You're beautiful and kind and very smart. But best of all, you're mine. Do you remember the stories your Grandma used to tell you every night about cursed beasts, village beauties, girls in red capes and wolves in disguises? Well, maybe, just maybe... they actually do happen. Maybe, beasts do exist. They do. I would know. I am bound to one. Whom, you may ask? Well, I am mated to the Alpha King. How? You will see. You will live through it with me. I am Theia Anderson. I am just like any one of you, human, alive, and breathing. But unlike any one of you, I've stumbled upon a world that until yesterday... I couldn't even fathom into existence. This is my story.

Put aside everything you thought you knew about being human - about how we got here and what it all means. Australian theoretical biologist Danny Vendramini has developed a theory of human origins that is stunning in its simplicity, yet breathtaking in its scope and importance. Them and Us: how Neanderthal predation created modern humans begins with a radical reassessment of Neanderthals. He shows they weren't docile omnivores, but savage, cannibalistic carnivores - top flight predators of the stone age. Neanderthal Predation (NP) theory reveals that Neanderthals were 'apex' predators - who resided at the top of the food chain, and everything else - including humans - was their prey. NP theory is one of those groundbreaking ideas that revolutionizes scientific thinking. It represents a quantum leap in our understanding of human origins.

They say a mother will do anything for her child . . . I'm living proof This nightmare began when I got the call every parent dreads. My daughter, Jenna, was missing from her college campus. Of course, my mind went to the worst place. After all, my late husband was a powerful senator. Was this some political payback? I call in a favor and soon I'm partnered with an FBI sex trafficking agent. He tells me local girls have been disappearing for some time now, and he finally has a lead. But what we find at that abandoned warehouse is something out of a horror movie. Werewolves! Two rival packs, their alphas fighting, winner take all—the pack and the trafficked girls. The werewolves must replenish their breeders, recently decimated by a virus that killed only the females. But Jenna's been keeping a secret, which only makes two of us. Though I should be angry, I know the lies I've told play a huge role in why we're here. I'll do anything to make it right. No way is my girl going to become a sacrificial mate for the greater good—even if she is the 'chosen one.' So, I do what any mother would do, I take her place, offering myself to Gideon, the winning alpha, as his mate. Gideon's goal is to live in harmony with the human world, but there are others who exist for the power, for the violence, and they don't plan to let peace prevail. There's a civil werewolf war brewing and I am right in the middle of it.
