INTERNATIONAL

BESTSELLER • A

bestselling dystopian

novel that tackles

surveillance, privacy and

the frightening intrusions

of technology in our

lives—a “compulsively

readable parable for the

21st century” (Vanity

Fair). When Mae Holland

is hired to work for the

Circle, the world’s most

powerful internet

company, she feels she’s

been given the

opportunity of a lifetime.

The Circle, run out of a

sprawling California

campus, links users’

personal emails, social

media, banking, and

purchasing with their

universal operating

system, resulting in one

online identity and a new

age of civility and

transparency. As Mae

tours the open-plan office

spaces, the towering glass

dining facilities, the cozy

dorms for those who

spend nights at work, she

is thrilled with the

company’s modernity and

activity. There are parties

that last through the

night, there are famous

musicians playing on the

lawn, there are athletic

activities and clubs and

brunches, and even an

aquarium of rare fish

retrieved from the

Marianas Trench by the

CEO. Mae can’t believe

her luck, her great fortune

to work for the most

influential company in the

world—even as life

beyond the campus grows

distant, even as a strange

encounter with a

colleague leaves her

shaken, even as her role

at the Circle becomes

increasingly public. What

begins as the captivating

story of one woman’s

ambition and idealism

soon becomes a heart-

racing novel of suspense,

raising questions about

memory, history, privacy,

democracy, and the limits

of human knowledge.

"A work of enormous

breadth, likely to pleasantly surprise both

general readers and experts."—New York

Times Book Review This revolutionary book

provides fresh answers to long-standing questions of human origins and

consciousness. Drawing on his breakthrough

research in comparative neuroscience, Terrence

Deacon offers a wealth of insights into the

significance of symbolic thinking: from the co-

evolutionary exchange between language and

brains over two million years of hominid evolution

to the ethical

repercussions that

followed man's newfound access to other people's

thoughts and emotions.

Informing these insights is a new understanding of

how Darwinian processes underlie the brain's

development and function

as well as its evolution. In contrast to much

contemporary

neuroscience that treats

the brain as no more or

less than a computer,

Deacon provides a new

clarity of vision into the

mechanism of mind. It

injects a renewed sense

of adventure into the

experience of being

human.

The debut book of Jeremy

Tankard's high-flying Bird

series! Bird wakes up

feeling grumpy. Too

grumpy to eat or play --

too grumpy even to fly.

"Looks like I'm walking

today," says Bird. He

walks past Sheep, who

offers to keep him

company. He walks past

Rabbit, who also could

use a walk. Raccoon,

Beaver, and Fox join in,

too. Before he knows it, a

little exercise and

companionship help Bird

shake his bad mood. Praised by the Wall Street Journal as "comic perfection," this winsome, refreshingly original picture book is sure to help kids (and grown-ups) giggle away their grumpies, too! Bird's impeccably crafted, hilarious melodramas continue in the Grumpy Bird board book, Boo Hoo Bird, Hungry Bird, and coming in 2018, Sleepy Bird.

The Symbolic Species:

The Co-evolution of Language and the Brain

Simon and Schuster
Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller Outliers, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn't true? Talking to Strangers is a

classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra

Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller David and Goliath, Malcolm Gladwell has written a gripping guidebook for troubled times.

From the New York Times bestselling creators of Click, Clack, Moo, comes an entertaining introduction to politics. My

fellow Americans: It is our pleasure, our honor, our duty as citizens to present to you Duck for President. Here is a duck who began in a humble pond. Who worked his way to farmer. To governor. And now, perhaps, to the highest office in the land. Some say, if he walks like a duck and talks like a duck, he is a duck. We say, if he walks like a duck and talks like a duck, he will be the next president of the United States of America. Thank you for your vote.

