In the span of only seventy years,

Estonia first proclaimed its

independence, was occupied and

deprived of its sovereignty, saw many of its citizens deported, and yet managed to recover its independence. How did this small nation keep its language and traditions alive during half a century of occupation, and how did it maintain such a vivid sense of identity? For the first time in English, this book gives a

comprehensive view of the events which shaped the destiny of contemporary Estonia. The Editor, Jean-Jacques Subrenat, has called upon an unusually broad spectrum of the best experts (in history, archeology, political science, genetics, literature), but also on some of the leaders who took part in the rebuilding of Estonia, to offer more than a history, rather a unique testimony on a nation reborn. Estonia: Identity and Independence provides rare insight into the many aspects of a country whose location in Northern Europe, within the European Union, and as a NATO ally, but also as a close neighbour of Russia, deserves the attention of scholars, journalists, and informed readers today. This volume includes a thorough chronology of Estonia (from prehistory to

accession to the European Union), and a brief c.v. of each co-author. Estonia: Identity and Independence is also available in three other languages (Estonian, Russian, French).

*Communicating Ice through Popular Art and Aesthetics* Archaeopress Publishing Ltd

Rock art is one of the most visible and geographically widespread of cultural expressions, and it spans much of the period of our species' existence. Rock art also provides rare and often unique insights into the minds and visually creative capacities of our ancestors and how selected rock outcrops with distinctive images were used to construct symbolic landscapes and shape worldviews. Equally important, rock art is often central to the

expression of and engagement with spiritual entities and forces, and in all these dimensions it signals the diversity of cultural practices, across place and through time. Over the past 150 years, archaeologists have studied ancient arts on rock surfaces, both out in the open and within caves and rock shelters, and social anthropologists have revealed how people today use art in their daily lives. The Oxford Handbook of the Archaeology and Anthropology of Rock Art showcases examples of such research from around the world and across a broad range of cultural contexts, giving a sense of the art's regional variability, its antiquity, and how it is meaningful to people in the recent past and today - including how we have ourselves tended to make sense of

the art of others, replete with our own preconceptions. It reviews past, present, and emerging theoretical approaches to rock art investigation and presents new, cutting-edge methods of rock art analysis for the student and professional researcher alike.

#### One Sip at a Time Springer

Can a two-career couple really pick up stakes and move to Provence? Keith and Val had a dream ? to live in Provence, the land of brilliant sunlight, charming hilltop villages and the deep blue waters of the Mediterranean. But there were two problems: they weren't French speakers and they had full-time jobs. So they came up with a plan? Follow their adventures (and misadventures) as they quit their jobs, become consultants and split their time between two countries.

Laugh along as they build a life in Provence, slowly mastering a new language and making friends with the locals over long meals and just a bit too much wine. This light and breezy memoir is full of wry observations on France, like the power of cheese to sway elections, the right and wrong ways for men to kiss each other, and the law requiring that blood donors must speak French. If you've ever dreamed of changing gears and learning what *joie de vivre* is really all about, you won't want to miss this delightful book.

The Land of Painted Caves (with Bonus Content) Rowman Altamira

This monograph on the Central European Magdalenian aims to provide a comprehensive overview of the archaeological record of this period. It

sheds new light on five regional groups between the Rhône valley to the west and the Vistula-valley to the east, which existed roughly between 20,000 and 14,000 years ago. Readers will discover that these groups are characterized with regard to their environmental setting (including faunal and vegetational aspects), lithic raw material and mollusk shell procurement, typology, technology and artesian craftworks. The work also explores an alternative interpretation of bidirectional recolonization from both Franco-Cantabria and Eastern Central Europe after the Last Glacial Maximum. This book will appeal to researchers and scholars in archaeology and cognate fields.

*Proceedings of the Society of Biblical Archaeology* Elsevier

For the last 20 years there has been a growing interest in the geosciences for topics related to geoheritage: geoconservation, geotourism and geoparks. Geoheritage: Assessment, Protection, and Management is the first and only reference book to cover these main topics as well as the relationship of geoheritage to other subjects such as landscapes, conservation, and tourism. The book also includes methodologies for assessment, mapping, and visualisation, along with case studies and colour images of some of the most important global geosites. This book is an essential resource for geoscientists, park and geopark managers, tourism and regional planning managers, as well as university students interested in geoheritage, geosites, geomorphosites,

geoconservation, and geotourism. It also includes critical information on UNESCO's Global Geoparks, World Heritage and Biosphere Reserve sites, national parks and protected areas in general, land-use planning and nature conservation policies, and in the general contribution of geodiversity for sustainable development. - Winner of the 2019 AESE Award for Outstanding Publication - Written by a panel of 46 authors from 14 countries in all continents - Based on conceptual, methodological, and applied research carried out by academics and practitioners - Includes 160 colour images and maps of geoheritage sites - Features six case studies from sites in Africa, Asia, Australia, Europe, North America and South America

Since it was first published, *French in Action: A Beginning Course in Language and Culture—The Capretz Method* has been widely recognized in the field as a model for video-based foreign-language instructional materials. The third edition, revised by Pierre Capretz and Barry Lydgate, includes new, contemporary illustrations throughout and, in the Documents section of each lesson, more-relevant information for today's students. A completely new feature is a journal by the popular character Marie-Laure, who observes and comments humorously on the political, cultural, and technological changes in the world between 1985 and today. The new edition also incorporates more content

about the entire Francophone world. In use by hundreds of colleges, universities, and high schools, *French in Action* remains a powerful educational resource that this third edition updates for a new generation of learners. Part 2 gives students at the intermediate level the tools they need to communicate effectively in French and to understand and appreciate French and Francophone cultures.

