Law* Springer
Any organization, no
matter how stolid, may be
unsettled by the news

that a new boss is about to take over. Talk in the hallways increases, staff worry about their jobs, uncertainty grows. Even when the change has happened, problems emerge when the boss who was hired to manage “from above” has to learn about the organization “from below.” In this book, Niklas Luhmann scrutinizes the relationship and shows how it is stretched to its limit by communication difficulties, demands for self-presentation, and disagreements concerning

fundamental values. Many of the tensions crystallize around the question “who has the power?” It isn’t necessarily the boss, provided the employees are well versed in the art of directing their superiors. “Subtersion” is Luhmann’s term for this state of affairs, and tact is the most important means to this end. Yet caution is advised: whoever achieves mastery in subtersion may well become the new boss. This slim and thought-provoking book from one of the most

influential sociologists of the twentieth century will be of great interest to anyone seeking to understand the dynamics and machinations of the workplace.

Offering a doctrinal analysis of the EU's trade policy, this volume examines the provisions of a generation of new trade agreements in the broader context of EU foreign policy objectives. *Autonomous Systems and the Law* BWV Verlag
The Conflict of Laws in

Intellectual Property (CLIP) Principles set out rules to resolve international disputes involving intellectual property rights, supplementing international and domestic law, as well as aiding lawyers to interpret the same. This work sets out the Principles alongside article-by-article analysis from authors of the Principles.

State of War Oxford University Press

This book analyses corporate boards; their regulation in law and

codes, and their actual operation in ten European countries in a functional and comparative method. Issues addressed include: board structure, composition and functioning, enforcement by liability rules, incentive structures and shareholder activism.

Gesprächs-Check. Taylor & Francis

Hauptbeschreibung This small book is a product of a seminar organised by the Koc University Law School, Dr. N©osret-Semahat Arsel Research Center of International

Business Law and the Max Planck Institute for Comparative and International Private Law, Hamburg held in Istanbul on some legal issues of South Eastern European countries. Several scholars from five South Eastern European nations and Germany came together in March 2007 to discuss the basic legal structure on distribution of justice and contract law in their respective legal systems. The aim of the conference was the presentation and co.

The break-up of BAA and the blocked takeover of Bratislava airport by the competing Vienna airport have brought the issue of airport competition to the top of the agenda for air transport policy in Europe. Airport Competition reviews the current state of the debate and asks whether airport competition is strong enough to effectively limit market power. It provides evidence on how travellers chose an airport, thereby altering

its competitive position, and on how airports compete in different regions and markets. The book also discusses the main policy implications of mergers and subsidies. *Structures of Civil and Procedural Law in Kluwer Law International B.V.* Collecting together 47 essays from colleagues and friends of Lord Rodger of Earlsferry, this book commemorates his work and contribution to law and legal scholarship, including his role as a judge of the UK Supreme Court and his interests in

Roman law, Scots law, and legal history.

Genome Editing

Techniques are seen to be at the frontier of current research in the field of emerging biotechnologies. The latest revolutionary development, the so-called CRISPR technology, represents a paradigmatic example of the ambiguity of such techniques and has resulted in an international interdisciplinary debate on whether or not it is necessary to ban the

application of this technique by means of a moratorium on its use for human germline modifications, particularly in human embryos in the reproduction process. However, given that other germline engineering techniques like mitochondrial (mt) DNA transfer techniques are already permitted and applied, the question arises what lies at the root of the apparent social unease about the modification of the human germline by Genome Editing Techniques like

