Price Management Princeton University Press

This new collection of essays by West Germany's most distinguished Roman Catholic theologian covers the two broad areas indicated in the title. The first half discusses the Christian understanding of God; the place of Christianity in the modern world; the modern sense of freedom and history and the theological definition of human rights; christology and anthropology; and the possibilities of a new spiritual christology in a trinitarian setting. The second half discusses various aspects of the church: as universal sacrament of salvation; as the place of truth and as communion. Two final studies examine the continuing challenge of the Second Vatican Council and the fundamental form and meaning of the eucharist. An extended introduction considers systematic theology today and the tasks which confront it.

Mortality in Anaesthesia Oxford University Press

This volume explores the relationship between language and political power in the Age of Extremes. Topics include leadership cults under Stalin and Mussolini, depictions of enemies, secret diary-writing under Nazism, and the defence strategies of Soviet party members and Gestapo prisoners.

Political Languages in the Age of Extremes Springer Science & Business Media

Economic analysis of law is an interesting and challenging attempt to employ the concepts and reasoning methods of modern economic theory so as to gain a deeper understanding of legal problems. According to Richard A. Posner it is the role of the law to encourage market competition and, where the market fails because transaction costs are too high, to simulate the result of competitive markets. This would maximize economic efficiency and social wealth. In this work, the lawyer and economist Klaus Mathis critically appraises Posner's normative justification of the efficiency paradigm from the perspective of the philosophy of law. Posner acknowledges the influences of Adam Smith and Jeremy Bentham, whom he views as the founders of normative

economics. He subscribes to Smith's faith in the market as an ideal allocation model, and to Bentham's ethical consequentialism. Finally, aligning himself with John Rawls's contract theory, he seeks to legitimize his concept of wealth maximization with a consensus theory approach. In his interdisciplinary study, the author points out the possibilities as well as the limits of economic analysis of law. It provides a method of analysing the law which, while very helpful, is also rather specific. The efficiency arguments therefore need to be incorporated into a process for resolving value conflicts. In a democracy this must take place within the political decision-making process. In this clearly written work, Klaus Mathis succeeds in making even non-economists more aware of the economic aspects of the law.

The racist legacy behind the Western idea of freedom The era of the Enlightenment, which gave rise to our modern conceptions of freedom and democracy, was also the height of the trans-Atlantic slave trade. America, a nation founded on the principle of liberty, is also a nation built on African slavery, Native American genocide, and systematic racial discrimination. *White Freedom* traces the complex relationship between freedom and race from the eighteenth century to today, revealing how being free has meant being white. Tyler Stovall explores the intertwined histories of racism and freedom in France and the United States, the two leading nations that have claimed liberty as the heart of their national identities. He explores how French and American thinkers defined freedom in racial terms and conceived of liberty as an aspect and privilege of whiteness. He discusses how the Statue of Liberty—a gift from France to the United States and perhaps the most famous symbol of freedom on Earth—promised both freedom and whiteness to European immigrants. Taking readers from the Age of Revolution to today, Stovall challenges the notion that racism is somehow a paradox or contradiction within the democratic tradition, demonstrating how white identity is intrinsic to Western ideas about liberty. Throughout the history of modern Western liberal democracy, freedom has long been white freedom. A major work of scholarship that is certain to draw a

wide readership and transform contemporary debates, *White Freedom* provides vital new perspectives on the inherent racism behind our most cherished beliefs about freedom, liberty, and human rights.

Understanding Human Rights Springer Science & Business Media

The subject of this Conference concerns the impact the enlargement of the European Union has on the constitutional provisions of both levels of European administration, the national and the European level. This subject is the more attractive because the 'constitutional' impact of enlargement is an essential element in the context of the 'rule of law' as one of the 1 general principles of the Union. Here a relationship does exist with objectives such as a good and transparent system of governance, a democratic legislative process, an independent judiciary and an adequate system of legal protection. As to the national level, the implications membership of the Union has for the constitutional texts of the (candidate) member States have a connection with the fundamental characteristics of Community law such as priority of European law (over national law), direct applicability and direct effect. These principles reflect the interest in ensuring that European law, once applied in the national context by the public authorities or the judiciary, is made fully effective, for the benefit not only of the public authorities but also of the ordinary citizen.

