Curious George and Friends: Favorite Stories by Margret and H. A. Rey features eight classic stories by the creators of Curious George. The book opens with an introduction called "Memories of

the Reys" by Margaret Bloy Graham, the illustrator of the popular Harry the Dirty Dog and other books about Harry. Graham was a long-time friend and neighbor of Hans and Margret Rey.

Throughout their lives the Reys created many lively books together. The character for whom the author-illustrator team became best known, Curious George, arrived as one of many monkey children in Cecily G. and the Nine Monkeys, Hans's first book for children. Encouraged by their publisher and children throughout the world, the Reys continued with more books about Curious George. In the meantime, the Reys published a number of books showcasing their creative talents and their rare, immediate connection with childhood. These books feature characters, all with their own personalities, and a few with resemblances to George. Whether they come to you as new friends or old, they are sure to entertain children's book lovers everywhere.

Walter Wolff was the son of a Jewish merchant family that fled their German home when the Nazis came to power and took refuge in Brussels, Belgium. On the eve of the German invasion, in May 1940, the family began its second escape. Their sixteen-month odyssey took them through the chaos of battle in France and the dangers of living clandestinely as Jews in occupied territory, before they finally boarded the notorious freighter SS Navemar in Cadiz, Spain, to be among the last Jewish refugees admitted to the United States before Pearl Harbor. Within two years of his arrival in the States, Walter was ready to take the fight back to the Nazis as a soldier in the U.S. Army. Trained for the Intelligence Corps at Camp Ritchie, he was sent first to Italy and then to Germany and Austria, where he interrogated POWs for potential prosecution as war criminals at Nuremberg. At the same time, on his travels in Europe he returned to the confiscated properties of his extended family, throwing out the occupiers and reclaiming ownership. Telling the rousing story of a Jewish boy who fled persecution and returned to prosecute the Nazi oppressors, Walter Wolff's daughter Nina has reconstructed these events from family lore and her father's own cache of more than 700 wartime letters and 200 photographs, which he revealed to her shortly before he died. Skyhorse Publishing, along with our Arcade, Good Books, Sports Publishing, and Yucca imprints, is proud to publish a broad range of biographies, autobiographies, and memoirs. Our list includes biographies on well-known historical figures like Benjamin Franklin, Nelson Mandela, and Alexander Graham Bell, as well as villains from history, such as Heinrich Himmler, John Wayne Gacy, and O. J. Simpson. We have also published survivor stories of World War II, memoirs about overcoming adversity, first-hand tales of adventure, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

In October, 1970, The Blue Flame rocket car screamed across the Bonneville Salt Flats at 622.407 mph setting the absolute world land speed record. The title held fast for 13 years and remains the fastest American-built car in history. Ray Dausman designed the rocket engine for The Blue Flame. Why wasn't he present when The Blue Flame set the world record? Why didn't the car achieve 1,000 mph as he designed it to do? Ray's story unfolds with humorous observations of what it was like to be a fish out of water in the racing world. The reader has a front row seat for this wrestling match between regret and perspective of achievement. Sarah, Ray's daughter, shares his story in this memoir of a man with a passion for rockets and new ideas. The Reluctant Rocketman introduces the reader to a boy with a thirst for new adventures who develops a passion for rockets as he reaches adulthood with an even greater appreciation for new ideas. The Blue Flame project

is the common thread throughout these chapters which shed light on the life a self-taught rocket designer who had to decide if the price of invention was worth it after all.

Most of us are going through the motions when it comes to faith, either believing we've found all the relevant answers to life's questions or believing none can be found. We shy away from our deepest questions about God because we fear the uncertainty on the other side. But when we make certainty and correct belief the end goal of faith, we miss out on the chance to know God more deeply and to participate in God's work in the world. Pastor Steph shows us how to lean into our questions and embrace a life of curiosity. Taking Jesus's life as a model, we can confront our fears, be set free from our anxiety, ask new questions, and live into an adventurous life of curiosity. After all, Jesus was a question man, not an answer man. Our questions, and even our doubts, can push us closer to a God we can actually believe in--rather than further from a God we think we can contain. In *Stay Curious*, Pastor Steph walks readers through common obstacles and road blocks to curiosity, and offers practical strategies for embracing even the most intimidating questions.

For at least half a million years, people have been doing some very strange things with fossils. Long before a few seventeenth-century minds started to decipher their true, organic nature, fossils had been eaten, dropped in goblets of wine, buried with the dead, and adorned bodies. What triggered such curious behavior was the belief that some fossils could cure illness, protect against being poisoned, ease the passage into the afterlife, ward off evil spirits, and even kill those who were just plain annoying. But above all, to our early prehistoric ancestors, fossils were the very stuff of artistic inspiration. Drawing on archaeology, mythology, and folklore, Ken McNamara takes us on a journey through prehistory with these curious stones, and he explores humankind's

unending quest for the meaning of fossils.