CRISPR. Against this background, the book seeks to make a substantial contribution to the current debate about a responsible and participatory framework for research on emerging biotechnologies by analysing underlying perceptions, attitudes, arguments and the reasoning on Genome Editing Techniques. *Bürgerliches Gesetzbuch* OUP Oxford This work focuses on a specific aspect of the enforcement of maritime claims, namely judicial

sales of ships, a procedure creditors typically resort to in the event of an irreversible default situation. A substantial part of the book approaches the topic from a comparative perspective, the goal being to assess the similarities and differences of the judicial sale procedure between three specific jurisdictions: Belgium, the Netherlands, and England & Wales. In this study, the comparison is used to further analyse the impacts of these

differences on the effectiveness and reliability of the judicial sale procedure in each jurisdiction and also forms the basis for assessing the feasibility of harmonising judicial sale procedures and fostering their acceptance. Considering the international character typical of judicial sales of ships, conflict-of-law questions are very likely to arise during these procedures. Accordingly, the comparative study, where appropriate, is viewed against a private

international law background.
Judge and Jurist Springer

 The European Commission's recent green paper on damages actions for breach of EC antitrust rules stirred a debate across Europe on the need for legal reform that would encourage private plaintiffs to claim compensation for losses suffered as a result of anticompetitive conduct. Prominent in the wake of that initiative was the international conference convened by the Max

Planck Institute for Comparative and International Private Law in Hamburg in April 2006, the papers and proceedings of which are presented in this important book. Among the topics and issues raised and discussed here are the following: the 2001 *Courage* judgment of the European Court of Justice, in which the court decided that everyone who suffers losses from a violation of arts. 81 or 82 EC is entitled to compensation; relevance of the case law that

contributes to general principles of European tort law; comparative analysis from the more comprehensive experience of national laws in the United States, Germany, France, and Italy; calculation of damages; passing-on of losses sustained in an upstream market to customers in a downstream market; procedural devices which may help to overcome the lack of implementation; duties of disclosure and the burden of proof; collective actions that

may help to overcome the rational abstention of individuals; pitfalls of leniency programmes implemented by national competition authorities; and, issues of jurisdiction and choice of law. The lively debates that followed the presentations at the conference are also recorded here. Although more discussion will be needed before a viable legal framework in this area begins to emerge, these ground-breaking contributions by lawyers of various disciplines, jurists, economists,

academics, and European policymakers take a giant step forward. For lawyers, academics, and officials engaged with this important area of international law, this book clearly improves our understanding of the economic need and legal particularities which could generate an effective European system of private antitrust litigation. *Challenging Conflict* Mohr Siebeck
The volume traces back to a symposium held at the Max Planck Institute for Comparative and

International Private Law in Hamburg and offers a broad comparative analysis of company and capital markets law in Germany and the Nordic states. It details the special elements of company law in Scandinavia that developed amid the twin forces of innovative experimentation and the drive for harmonization, contrasting them with the distinctive features of German company law. Further contributions deal with the newly created entrepreneur company in

Germany and Denmark, as well as the role of shareholders and boards in public companies. It also contains detailed analyses of the law of company groups in Germany and the Nordic states. the volume is further rounded out with contributions on capital markets law and takeover law, including issues involving acting in concert, ownership disclosure and the interaction between the legislator and the takeover panel in Sweden. C.H.Beck
 The idea of national codification is advancing on a global scale in conflict of laws. A large

number of legislative projects dealing with codifying and modernizing private international law, both on the national and the supranational level, have been launched in the past few years. Among such recent initiatives, the advances taken by the European and the Japanese legislators are particularly reflecting these developments. On January 1, 2007, the new Japanese 'Act on General Rules for Application of Laws' entered into force replacing the outdated

conflict of laws statute of 1898. This major reform finds its parallels in the current efforts of the European Union to create a modern private international law regime for its member states. This volume presents the first comprehensive analysis of the new Japanese private international law available in any western language and contrasts it with corresponding European developments. Most of the contributors from Japan are scholars who were actively involved in and responsible for

preparing the new Act. All of them are renowned experts in the field of private international law. Leading European experts in the conflict of laws supplement the Japanese analyses with comparative contributions reflecting the pertinent discussion of parallel endeavours in the EU. To guarantee better understanding, English translations of both the present and the former Japanese statutes have been added.