Carpal Tunnel Syndrome Walter de Gruyter

In force in 70 countries around the world and covering more than two thirds of world trade, the 1980 United Nations Convention on Contracts for the International Sale of Goods (CISG) is considered to be the most successful convention promoting international trade. According to many commentators, this success is due, among others, to the fact that the Convention does not directly impact on the domestic law of the various legal systems, as it applies only to international - as opposed to purely domestic - contracts. The Convention, in other words, does not impose changes in the domestic law, which makes it easier for States to adopt the Convention. This does not mean, however, that the Convention does not have any impact on the domestic law at all. This book analyzes - through 24 country reports as well as a general report submitted to the 1st Intermediate Congress of the International Academy of Comparative Law held in November

2008 in Mexico City - to what extent the Convention de facto influences domestic legal systems. In particular, the book examines the Convention's impact on the practice of law, the style of court decisions as well as the domestic legislation in the area of contract law.

Springer Handbook of Medical Technology Springer

Despite its place in the humanities, the career prospects and numbers of women in philosophy much more closely resemble those found in the sciences and engineering. This book collects a series of critical essays by female philosophers pursuing the question of why philosophy continues to be inhospitable to women and what can be done to change it. By examining the social and institutional conditions of contemporary academic philosophy in the Anglophone world as well as its methods, culture, and characteristic commitments, the volume provides a case study in interpretation of one academic discipline in which women's progress seems to have stalled since initial gains made in the 1980s. Some contributors make use of concepts developed in other contexts to explain women's under-representation, including the effects of unconscious biases, stereotype threat, and micro-inequities. Other chapters draw on the resources of feminist philosophy to challenge everyday understandings of time, communication, authority and merit, as these shape effective but often unrecognized forms of discrimination and exclusion. Often it is assumed that women need to change to fit existing institutions. This book instead offers concrete reflections on the way in which philosophy needs to change, in order to accommodate and benefit from the important contribution women's full participation makes to the discipline.

A History of Western Political Thought BRILL

In the last two decades, accelerating technological progress, increasing economic globalization and the proliferation of international agreements have created new challenges for intellectual property law. In this collection of articles in honor of Professor Joseph Straus, more than 60 scholars and practitioners from the Americas, Asia and Europe provide legal, economic and policy perspectives on these challenges, with a particular focus on the challenges facing the modern patent system. Among the many topics addressed are the rapid development of specific technical fields such as biotechnology, the relationship of exclusive rights and competition, and the application of

territorially limited IP laws in cross-border scenarios.

Schwäbischer Merkur Cambridge University Press

This concise, user-oriented and up-to-date desk reference offers a broad introduction to the fascinating world of medical technology, fully considering today's progress and further development in all relevant fields. The Springer Handbook of Medical Technology is a systemized and well-structured guideline which distinguishes itself through simplification and condensation of complex facts. This book is an indispensable resource for professionals working directly or indirectly with medical systems and appliances every day. It is also meant for graduate and post graduate students in hospital management, medical engineering, and medical physics.

The CISG and its Impact on National Legal Systems Thieme

Unique in its breadth, this book undertakes a comparative analysis of the ways in which legal systems in all regions of the world deal with agreed sums payable upon breach of an obligation. The book shows divergences and convergences and indicates trends as to the future development of the law. It also deals with the treatment of agreed sums under the 1980 UN Convention on Contracts for the International Sale of Goods (CISG), offering the first comprehensive solution to this issue based on comparative analysis. For practitioners as well as researchers, this book is a valuable source of information and offers suggestions for solutions to current and future issues.

Crimes Against Art Edward Elgar Publishing

A new historical and sociological account for the broad definitional power of law in the European Union polity.

Updating the Rules for Online Content Dissemination Springer

An enchanting selection of Madame d'Aulnoy's seventeenth-century French fairy tales, interpreted by contemporary visual artist Natalie Frank Marie-Catherine Le Jumel de Barneville (1650-1705), also known as Madame d'Aulnoy, was a pioneer of the French literary fairy tale. Though d'Aulnoy's work now rarely appears outside of anthologies, her books were notably popular during her lifetime, and she was in fact the author who coined the term "fairy tales" (contes des fées). Presenting eight of d'Aulnoy's magical stories, *The Island of Happiness* juxtaposes poetic English translations with a wealth of original, contemporary drawings by Natalie Frank, one of today's most outstanding visual artists. In this beautiful volume, classic narratives are interpreted and made anew through Frank's feminist and surreal images. This feast of