This Open Access book explains that after long periods of prehistoric research in which the importance of the archaeological as well as the natural context of rock art has been constantly underestimated, research has now

begun to take this context into focus for documentation, analysis, interpretation and understanding. Human footprints are prominent among the long-time under-researched features of the context in caves with rock art. In order to compensate for this neglect an innovative research program has been established several years ago that focuses on the merging of indigenous knowledge and western archaeological science for the benefit of both sides. The book gathers first the methodological diversity in the analysis of human tracks. Here major representatives of anthropological, statistical and traditional approaches feature the multi-layered methods available for the analysis of human tracks. Second it compiles case studies from around the

globe of prehistoric human tracks. For the first time, the most important sites which have been found worldwide are published in a single publication. The third focus of this book is on firsthand experiences of researchers with indigenous tracking experts from around the globe, expounding on how archaeological science can benefit from the ancestral knowledge. This book will be of interest to professional archaeologists, graduate students, ecologists, cultural anthropologists and laypeople, especially those focussing on hunting-gathering and pastoralist communities and who appreciate indigenous knowledge.--

**A Text-book of European Archaeology** Lonely Planet

An archaeological exploration of the

mysterious world of cave art through the ages. Deep underground, some of humanity's earliest artistic endeavors have lain untouched for millennia. The dark interiors of caves, wherever they may be found, seem to have had a powerful draw for ancient peoples, who littered the cave floors with objects they had made. Later, they adorned cave walls with sacred symbols and secret knowledge, from the very first abstract symbols and handprints to complex and vivid arrangements of animals and people. Often undisturbed for many tens of thousands of years, these were among the first visual symbols that humans shared with each other, though they were made so long ago that we have entirely forgotten their meaning. However, as archaeologist Bruno David

reveals, caves decorated more recently may help us to unlock their secrets. David tells the story of this mysterious world of decorated caves, from the oldest known painting tools to the magnificent murals of the European Ice Age. Showcasing the most astounding discoveries made in more than 150 years of archaeological exploration, *Cave Art* explores the creative achievements of our remotest ancestors and what they tell us about the human past.

**Sites Et Monuments** Archaeopress Publishing Ltd

The Archaeology Hotspots series offers reader-friendly and engaging narratives of the archaeology in particular countries. Written by archaeological experts with a general reader in mind,

each book in the series focuses on what has been found and by whom, what the controversies and scandals have been, ongoing projects, and how it all fits into a broader view of the history of the country. In *Archaeology Hotspot France*, Georgina Muskett provides insight into the vibrant and varied collection of archaeological sites and monuments in France. From the presence of the first humans to the royal dynasty of the Merovingians, this book takes readers into the histories, mysteries, and scandals of these illustrious sites, as well as covering the latest discoveries, early pioneers, and the innovations for which French archaeology is famous. The stunning cave art of Lascaux, the engineering excellence of the Pont-du-Gard and the amphora-laden shipwreck

at Madrague de Giens are among the wealth of archaeological sites to be discovered.

Cave Hunting Yale University Press  
The Hutchinson Concise Dictionary of Music, in 7,500 entries, retains the breadth of coverage, clarity, and accessibility of the highly acclaimed Hutchinson Encyclopedia of Music, from which it is derived. Tracing its lineage to the Everyman Dictionary of Music, now out of print, it boasts a distinguished heritage of the finest musical scholarship. This book provides comprehensive coverage of theoretical and technical music terminology, embracing the many genres and forms of classical music, clearly illustrated with examples. It also provides core information on composers and

comprehensive lists of works from the earliest exponents of polyphony to present-day composers.

#1 NEW YORK TIMES BESTSELLER • In this, the extraordinary conclusion of the ice-age epic series, *Earth's Children®*, Ayla, Jondalar, and their infant daughter, Jonayla, are living with the Zelandonii in the Ninth Cave. Ayla has been chosen as an acolyte to a spiritual leader and begins arduous training tasks. Whatever obstacles she faces, Ayla finds inventive ways to lessen the difficulties of daily life, searching for wild edibles to make meals and experimenting with techniques to ease the long journeys the Zelandonii must take while honing her skills as a healer and a leader. And there are the Sacred Caves that Ayla's mentor

takes her to see. They are filled with remarkable paintings of mammoths, lions, and bears, and their mystical aura at times overwhelms Ayla. But all the time Ayla has spent in training rituals has caused Jondalar to drift away from her. The rituals themselves bring her close to death, but through them Ayla gains A Gift of Knowledge so important that it will change her world. BONUS:

This edition contains a reading guide and an interview with Jean M. Auel. Sixth in the acclaimed *Earth's Children®* series. *Catalogue of Scientific Papers* Routledge For speleologists and holidaymakers alike, here is an essential handbook. The first guide to all the decorated Ice Age caves in Europe that are open to the public, fully revised and updated for a third edition, this book covers more than

50 caves in the UK, France, Spain, Portugal and Italy, as well as relevant museums and centres.