Inhaltsangabe: Einleitung: „Sage mir, wie Du mit Deinen Mitarbeitern sprichst und ich sage Dir, was Du von Deinen Mitarbeitern zu erwarten hast!“ Durch die vorliegende Projektarbeit wurde das fachtheoretische Thema „Mitarbeitergespräche“ praxisorientiert bearbeitet und ein Konzept zum Transfer in die Praxis der Versicherung ausgearbeitet. Als Basis dienen die Ergebnisse aus der separat erstellten Studienarbeit mit dem theoretischen Hintergrund

von Kommunikation und Gesprächsführung. Nachdem die Idee für diese Projektarbeit entstanden ist, wurde die Thematik mit verschiedenen Führungskräften aus großen Firmen und Institutionen der Region diskutiert. Nachdem viele positive Aussagen getroffen wurden, ist die Entscheidung zur Konzeption eines regelmäßigen, strukturierten Mitarbeitergespräches für die Versicherung gefallen. Ziel dieser Projektarbeit

ist es, durch die konsequente und durchgängige Umsetzung des konzipierten Mitarbeitergespräches, die Kommunikationsprozesse zwischen Führungskräften und Mitarbeitern in der Versicherung zu optimieren. Aufgrund der Größe des Unternehmens kann ein solches Konzept nicht sofort flächendeckend implementiert werden. Zunächst ist es erforderlich, in einem Pilotbereich Erfahrungen zu sammeln. Aus diesem

Grund wurde das vorliegende Konzept mit den Mitarbeitern im Firmenkundenbereich getestet. Die Umsetzung im gesamten Unternehmen benötigt eine längere Vorlaufzeit und wird im Anschluss an diese Projektarbeit geprüft. Die Projektarbeit enthält viele Empfehlungen und Vorschläge aus der einschlägigen Literatur, aber auch eigene Erfahrungen. Für viele Fragestellungen gibt es allerdings keine Patentrezepte und das ist

nach Meinung der Verfasserin auch gut so, denn jeder Mitarbeiter ist ein unverwechselbares Individuum mit seinem Denken, seinen Erfahrungen, seinen Charaktereigenschaften und vor allem seinen Gefühlen. Führung und Kommunikation lebt deshalb immer auch von Sensibilität, Intuition, Einfühlungsvermögen und Menschenkenntnis. Ich möchte mich bei den Personen bedanken, die mich bei meiner Projektarbeit in vielfältiger Weise unterstützt und

motiviert haben.

 Bloomsbury Publishing
 This is the leading reference on Japanese private international law

in English. The chapters systematically cover the whole of Japanese private international law, not just questions likely to arise in commercial matters, but also in family, succession, cross-border insolvency, intellectual property, competition (antitrust), and environmental disputes. The chapters do not merely cover the traditional conflict of law areas of jurisdiction, applicable law (choice of law), and enforcement. The chapters also look into conflict of law questions arising in

arbitration and assess Japanese involvement in the global harmonisation of private international law. In addition to summarising relevant principles and scholarly views, the authors discuss case law whenever possible and identify deficiencies and anticipate difficulties in the existing law. The book thus presents the Japanese conflict of laws through a combination of common and civil law analytical techniques and perspectives, providing readers worldwide with a

more profound and comprehensive understanding of the subject.

International Commercial

Mediation is a practical

guidebook that explains

how to handle and

complete a mediation, as

well as how to personally

market the skills

developed as a mediator.

The book provides

examples, supplies forms,

and explains procedures of actual working mediations which can be used to adapt to individual needs. It also deals with advanced practitioner issues and the emerging law on international mediation. *International Commercial Mediation* Simon and Schuster
The World Justice Project (WJP) joins efforts to produce reliable data on rule of law through the WJP Rule of Law Index 2016, the sixth report in an annual series, which measures rule of law

based on the experiences and perceptions of the general public and in-country experts worldwide. We hope this annual publication, anchored in actual experiences, will help identify strengths and weaknesses in each country under review and encourage policy choices that strengthen the rule of law. The WJP Rule of Law Index 2016 presents a portrait of the rule of law in each country by providing scores and rankings organized around eight factors:

constraints on government powers, absence of corruption, open government, fundamental rights, order and security, regulatory enforcement, civil justice, and criminal justice. A ninth factor, informal justice, is measured but not included in aggregated scores and rankings. These factors are intended to reflect how people experience rule of law in everyday life. The country scores and rankings for the WJP Rule of Law Index 2016 are derived from more

than 110,000 households and 2,700 expert surveys in 113 countries and jurisdictions. The Index is the world's most comprehensive data set of its kind and the only to rely solely on primary data, measuring a nation's adherence to the rule of law from the perspective of how ordinary people experience it. These features make the Index a powerful tool that can help identify strengths and weaknesses in each country, and help to inform policy debates,

both within and across countries, that advance the rule of law.

Gesprächs-Check

The book provides rule-by-rule commentaries on European contract law (general contract law, consumer contract law, the law of sale and related services), dealing with its modern manifestations as well as its historical and comparative foundations. After the collapse of the European Commission's plans to codify European contract law it is timely to reflect on what has been

achieved over the past three to four decades, and for an assessment of the current situation. In particular, the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law. The present book adopts a broad perspective and an integrative approach. All relevant reference texts (from the CISG to the Draft Common European Sales Law) are critically examined and compared with each

other. As far as the *acquis commun* (ie the traditional private law as laid down in the national codifications) is concerned, the Principles of European Contract Law have been chosen as a point of departure. The rules contained in that document have, however, been complemented with some chapters, sections, and individual provisions drawn from other sources, primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract

law. In addition, the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background; and it thus investigates whether, and to what extent, these texts can be taken to be genuinely European in nature, ie to constitute a manifestation of a common core of European contract law. Where this is not the case, the question is asked whether, and for what reasons, they should be seen as points of departure for the further

development of European contract law.

The New Boss

With relentless media coverage, breathtaking events, and extraordinary congressional and independent investigations, it is hard to believe that we still might not know some of the most significant facts about the presidency of George W. Bush. Yet beneath the surface events of the Bush presidency lies a secret history -- a series of hidden events that makes a mockery of current

debate. This hidden history involves domestic spying, abuses of power, and outrageous operations. It includes a CIA that became caught in a political cross fire that it could not withstand, and what it did to respond. It includes a Defense Department that made its own foreign policy, even against the wishes of the commander in chief. It features a president who created a sphere of deniability in which his top aides were briefed on matters of the utmost sensitivity -- but the

president was carefully kept in ignorance. State of War reveals this hidden history for the first time, including scandals that will redefine the Bush presidency. James Risen has covered national security for The New York Times for years. Based on extraordinary sources from top to bottom in Washington and around the world, drawn from dozens of interviews with key figures in the national security community, this book exposes an explosive chain of events: Contrary to law, and with

little oversight, the National Security Administration has been engaged in a massive domestic spying program. On such sensitive issues as the use of torture, the administration created a zone of deniability: the president's top advisors were briefed, but the president himself was not. The United States actually gave nuclear-bomb designs to Iran. The CIA had overwhelming evidence that Iraq had no nuclear weapons programs during the run-up to the Iraq war. They

kept that information to themselves and didn't tell the president. While the United States has refused to lift a finger, Afghanistan has become a narco-state, supplying 87 percent of the heroin sold on the global market. These are just a few of the stories told in State of War. Beyond these

shocking specifics, Risen describes troubling patterns: Truth-seekers within the CIA were fired or ignored. Long-standing rules were trampled. Assassination squads were trained; war crimes were proposed. Yet for all the aggressiveness of America's spies, a blind eye was turned toward crucial links between al

Qaeda and Saudi Arabia, among other sensitive topics. Not since the revelations of CIA and FBI abuses in the 1970s have so many scandals in the intelligence community come to light. More broadly, Risen's secret history shows how power really works in George W. Bush's presidency.
