Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a clichê in Eurocentric gender studies. Affective health is conceptualized as a

balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social

sciences. Contributing to current debates on mental health and masculinity, the volume will be of interest to scholars from a number of disciplines including anthropology, gender studies, African studies, psychology and global health"--
MODEL Airplane NEWS
Courier Corporation
At the beginning of the Vietnam War, the Vietnam People's Air Force (VPAF) were equipped with slow, old Korean War generation fighters - a combination of MiG-17s and MiG-19s - types that should have offered little opposition to the cutting-edge fighter-bombers such as the F-4 Phantom II, F-105 Thunderchief and the F-8 Crusader. Yet when the USAF and US Navy unleashed

their aircraft on North Vietnam in 1965 the inexperienced pilots of the VPAF were able to shatter the illusion of US air superiority. Taking advantage of their jet's unequalled low-speed maneuverability, small size and powerful cannon armament they were able to take the fight to their missile-guided opponents, with a number of Vietnamese pilots racking up ace scores. Packed with information previously unavailable in the west and only recently released from archives in Vietnam, this is the first major analysis of the exploits of Vietnamese pilots in the David and Goliath contest with the US over the skies of Vietnam.
Affective Health and

Masculinities in South Africa Bloomsbury Publishing

Contains more than 350 bits of building advice from "Fine Homebuilding" magazine, covering fourteen areas including measuring and marking, site-built tools and jigs, masonry and foundation work, and electric and plumbing.

Dentists Weidenfeld & Nicolson

Open wide! Dentists care for people's teeth. Give readers the inside scoop on what it's like to be a dentist.

Readers will learn what dentists do, the tools they use, and how people get this exciting job.

Building Tips and Techniques Special Interest Model Books
A complete history of the design and

production of the Spitfire from its pre-war origins right through to the final variant post-war, some 20,400 aircraft later. Price records each stage of Spitfire development, accompanied by a collection of contemporary photographs.
