The Monthly Magazine Edinburgh University Press

Taking the analysis of worldwide Christianity to a deeper level of detail, this volume focuses on Christianity in East and Southeast Asia, covering every country and offering both reliable demographic information and original interpretative essays by indigenous scholars and practitioners. It maps patterns of growth and decline, assesses major traditions and movements, analyses key themes, and examines current trends. As a comprehensive account of the presence of Christianity in every country in East and Southeast Asia, this volume is set to become a standard work of reference in its field.

The Works of Benjamin Franklin Routledge

The studies in the present volume, on the history of the Order of the Hospital between 1306 and 1522, are not only concerned with the part it played in the defence of the Latin Levant, but also with its role in Western society. The first articles deal with the settlement of Rhodes, the conflicts with the Turks, and with the Hospitallers' participation in crusading expeditions. As important, however, is the question of how they managed to support their military achievements. Drawing on the results of many years' research into the archives of the Hospital, both in Malta and in the provincial archives, Dr Luttrell examines their administration of the Rhodian islands and details some of the resources they drew from elsewhere, notably the West, whether in terms of recruitment, money raising or the exploitation of their estates. Particular attention is given to the Hospitaller properties in Italy and Spain, and to the nature of Hospitaller life in these western priories and commanderies.

Les études regroupées dans le présent volume, qui traitent de l'histoire de l'Ordre de l'Hôpital entre 1306 et 1522, ne s'attachent pas seulement au rôle joué par celui-ci dans la défense du Levant latin, mais aussi à son rôle dans la société occidentale. Les premiers articles s'intéressent à la colonisation de Rhodes, aux conflits avec les Turcs et à la participation des membres de l'Ordre aux expéditions croisées. La question de savoir comment ils parvinrent à financer leurs exploits militaires reste toutefois importante; s'appuyant sur les résultats obtenus après de nombreuses années de recherches dans les archives de l'Hôpital, à Malte et en province, le Dr Luttrell examine leur administration des îles rhodiennes et fait un compte-rendu qu'ils tirèrent d'ailleurs, notamment de l'Ouest, que ce soit en terme de recrutement, de collecte de fonds ou d'exploitation de leurs terres. Une attention plus particulière est portée sur

Biographie Universelle, Ancienne Et Moderne BRILL

During the past eight decades French vineyards, wineries, and wine marketing efforts have undergone such profound changes--from technological, scientific, economic, and commercial standpoints--that the transformation is revolutionary for an industry dating back thousands of years. Here Leo Loubre examines how the modernization of Western society has brought about new conditions in well-established markets, making the introduction of novel techniques and processes a matter of survival for winegrowers. Not only does Loubre explain how altered environmental conditions have enabled pioneering enologists to create styles of wine more suited to contemporary tastes and living arrangements, but he also discusses the social impact of the wine revolution on the employees in the industry. The third generation of this new viticultural regime has encountered working and living conditions drastically different from those of its predecessors, while witnessing the near disappearance of the working class and the decline of small and medium growers of ordinary wines. The Colossus of Rhodes is both the most famous and the least well-known monument of Ancient Greece. Numbered among the Seven Wonders of the World, this bronze statue of the god Helios, thirty-four metres in height, was created by the sculptor Chares of Lindos between the years 295 and 283 BC, only to be destroyed by an earthquake in 227 BC. The legends that have spread after its collapse seem so strange and contradictory that, from an archaeological point of view, it has become a minor and almost neglected object, which specialists in Greek sculpture barely mention in their work. In *The Colossus of Rhodes*, the first comprehensive examination of the Colossus, Nathan Badoud mobilises a large array of sources, ranging from antiquity to the present day, proposing an intellectual excavation through the layers of the literary, artistic, and scientific tradition to discover the historical Colossus. It envisages the statue in its religious, political, and topographical contexts, exploring its function, its technique, its appearance, its meaning, and its location. Badoud reconsiders the beginnings of the Hellenistic world, marked by the emergence of Rhodes as an imperial power, embodied by the Colossus.

In 1522, the Ottomans attacked the island of Rhodes and, after a six-month siege, the Hospitallers surrendered on terms. The Knights Hospitaller had ruled Rhodes since 1309, and the Ottomans had attempted to capture the island 40 years before in 1480, but were defeated by the Knights. The Ottoman victory in 1522 resulted in the Knights being expelled from the island and eventually settling in Malta, Gozo, and Tripoli and the Ottomans obtaining domination over the Eastern Mediterranean and its trade. This collection of essays, published on the 500th anniversary of the siege, explores such question as why Suleiman the Magnificent attacked Rhodes, what made the 1522 siege successful, and how the Rhodian population, the Knights Hospitaller, the Eastern and Western Mediterranean, and Europe in general were affected by the loss of Rhodes. The answers to these questions are explored in new research by expert historians and archaeologists in their field. This book will appeal to all those interested in the Knights Hospitaller, Ottoman History, Crusader Studies, and Early Modern European History.
