**Fresh from the Farm 6pk** Canongate Books

After being away for a year, Aphrodite is anxious to be back home. She thought she'd be able to share her experience in London with her best friend via phone. But she never received a single response from Adonis while she was gone. Finally back and able to confront him, things don't go quite the way she planned. Everything

about the person she grew up with is completely different and just like everyone else, it was hard for Aphrodite to resist Adonis' new persona. They tried hard to start their friendship over and continue being best friends. Although they were able to, unexpected sparks flew between them. Before anything could continue for them, Adonis has a deep, dark secret to confess to Aphrodite. Will she be able to accept Adonis' new lifestyle?

AC Heritage Motorbooks International  
'Not tonight, darling, I've got a headache...' An estimated one in three

couples suffer from problems associated with one partner having a higher libido than the other. Marriage therapist Michele Weiner Davis has written *THE SEX-STARVED MARRIAGE* to help couples come to terms with this problem. Weiner Davis shows you how to address psychological factors like depression, poor body image and communication problems that affect sexual desire. With separate chapters for the spouse that's ready for action and the spouse that's ready for sleep, *THE SEX-STARVED MARRIAGE* will help you re-spark your passion and stop you fighting about

sex. Weiner Davis is renowned for her straight-talking style and here she puts it to great use to let you know you're not alone in having marital sex problems. Bitterness or complacency about ho-hum sex can ruin a marriage, breaking the emotional tie of good sex.

*Ghia* Motorbooks International

Launched in 1955 yet looking like a sci-fi design proposal for a future then undreamed of, Flaminio Bertoni's ellipsoid sculpture with wheels that was the Citroën DS stunned the world. There was a near riot at the 1955 Paris Motor Show launch of the car, orders flooded in for this, the new 'big Citroën' (a Voiture a Grande Diffusion or VGD) as the car that replaced the legendary Traction Avant range. The term 'DS' stems from two Citroën parts of nomenclature - the type of engine used as the 11D, (D) and the special hemispherical design of the cylinder head as 'Culasse Special' (S): DS out of 'Deesse' or Goddess, was a more popular myth of 'DS' origination, but an erroneous one. But it was not just the car's aerodynamically advanced body shape (Cd. 0.37) that framed the genius of the DS: hydro pneumatic self-levelling suspension,

advanced plastics and synthetics for the construction of the roof and dashboard/fascia, and amazing road holding and cabin comfort were some of this car's highlights. Only the lack of an advanced new engine was deemed a missed opportunity. In fact Citroën had created a new engine for the car but lacked the resources to produce it in time for 1955. DS was a major moment in the history of car design, one so advanced that it would take other auto manufacturers years to embrace. Yet DS in its 'aero' design was the precursor to today's low drag cars of curved form. Manufactured worldwide, used by presidents, leaders, diplomats, farmers and many types of people, the DS redefined Citroën, its engineering and design language, and its brand, for decades to come. Prone to rust, not the safest car in the world, and always lacking a smoother powerplant, the DS still became an icon of car design. Reshaped with a new nose and faired-in headlamps in 1967, DS remained in production until 1975. Across its life DS spawned an estate car variant as the 'Safari', a range of limousines, two-door convertibles, and

even coach-built coupes and rally specials. This car was a product design that became an article of social science - it was that famous and it defined a European design movement upon a global stage then packed with 'me too' copyist designs. The DS or 'Goddess' as it was tagged, was a tear-drop shaped act of French confidence in a world of the regurgitation of the known. Some argue that DS and its effect has never been surpassed. This new value-for-money book provides innovative access to the design, history, and modeling of the revolutionary DS - one of the true 'greats' of motoring history and, a contemporary classic car of huge popularity.

*The British National Bibliography* Osprey Publishing

This is the fascinating story of how the Citroen SM came into being, with company politics and Maserati's involvement covered in detail. The text and pictures then follow the car's progress from its world premier at the 1970 Geneva Show until the final production models were built in July 1975. With 200 mainly color photos, full coverage of production models and a buyers guide this book is the complete

Citroen SM resource.

*Original MGB* Osprey Publishing (UK)

Open wide! Dentists care for people's teeth. Give readers the inside scoop on what it's like to be a dentist. Readers will learn what dentists do, the tools they use, and how people get this exciting job.

