 Traumatic Brain and Spinal Cord Injury
 comprehensively covers the medical and
 pathological issues related to neurotrauma
 and its often devastating consequences.
 Written by globally renowned experts in
 the field, both clinicians and researchers
 will find this book invaluable to update
 their knowledge. This volume is divided
 into two sections, one covering the brain,
 the other the spinal cord. Each section
 discusses the following topics: • The
 demographic in the developed and
 developing world where neurotrauma is
 witnessing a massive expansion • Major
 clinical issues including advanced semi-

experimental monitoring techniques
 utilized by neurosurgeons and intensivists
 and the potential use of identifying
 markers of tissue injury • Overview of
 major pathophysiological changes • The
 development of animal models; successes
 and limitations • Past, current and future
 therapeutic strategies including
 rehabilitative opportunities. Presenting the
 most up-to-date clinical and experimental
 research in neurotrauma, this volume is
 essential reading for neurologists,
 neurosurgeons, intensive care physicians
 and rehabilitative physicians.

**Traumatic Brain and Spinal Cord
 Injury** European Alliance for Innovation
 ABOUT THE BOOK Listen to these two
 stories: Here is the first one: When there
 arose a need for a new war leader among
 the African tribe, they searched ten
 kilometers radius to no avail for a lion to

be killed and skinned. A lion whose warrior
 blood will be used for the installation
 rituals for the ascension of the new
 leader. As a final resort, the elders
 conferred amongst themselves and it was
 agreed that a mystical rope be placed
 across a well trod path so that the first
 person to pass by would turn to a lion
 and be used for the ritual. When the elders
 got home, they announced to their
 children to avoid that particular
 route. Unfortunately, an orphan passed by
 and turned into a lion and was used for the
 purpose. Here is the second story: This also
 involves a young boy. For one reason or
 the other, he did not hear that there would
 be a qualifying exam into the nation's
 army next week. He had been hoping and
 praying for the opportunity but lost out.
 The exam was over for more than a week
 before he got to know. This book deals with

problems related to the experience of these two boys. Have you ever missed an opportunity because you did not know the chance was there to be taken? Then this book is for you. Sometimes, what we did not know, more so as youths can waste a whole life. Happy reading!

South Africa Mosby

Student attrition has been a perennial theme in South African higher education throughout the decade. In its National Plan for Higher Education (2001), the Department of Education attributed high dropout rates primarily to financial and/or academic exclusions. Four years later, it reported that 30% of students dropped out in their first year of study and a further 20% during their second and third years. Against this backdrop, the erstwhile research programme on Human Resources Development initiated a research project to investigate more thoroughly why students dropped out, what led them to persist in higher education to graduation, and what made for a successful transition to the labour market. The chapters in this volume address these issues in relation to one or more of seven institutional case studies conducted in 2005.

Although developing the physical man, educating the intellect, and training the spirit are important, godly wisdom is a key ingredient for success!

Transformation in Higher Education

Elsevier

Troubling Images explores how art and visual culture helped to secure hegemonic claims to the nation-state via the construction of a unified Afrikaner imaginary Emerging in the late nineteenth century and gaining currency in the 1930s and 1940s, Afrikaner nationalist fervour underpinned the establishment of white Afrikaner political and cultural domination during South Africa's apartheid years. Focusing on manifestations of Afrikaner nationalism in paintings, sculptures, monuments, buildings, cartoons, photographs, illustrations and exhibitions, Troubling Images offers a critical account of the role of art and visual culture in the construction of a unified Afrikaner imaginary, which helped secure hegemonic claims to the nation-state. This insightful volume examines the implications of metaphors and styles deployed in visual culture, and considers how the design, production, collecting and commissioning of objects, images and architecture were informed by Afrikaner nationalist imperatives and ideals. While some chapters focus only on instances of adherence to Afrikaner nationalism, others consider articulations of dissent and

criticism. By 'troubling' these images: looking at them, teasing out their meanings, and connecting them to a political and social project that still has a major impact on the present moment, the authors engage with the ways in which an Afrikaner nationalist inheritance is understood and negotiated in contemporary South Africa. They examine the management of its material effects in contemporary art, in archives, the commemorative landscape and the built environment. Troubling Images adds to current debates about the histories and ideological underpinnings of nationalism and is particularly relevant in the current context of globalism and diaspora, resurgent nationalisms and calls for decolonisation.

How to Be a Success in Life Springer Nature

This IMAT collection gives you all the resources for the IMAT in one fully comprehensive guidebook. This collection consists of 5 full books - you get all guides and practice papers in one single volume. This allows you to plan your preparation more thoroughly, whilst benefiting from the convenience and savings of a single preparation book. Start by reading The Ultimate IMAT Guide which gives you all the information about the test, the question styles, question answering strategy and hundreds practice questions to hone your skills. Each practice question comes with fully worked solutions, so you can build on your mistakes and improve your scores over time. Then work your way through our comprehensive worked solutions for all current IMAT past papers, including model essays! Finally put all your skills into practice with 8 authentic mock tests. With contributions from specialist IMAT tutors and Published by the UK's leading University Admissions Company, The Ultimate IMAT Collection is the world's most comprehensive preparation guide. This book will allow you to approach the test with confidence and gain the best possible score.

