 ?Something needs to be done about grammar.” Katz and Blyth have written this book with the hope of changing the way French instructors teach and conceive of grammar. Intended to help teachers and teacher trainers develop an understanding of French discourse that is grounded in recent theoretical and sociolinguistic research, this book is devoted to informing teachers-in-training, as well as

experienced teachers, about cutting-edge methods for teaching grammar. It also describes the grammatical features of the French language in its social context. At the same time, it provides suggestions for applying such abstract knowledge in practical pedagogical ways, for example, how to structure grammatical explanations, devise classroom activities, and take advantage of resources that give students greater exposure to French as it is truly

used in various discourse environments.

Cultural Awareness - Resource Books for Teachers

Oxford University Press

Educational linguistics is transcultural, with research in the field adopting an international scope. Educational systems, on the contrary, are culture-bound. As a consequence, actual teaching differs across

countries, and sometimes even among provinces, local educational authorities, and schools. However, a globalized world needs to share the various meanings of “knowing a language” and “teaching a language”, as language is the main factor of both cultural identity and national and international interaction. The framework offered here is built on eight “hypotheses”, logical models that provide the potential common core of a non-culture-bound theory of language

education and of language teaching. The book thus suggests a common terminology, some common principles, and a basic paradigm to be shared in both theoretical and practical research in educational linguistics, consequently going beyond the borders implied by such titles as European framework, American standards, and Chinese guidelines.