The Wild Robot Routledge Understanding Reading revolutionized reading research and theory when the first edition appeared in 1971 and continues to be a leader in the field. In the sixth edition of this classic text, Smith's purpose remains the same: to shed light on fundamental aspects of the complex human act of reading--linguistic, physiological, psychological, and social--and on what is involved in learning to read. The text critically examines current theories, instructional practices, and controversies, covering a wide range of disciplines but always remaining accessible to students and classroom teachers. Careful attention is given to the ideological clash that continues between whole language and direct instruction and currently permeates every aspect

of theory and research into reading and reading instruction. To aid readers in making up their own minds, each chapter concludes with a brief statement of "Issues." Understanding Reading: A Psycholinguistic Analysis of Reading and Learning to Read, Sixth Edition is designed to serve as a handbook for language arts teachers, a college text for basic courses on the psychology of reading, a guide to relevant research on reading, and an introduction to reading as an aspect of thinking and learning. It is matchless in integrating a wide range of topics relative to reading while, at the same time, being highly readable and user-friendly for instructors, students, and practitioners.

Mole and the Baby Bird Read Books Ltd This early work by

Radclyffe Hall was originally published in 1928 and we are now republishing it with a brand new introductory biography. 'The Well of Loneliness' is a novel that follows an upper-class Englishwoman who falls in love with another woman while serving as an ambulance driver in World War I. Marguerite Radclyffe Hall was born on 12th August 1880, in Bournemouth, England. Hall's first novel *The Unlit Lamp* (1924) was a lengthy and grim tale that proved hard to sell. It was only published following the success of the much lighter social comedy *The Forge* (1924), which made the best-seller list of *John O'London's Weekly*. Hall is a key figure in lesbian literature for her novel *The Well of Loneliness* (1928). This is her only work with overt lesbian themes and tells the story of the life of a masculine lesbian named Stephen Gordon.

The Movement Toward a New America W. W.

Norton & Company
A flock of birds was moving toward me along the river, hovering over

something floating on the water. It drifted downstream, closer and closer, until finally it bumped up against the dock. Though it was covered with leaves and branches, now I could tell that it was a raft. I reached down and pushed some of the leaves aside. Beneath them was a drawing of a rabbit. It looked like those ancient cave paintings I'd seen in books--just outlines, but wild and fast and free. Nicky isn't one bit happy about spending the summer with his grandma in the Wisconsin woods, but then the raft appears and changes everything. As Nicky explores, the raft works a subtle magic, opening up the wonders all around him--the animals of river and woods, his grandmother's humor and wisdom, and his own special talent as an artist.

WALC 6 Little, Brown
From Onjali Q. Rauf, the award-winning and best-selling author of *The Boy at the Back of the Class*, comes another incredible story, told with humour and heart. 'The boy's an absolute menace.' 'He's a bully. A lost cause!' 'Why can't he be more like his sister?' 'I've been getting into trouble for as long I can remember. Usually I

don't mind 'cos some of my best, most brilliant ideas have come from sitting in detention. But recently it feels like no one believes me about anything - even when I'm telling the truth! And it's only gotten worse since I played a prank on the old man who lives in the park. Everyone thinks I'm just a bully. They don't believe I could be a hero. But I'm going to prove them all wrong... Told from the perspective of a bully, this book explores themes of bullying and homelessness, while celebrating kindness, friendship and the potential everyone has to change for the good. *Birds Every Child Should Know* Scholastic Inc.
Curiosity overcomes fear
A little blue bird is afraid to learn to fly, but is still very curious about the world beyond his nest. "Mama, mama, what is out there?" he asks. "Nothing," his mother replies. "Now go to sleep." But the little bird can't stop thinking about what his mother said. What is this nothing? Finally, curiosity draws the little bird from his nest into the wonders of the great outside world - and he learns to fly. When he returns, his family asks him, "What happened?"

"Nothing!" replies the little blue bird, happily. With his characteristically expressive and richly

textured illustrations, Tomek Bogacki - whose fables for the very young have been likened to

those of Leo Lionni - shows how a little bird, in his search for nothing, finds everything.