Assessing Academic Literacy in a Multilingual Society Faith Library Publications

Artificial Intelligence (AI) has the potential to address some of the biggest challenges in education today, innovate teaching and learning practices, and ultimately accelerate the progress towards SDG 4. However, these rapid technological developments inevitably bring multiple risks and challenges, which have so far outpaced policy debates and regulatory frameworks. This publication offers guidance for policy-makers on how best to

leverage the opportunities and address the risks, presented by the growing connection between AI and education. It starts with the essentials of AI: definitions, techniques and technologies. It continues with a detailed analysis of the emerging trends and implications of AI for teaching and learning, including how we can ensure the ethical, inclusive and equitable use of AI in education, how education can prepare humans to live and work with AI, and how AI can be applied to enhance education. It finally introduces the challenges of harnessing AI to achieve SDG 4 and offers concrete actionable recommendations for policy-makers to plan policies and programmes for local contexts. [Publisher summary, ed]

Education Policy and Practice Oxford University Press

The Conference Theme was: "Moving Africa forward through Engineering, Technology and Innovation". The conference brought together academics, researchers and industrialists from many disciplines, in particular those that have the most impact on Africa's Development. Most conferences on the continent have covered limited disciplines and therefore the opportunity has been lost sharing information, results and knowledge in a way which can solve the many contentious issues, most of which can be solved through a multidisciplinary approach.

University Access and Success UNESCO Publishing

The challenge of widening access and participation in higher education in a manner that ensures students are successful in their studies is a major issue globally and a significant research-focus within higher education studies and higher education policy. Similarly, the challenge of under-preparedness of students entering higher education has become increasingly pertinent as universities in both developed and developing countries struggle to improve their throughput rates in a context in which schooling no longer seems to provide sufficient preparation for entering university. In this book Merridy Wilson-Strydom applies the capabilities approach to better understand university access and participation and draws on a rich case study from South Africa to critically and innovatively explore the complex and contradictory terrain of access with success. The book integrates quantitative and qualitative research with theory and practical application to provide a new framework for considering and improving the transition from school to university. University Access and Success will appeal to academics and researchers in the field of higher education

internationally. The book also contributes to the growing body of international and comparative scholarship on the capabilities approach in higher education and will therefore be of value to higher education practitioners, such as those working in the promotion of teaching and learning, higher education quality assurance, institutional research and student affairs.

Nursing Theorists and Their Work African Minds

"This work incorporates new empirical data along with practitioner experience and analyzes practice issues within a policy framework that takes into account past and current political trends."--Cover.
From Memory to Marble Human Sciences Research Council

Education Policy and Practice provides teachers with effective strategies for meeting racial, linguistic, and cultural diversity within the classroom, creating a framework teachers can use to improve urban school outcomes and in-class interaction.

Fundamentals of Metallurgy NYU Press

This nine-country study of higher education financing in Africa includes three East African states (Kenya, Tanzania and Uganda), five countries in southern Africa (Botswana, Lesotho, Mozambique, Namibia and South Africa), and an Indian Ocean island state (Mauritius). Higher Education Financing in East and Southern Africa explores trends in financing policies, paying particular attention to the nature and extent of public sector funding of higher education, the growth of private financing (including both household financing and the growth of private higher education institutions) and the changing mix of financing instruments that these countries are developing in response to public sector financial constraints. 'This unique collection of African-country case studies draws attention to the remaining challenges around the financing of higher education in Africa, but also identifies good practices, lessons and common themes.

Continuous Renal Replacement Therapy African Books Collective

This book presents the most comprehensive and most thorough study of the developments in South African higher education and research after the first democratic elections of 1994 - that is of post-Apartheid South African higher education. This volume will provide its readers with a detailed insight into the new (i.e. post-1994) South African higher education system. The large number of experienced authors and editors involved in the book guarantees that the reader will be introduced in the new SA higher education system from a large number of perspectives that are presented in a consistent and coherent way. This book will be of interest to scholars, students, administrators, policymakers and politicians interested in South Africa, higher education and research, and policy analysis. "Publications on higher education are not new. But this volume, which is the first of its kind as a collective effort of tracing and examining the twists and turns taken by processes of change in the South African higher education system in a context of profound societal and global transformation, adds a fresh dimension to the debate. In its examination of the extent to which the changes were in line with policy intentions, particularly with regard to equity, democratisation, responsiveness and efficiency, and how a new institutional landscape started emerging, it makes a momentous contribution to the current debate about higher education restructuring." Njabulo Ndebele, Vice-chancellor, University of Cape Town and Chair of the South African Association of University Vice-chancellors "This book addresses a rich variety of issues on South African higher education. It puts these in the relevant context of the process of globalization and it shows that the South African experiences offer us a lot to learn. Highly recommended for those who are intrigued by the innovations taking place in South African higher education as well as for those who intend to grasp the effects of globalization." Frans van Vught, Rector Magnificus and founding Director of the Center for Higher Education Policy Studies, University of Twente, The Netherlands "Reflection is a crucial ingredient to learning. In this book on higher education we have reflections on a unique period in the history of a country that managed its transition to democracy in a way that was unique, but from which we can all learn. Higher education in South Africa played a vital role in that transition and was part of the many tensions, choices and influences. They have been thoughtfully captured." Brenda Gourley, Vice-chancellor, The Open University, UK

