Advances in Enzymology and Related Areas of Molecular Biology is a seminal series in the field of biochemistry, offering researchers access to authoritative reviews of the latest discoveries in all areas of enzymology and molecular biology. These landmark volumes date back to 1941, providing an unrivaled view of the historical development of enzymology. The series offers researchers the latest understanding of enzymes, their mechanisms, reactions and evolution, roles in complex biological process, and their application in both the laboratory and industry. Each volume in the series features contributions by leading pioneers and investigators in the field from around the world. All articles are carefully edited to ensure thoroughness, quality, and readability. With its wide range of topics and long historical pedigree, *Advances in Enzymology and Related Areas of Molecular Biology* can be used not only by students and researchers in molecular biology, biochemistry, and enzymology, but also by any scientist interested in the discovery of an enzyme, its properties, and its applications.

The 16th ICSMGE responds to the needs of the engineering and construction community, promoting dialog and exchange between academia and practice in various aspects of soil mechanics and geotechnical engineering. This is reflected in the central theme of the conference 'Geotechnology in Harmony with the Global Environment'. The proceedings of the conference are of great interest for geo-engineers and researchers in soil mechanics and geotechnical engineering. Volume 1 contains 5 plenary session lectures, the Terzaghi Oration, Heritage Lecture, and 3 papers presented in the major project session. Volumes 2, 3, and 4 contain papers with the following topics: Soil mechanics in general; Infrastructure and mobility; Environmental issues of geotechnical engineering; Enhancing natural disaster reduction systems; Professional practice and education. Volume 5 contains the report of practitioner/academic forum, 20 general reports, a summary of the sessions and workshops held during the conference.

"Correspondence and Report from His Majesty's Consul at Boma Respecting the Administration of the Independent State of the Congo" by Roger Casement is a historically significant document that sheds light on the atrocities and abuses committed during the colonial administration of the Congo Free State. Casement's correspondence and report expose the brutal exploitation of the Congolese people under the rule of King Leopold II of Belgium. This powerful work played a crucial role in raising international awareness of the humanitarian crisis in the Congo and contributed to efforts to reform colonial practices. It remains an essential historical document that underscores the importance of human rights and justice.

"Mistress Branican" is a novel written by the French author Jules Verne, first published in 1891. This adventure novel is set in the maritime world and revolves around the character of John Branican, a sailor who embarks on a mission to find his missing wife, Mistress Branican, who disappeared in mysterious circumstances. The story takes place in the South Seas, and it combines elements of exploration, love, and intrigue. As John Branican searches for his wife, he encounters various challenges, including navigating treacherous waters, facing natural disasters, and dealing with hostile natives. The novel also explores the theme of perseverance and the strength of human bonds. While "Mistress Branican" is not as well-known as some of Jules Verne's other works, it still reflects his signature style of combining adventure, travel, and exploration in a captivating narrative.

This collection contains a selection of papers presented at the very First All-European Canadian Studies Conference that took place in The Hague, October 24-27, 1990. This unique meeting took place for the first time in the history of Canadian Studies. The focus of the papers is on the future rather than the past and it took place at a moment in time when Canada went through major crises that raised serious doubts about the country's future. The papers of this volume explore the main issues and problems that Canada faces. The volume contains sections on demography, environmental problems, economic transformations, Canadian identity, political power structure, aboriginal issues and Canada's international relations. As a whole the book takes stock where Canada stands and where it is going.

Forms of Control and Subordination in Antiquity John Benjamins Publishing

The papers in this volume are contributed by leading historians, art historians and archaeologists and focus on 5 key themes: the evolution of settlement patterns in the Byzantine empire; the impact of barbarian elites in Spain, Gaul, Italy and Pannonia; the role of the Church in the definition of new links between town and territories; the situation in culturally homogenous territories such as Constantinople and the minor Langbard polities; the situation in economically defined territories. Contributions include papers by Gian Pietro Brogiolo, Pablo C. Díaz, Michel Fixot, Gisela Ripoll and Javier Arce, Sauro Gelichi, Wolfram Brandes and John Haldon, Nancy Gauthier, Gisella Cantino Wataghin, Ross Balzaretti, Martina Caroli, Neil Christie, Bryan Ward-Perkins and John Mitchell.