**Lonely Planet France** Penguin

Three American girls from very different backgrounds arrive in Paris in the autumn of 1967 for a college year abroad: shy but brainy little Charity, from a Boston Brahmin family; gorgeous Amaleen, West Virginia nouveau riche

man-killer; politically-committed Josie, from a prominent African-American family near Chicago. Unlikely roommates, their prejudices fall away as they grow into friendship, but May 1968 shatters their cozy world: the Sorbonne explodes in riots as millions of students and workers revolt and France hurtles toward chaos. The girls flee their Latin Quarter apartment, one to explore-and risk death-in the Dordogne's prehistoric caves; one to a lavish life in a Loire chateau where hidden terror lurks; one to dangerous exhilaration on the barricades. Along the way they stumble into love: tender, lustful, perverse, and sublime. In only a month they learn far more about who they are and who they want to be. For the Paris Girls Secret Society, life and love will never be the

same.

The Cambridge World Prehistory  
provides a systematic and authoritative  
examination of the prehistory of every  
region around the world from the early  
days of human origins in Africa two  
million years ago to the beginnings of  
written history, which in some areas  
started only two centuries ago. Written  
by a team of leading international  
scholars, the volumes include both  
traditional topics and cutting-edge  
approaches, such as archaeolinguistics  
and molecular genetics, and examine  
the essential questions of human  
development around the world. The  
volumes are organised geographically,

exploring the evolution of hominins and their expansion from Africa, as well as the formation of states and development in each region of different technologies such as seafaring, metallurgy and food production. The Cambridge World Prehistory reveals a rich and complex history of the world. It will be an invaluable resource for any student or scholar of archaeology and related disciplines looking to research a particular topic, tradition, region or period within prehistory.

### **The Central European Magdalenian**

Oxford University Press

This book expands on an initial paper that merited the comments: "I read it with interest . . . It is almost certain that, for the authors of its drawings, the Chauvet Cave was considered to be

directly related to the Pont d'Arc." -Jean Clottes, author of *What is Paleolithic Art?: Cave Paintings and the Dawn of Human Creativity*. "It is very nicely written and offers a great deal of food for thought . . . the implicit depiction of landscape: it is a great idea." - Anne Solomon, author of *Rock Arts, Shamans, and Grand Theories*. In the book "The Sacred Landscape," the author Johan S. Ellefsen tackles a controversial topic, the meaning of Prehistoric art. The author examines one of the main compositions in the Chauvet cave and how the rock shapes still visible in the face of Pont d'Arc -found right outside the cave- may have inspired the animals painted 36,000 years ago. This book challenges the preconceived notions about Paleolithic art, which commonly held

that Ice Age artists did not paint landscapes, and the representations of animals on the walls could not be conceived as mythical narratives. The author proposes that the composition known as the Lion Panel of the Chauvet cave, painted around 36,000 years ago, is the oldest known landscape painting and it is the key to understand the meaning of Paleolithic art. The book sheds light on how the Ice Age artists created a landscape painting as a composite image, which aggregated figures of animals to imitate the contours of Pont d'Arc –analogous to the paintings of 'therianthropes,' which were composite figures that combined parts of animals and humans in a single figure. With illustrations and photographs the book engages the reader in finding the

rock formations of Pont d'Arc and their astonishing resemblance to the head of a rhinoceros, the 'ball-feet' of the mammoths, and the head of a bison painted in the cave. This context gives the reader an insight into the paintings of the Chauvet cave and guides the reader to identify the symbolic value of the animals depicted, as well as the underlying narrative elements tied to the landscape. The author examines how a 36,000-year-old myth could have looked like and proposes that the Lion Panel was possibly conceived as a narrative describing the creation myth of the landscape. This research sheds light on how the Paleolithic artists represented the notions of safety, conflict and sacredness, and what are the teachings of these stories that allowed them to

survive for millennia. The author also explores the precursors of the Lion Panel and its successors, showing that the arrangement of paintings had a preconceived structure and an underlying narrative that allowed its transmission. The book explains the peculiar weather conditions of the Ardèche region and how the occupants of the Chauvet cave noticed these peculiarities. In the subsections “The

spring inside the Chauvet cave” and “A dripping mammoth on the ceiling” the author lays the foundation to understand the symbolism of springs and rain in the art of the Chauvet cave.