words and visuals presents worlds where women exercise their independence and push against rigid social rules. Fidelity and sincerity are valued over jealousy and greed, though not everything ends seamlessly. Selected tales include "Belle-Belle," where an incompetent king has his kingdom restored to him through an androgynous heroine's constancy. In "The Green Serpent," a heroine falls in love with the eponymous snake, is punished by a wicked fairy, and endures trials to prove her worthiness. And in "The White Cat," a young prince is dazzled by the astonishing powers of a feline. Jack Zipes's informative introduction offers historical context, and Natalie Frank's opening essay delves into her aesthetic approaches to d'Aulnoy's characters. An inspired integration of art and text, *The Island of Happiness* is filled with seductive stories of transformation and enchantment.

The Constitutional Review Springer Science & Business Media

The fairness of institutions of global economic governance ranks among the most pressing issues of our time.

German books in print Springer Science & Business Media

The current legal framework for online content dissemination has proven insufficient to effectively combat illegal content. The Commissions' proposal for an EU 'Digital Services Act' aims to update the horizontal framework for intermediaries and create a safe online environment. However, as far as content mediation is concerned, European fundamental rights and values require that the specificities of media law must be taken into account. This study, conducted by the Institute of European Media Law (EMR) on behalf of the Media Authority of NRW, describes the current legal framework and the DSA proposal, and provides a comprehensive assessment from the perspective of media law, complemented by alternative proposals for further improvement.

A History of Western Political Thought is an energetic and lucid account of the most important political thinkers and the enduring themes of the last two and a half millennia. Written with students of the history of political thought in mind, the book: * traces the development of political thought from Ancient Greece to the late

twentieth century * focuses on individual thinkers and texts * includes 40 biographies of key political thinkers * offers original views of theorists and highlights those which may have been unjustly neglected * develops the wider themes of political thought and the relations between thinkers over time.

Generation of the Unbound Martinus Nijhoff Publishers

113 This system of monitoring might be improved further if all cases in this category were investigated jointly by a forensic pathologist and an anaesthesiologist at the very outset of the investigation and during the actual autopsy. Free Papers The Influence of Pancuronium on Primary Conjugated Bile Acids A. Fassoulaki, T. Mihas, A. Mihas and P. Kaniaris Experimental studies have been reported in which a prolonged action of steroid neuro muscular blocking agents followed bile acids administration(1, 2). A prolonged neuro muscular action of pancuronium has also been detected in patients with biliary obstruction(3). In the present study serum bile acids and intracellular liver enzymes were estimated after anaesthesia in

which pancuronium was used as a muscle relaxant (Fig. 1). An attempt is made to investigate the effect of pancuronium on bile acid levels. Material and Methods Twelve female patients aged between 40 and 50 years were studied. All of them were visited in the ward the night before the operation by the anaesthesiologist where their clinical condition was assessed and their consent was obtained to participate in the present study. None of them had a history of hepatic disease or was taking drugs. The operation performed in all cases was modified radical mastectomy and intracellular liver enzymes are routinely determined in these patients preoperatively. The twelve patients were reassured and stated that they did not want to have any tranquillizer for premedication.

The Byzantine Sinbad Greene Naftali/Galerie Daniel Buchholz Trafficking Culture outlines current research and thinking on the illicit market in antiquities. It moves along the global trafficking chain from 'source' to 'market', identifying the main roles and routines involved. Using original research, the authors explore the

dynamics of this 'grey' market, where legal and illegal goods are mixed and conflated. It compares and contrasts this illicit trade with other 'transnational criminal markets', such as the illegal trades in wildlife and diamonds. The analytical frames of organized crime and white-collar crime, drawn from criminology, provide a fresh perspective on a problem that has tended to be seen as archaeological, rather than criminological. Bringing insights from both disciplines together, this book represents a productive discourse between experts in these two fields, working together for several years to produce the evidence base that is reported here. Innovative forms of regulation are the most productive way to explore crime control in this field, and this book provides a series of propositions about practical crime reduction measures for the future. It will be invaluable to academics working in the fields of archaeology, criminology, art history, museum studies, and heritage. The book will also be a vital resource for professionals in the field of cultural property protection and preservation.