and board member, Centre for Higher Education Transformation. "No contemporary higher education system has changed as dramatically as that in South Africa. This book, rich in data, examines the changes that took place and offers insights into how change frequently cannot be predicted. The analysis captures the excitement, high expectations, remarkable successes, and failures in the transformation of the apartheid system of higher education. This excellent study provides rich fare for comparative analysis." Fred M. Hayward, American Council on Education Pilot Project, Executive Vice President, Council for Higher Education Accreditation, US.
Study SA Oxford, England : Clio Press Worldwide, in Africa and in South Africa, the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade. This heightened attention has not only been concerned with the traditional role of the PhD, namely the provision of future academics; rather, it has focused on the increasingly important role that higher education - and, particularly, high-level skills - is perceived to play in national development and the knowledge economy. This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust (CHET) and the Centre for Research on Evaluation, Science and Technology (CREST), as well as on studies from the rest of Africa and the world. In addition to the historical studies, new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book. The findings presented in Doctoral Education in South Africa pose anew at least six tough policy questions that the country has struggled with since 1994, and continues to struggle with, if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030. Discourses framed around the single imperatives of growth, efficiency, transformation or quality will not, however, generate the kind of policy discourses required to resolve these tough policy questions effectively. What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously.

The Prevention of Oral Disease Taylor & Francis

Continuous Renal Replacement Therapy provides concise, evidence-based, bedside guidance for the management of critically ill patients with acute renal failure, offering

quick reference answers to clinicians' questions about treatments and situations encountered in daily practice.

Pediatric Nutrition in Practice CRC Press

As product specifications become more demanding, manufacturers require steel with ever more specific functional properties. As a result, there has been a wealth of research on how those properties emerge during steelmaking. *Fundamentals of metallurgy* summarises this research and its implications for manufacturers. The first part of the book reviews the effects of processing on the properties of metals with a range of chapters on such phenomena as phase transformations, types of kinetic reaction, transport and interfacial phenomena. Authors discuss how these processes and the resulting properties of metals can be modelled and predicted. Part two discusses the implications of this research for improving steelmaking and steel properties. With its distinguished editor and international team of contributors, *Fundamentals of metallurgy* is an invaluable reference for steelmakers and manufacturers requiring high-performance steels in such areas as automotive and aerospace engineering. It will also be useful for those dealing with non-ferrous metals and alloys, material designers for functional materials, environmentalists and above all, high technology industries designing processes towards materials with tailored properties. - Summarises key research and its implications for manufacturers - Essential reading for steelmakers and manufacturers - Written by leading experts from both industry and academia

Failing Students in Higher Education

The mining sector, if carefully managed, presents enormous opportunities for advancing sustainable development particularly in low-income countries, the

International Resource Panel says in its latest report

I Wish Somebody Told Me This Before

Karger Medical and Scientific Publishers

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

Applied Molecular Biotechnology Open University Press

For the first time, the 92-metre frieze of the Voortrekker Monument in Pretoria, one of the largest historical narratives in marble, has been made the subject of a book. The pictorial narrative of the Boer pioneers who conquered South Africa's interior during the 'Great Trek' (1835-52) represents a crucial period of South Africa's past. Conceptualising the frieze both reflected on and contributed to the country's socio-political debates in the 1930s and 1940s when it was made. The

book considers the active role the Monument played in the rise of Afrikaner nationalism and the development of apartheid, as well as its place in post-apartheid heritage. The frieze is unique in that it provides rare evidence of the complex processes followed in creating a major monument. Based on unpublished documents, drawings and models, these processes are unfolded step by step, from the earliest discussions of the purpose and content of the frieze, through all the stages of its design, to its shipping to post-war Italy to be copied into marble from Monte Altissimo, up to its final installation in the Monument. The book examines how visual representation transforms historical memory in what it chooses to recount, and the forms in which it is depicted. The second volume expands on the first, by investigating each of the twenty-seven scenes of the frieze in depth, providing new insights into not only the frieze, but also South Africa's history. François van Schalkwyk of *African Minds*, co-publisher with De Gruyter writes: *From Memory to Marble* is an open access monograph in the true sense of the word. Both volumes of the digital version of the book are available in full and free of charge from the date of publication. This approach to publishing democratises access to the latest scholarly publications across the globe. At the same time, a book such as *From Memory to Marble*, with its unique and exquisite photographs of the frieze as well as its wealth of reproduced archival materials, demands reception of a more traditional kind, that is, on the printed page. For this reason, the book is likewise available in print as two separate volumes. The printed and digital books should not be seen as separate incarnations; each brings its own advantages, working together to extend the reach and utility of *From Memory to Marble* to a range of interested readers.