Citroen DS BlueRose Publishers

When the final list for the Car of the Century competition was announced in November 1999, only one company had three finalists: Automobiles Citroën. All three models—the Traction Avant, the 2CV and the DS 19—were developed during the era when the company was owned by the Société Michelin (Michelin Tire Company). All three were created by the engineer André Lefèbvre and the stylist Flaminio Bertoni. This industry recognition highlighted the unique Citroën-Michelin affiliation, demonstrating anew how this relationship made the automaker the benchmark for progressive design and creative engineering within both the international automotive community and the general motoring public. This work provides the first in-depth examination of the Citroën-Michelin era, focusing on the interrelationship between these firms in

the development of the revolutionary Michelin X radial tire and its impact on Citroën's avant-garde automobiles. From its origins in 1919 under the watchful eye of André Citroën, a history of the automaker's early years is provided. Next, the author takes a detailed look at the cars of the golden age of Citroën: the Traction Avant, the 2CV, the DS/ID, the GS/GSA, the CX, and the Citroën-Maserati SM. The innovations, the unique designs, and the new standards of technical excellence that these cars offered are all fully covered, heavily illustrated with rare photographs of the classic automobiles. Journey to the Hebrides Crowood Press UK Launched in 1970 it used the underpinnings from the DS, which meant it had self-leveling hydro-pneumatic suspension, power brakes and good steering. Maserati produced a 170bhp, quad-cam V6 engine. Coupled with a stylish fastback bodyshell it should have been a good car. But v the engine was complicated and it was inclined to rust. When Peugeot took over Citroen they sold off Maserati and ceased production of the SM. A good car now is sought after and owners cannot praise them highly enough.

This is a book of contemporary road and comparison tests, technical and specification data, new model introductions, driver's impressions & buyer's guide.

Everyday Modifications for Your MGB, GT and GTV8 Pebble

Describes, in plain English, the findings of a research programme into modern petrol/gasoline and its effects on classic engines. The book includes practical descriptions of how a spark-ignition engine works, and how it can be tuned to avoid common problems.

Ford in Miniature Veloce Publishing Ltd

Even those MGB owners with no previous electrical knowledge or skills will find this book invaluable. Its step by step introduction to basic car electrical theory and its explanation of how each MGB system works, the clear and simple colour diagrams and easy fault finding guides will make everyone and expert.

*An Introduction to Modern Vehicle Design* Crowood

Samuel Johnson and James Boswell spent the autumn of 1773 touring the Highlands and Western Islands of Scotland. Both kept detailed notes of their impressions, and

later published separate accounts of their journey. These accounts of their great tour contain some of the finest pieces of travel writing ever produced: they are magnificent historical documents and also portraits of two extraordinary personalities. In the vivid prose of these two famous men of letters, the Highlands and the Western Islands spring to life. The juxtaposition of the two very different accounts creates an unsurpassed portrait of a society which was utterly alien to the Europe of the Enlightenment, and which was straining on the brink of calamitous change. These great masterpieces, entertaining, profound, and marvellously readable are also our last chronicles of a lost age and people.

MGB Restoration Manual Motorbooks International

A roadtest compilation on the Citroen ID, Citroen DS and Citroen Safari by Unique Motor Books.

**Car and Driver** Veloce Publishing

An Introduction to Modern Vehicle Design starts from basic principles and builds up analysis procedures for all major aspects of vehicle and component design. Subjects of current interest to the motor industry -

such as failure prevention, designing with modern material, ergonomics, and control systems - are covered in detail, with a final chapter discussing future trends in automotive design. Extensive use of illustrations, examples, and case studies provides the reader with a thorough understanding of design issues and analysis methods.

Dentists Simon & Schuster

Ferrari is perhaps the best-known marque in the world of the sports car and is a symbol of speed and beauty. 1997 marks the 50th anniversary of this landmark Italian car manufacturer, a year that will see not only the launch of the new front engine V-12 F550 but carries the promise of the long-awaited return to the championship ranks of Formula One racing. Fifty Years of Ferrari celebrates the golden anniversary with a year-by-year compilation of the most famous cars, from the early open-wheeled racers to the latest road-going supercars. This book is a value for anyone who has ever dreamed of driving a Ferrari.

