "plinths" are the ground floors that

negotiate between inside and outside, the public and private spheres. The *City at Eye Level* qualitatively evaluates plinths by exploring specific examples from all over the world. Over twenty-five experts investigate the design, land use, and road and foot traffic in rigorously researched essays, case studies, and interviews. These pieces are supplemented by over two hundred beautiful color images and engage not only with issues in design, but also the

concerns of urban communities. The editors have put together a comprehensive guide for anyone concerned with improving or building plinths, including planners, building owners, property and shop managers, designers, and architects.

*Child Migration in Africa* explores the mobility of children without their parents within West Africa. Drawing on the experiences of children from rural Burkina Faso and Ghana, the book provides rich material on the circumstances of children's voluntary migration and their experiences of it. Their accounts challenge the normative ideals of what a 'good' childhood is, which often underlie public debates about children's migration, education and work in developing

countries. The comparative study of Burkina Faso and Ghana highlights that social networks operate in ways that can be both enabling and constraining for young migrants, as can cultural views on age- and gender-appropriate behaviour. The book questions easily made assumptions regarding children's experiences when migrating independently of their parents and contributes to analytical and cross-cultural understandings of childhood. Part of the

groundbreaking Africa Now series, *Child Migration in Africa* is an important and timely contribution to an under-researched area.

NATIONAL BESTSELLER • At once an incredible adventure narrative and a penetrating biographical portrait—the bestselling author of *River of the Gods* brings us the true story of Theodore Roosevelt's harrowing exploration of one of the most dangerous rivers on earth. "A rich, dramatic tale that ranges from the personal to the literally earth-shaking." —The

New York Times The River of Doubt—it is a black, uncharted tributary of the Amazon that snakes through one of the most treacherous jungles in the world. Indians armed with poison-tipped arrows haunt its shadows; piranhas glide through its waters; boulder-strewn rapids turn the river into a roiling cauldron. After his humiliating election defeat in 1912, Roosevelt set his sights on the most punishing physical challenge he could find, the first descent of an unmapped, rapids-choked

tributary of the Amazon. Together with his son Kermit and Brazil's most famous explorer, Cândido Mariano da Silva Rondon, Roosevelt accomplished a feat so great that many at the time refused to believe it. In the process, he changed the map of the western hemisphere forever. Along the way, Roosevelt and his men faced an unbelievable series of hardships, losing their canoes and supplies to punishing whitewater rapids, and enduring starvation, Indian attack, disease, drowning, and a

murder within their own ranks. Three men died, and Roosevelt was brought to the brink of suicide. The River of Doubt brings alive these extraordinary events in a powerful nonfiction narrative thriller that happens to feature one of the most famous Americans who ever lived. From the soaring beauty of the Amazon rain forest to the darkest night of Theodore Roosevelt's life, here is Candice Millard's dazzling debut.