*The Classic Citroëns, 1935-1975* Anchor Books

This volume traces the history of the

Citroen DS, a car which was both revolutionary and highly popular, startling motoring journalists of the time with its dramatically streamlined body and remarkable hydro-pneumatic self-levelling suspension. It takes a visual tour around surviving examples of the widely-differing models produced, from the basic ID to the luxurious Pallas.

*Rover 3 & 3.5 Litre Masterpieces of Style*

The immensely popular MGB sports cars are described here in full detail, accompanied by carefully selected color photographs. Fully documents all four-cylinder MGB models made from 1962 to 1980, six-cylinder MGCs from 1967-69, and MGB GTV8 models 1973-76. Provides owners, enthusiasts, and potential buyers with valuable information on exactly what is 100% authentic for every model and year. Includes detailed production figures.

*Austin Healey* Brooklands Books Limited  
An invaluable book that sheds light on a relatively unknown but lengthy chapter in the history of design, This is the story of Ghia of Turin, a company active from the 1920s. The firm was responsible for some of the most important models in automotive history, frequently

distinguished by daring and trend-setting styling. Tracing the history of Ghia brings to light models of particularly evocative appeal, such as the Fiat 508 Sport Spider (1934), various Alfa Romeo 6C 2500s and the 1900 SS Abarth (1954), not to mention a number of unusual Ferraris from the same decade. A decade that was of fundamental importance to Ghia that, one after the other, produced a series of opulent cars inspired by the styling canons in vogue in the United States in that period, but also styling exercises such as the Volkswagen Karmann Ghia (1955). The Sixties were no less prolific, with further "classics" such as the Fiat 2300 S (1960), the De Tomaso Mangusta and Pantera (1966 and 1970) and the immortal Ghibli from 1966. As was the case for other Italian coachbuilders, there followed a period of crisis that saw the Ghia marque change hands on a number of occasions before being acquired by Ford.

*Citroen Sm 1970-1975* David and Charles Available again after a long absence, this book tells the story of the most radical of Citroën's idiosyncratic offerings: the DS. The car was sensational when it was introduced in 1955; twenty years and 1.45

million cars later it was still technically advanced in relation to most other cars. Revolutionary in driving characteristics and comfort, it remains one of the most innovative cars of all time. In this book, Malcolm Bobbitt, a well-known motoring author and DS owner, gives an in-depth guide to the Citroën DS - its history, design, and specifications, as well as valuable advice for buyers and owners. This long overdue revised edition contains much new and updated information.

**Time and Two Seats** David and Charles This revised edition has been updated to include an additional 36 pages, plus some superb color images. The book has also been upgraded to Gold Portfolio stature. You will find 43 articles, sourced from Autocar, Car and Driver, Car Craft, Car Life, Car South Africa, Cars, Classic American, Hot Rod, Motor Trend, Motorcade, Road & Track and Road Test, featuring reviews of these cars as they were driven and tested for the first time. Perfect for the muscle car enthusiast's collection on these classic cars.

Vehicle Body Engineering Elsevier The Citroën SM arrived at the dawn of the 1970s and made its debut at the Geneva

Motor Show in 1970. It was the star of the Paris Motor Show in October 1970 and Motor Trend's car of the year in 1972, ahead of the Porsche 911S and BMW Bavaria. A V-6 engine from via Maserati, which Citroën had recently bought: "SM" meaning "Maserati System." It was a dream car, too far ahead of its time, it's the best definition of the Citroën SM. Consider as one of the best cars ever created under the Citroën seal. This book revives the SM one of the last French grand touring cars, the culmination of an evolution begun with the continued traction with the DS and completed thanks to the use of MASERATI mechanics a masterpiece of Citroën.

Citroen DS Pen and Sword Military

The books in the Everyday Modifications series from Crowood are designed to guide classic car owners through the workshop skills needed to make their cars easier to use and enjoy. MG expert Roger Parker gives his advice on maintaining and modifying MGB, GT and GTV8 cars, with some additional reference to the MGC and MG RV8 models. With safety information throughout, the book covers: regulations, insurance and market value for all models;

routine maintenance; body and interior changes; brakes, suspension and steering; engine improvements for the original 1798cc B-series engine and other engine

alternatives and finally, installing and updating electrical equipment and lighting. A practical and instructional new

guide to classic car modifications and maintenance for MG enthusiasts, illustrated with over 350 colour photographs and case studies.
