American Education Bonnier Zaffre Ltd.  
A beautiful commemorative edition of Dr. Martin Luther King's essay "Letter from Birmingham Jail," part of Dr. King's archives published exclusively by HarperCollins. With an afterword by Reginald Dwayne Betts On April 16, 1923, Dr. Martin Luther King Jr., responded to an

open letter written and published by eight white clergyman admonishing the civil rights demonstrations happening in Birmingham, Alabama. Dr. King drafted his seminal response on scraps of paper smuggled into jail. King criticizes his detractors for caring more about order than justice, defends nonviolent protests, and argues for the moral responsibility to obey just laws while disobeying unjust ones. "Letter from Birmingham Jail" proclaims a message - confronting any injustice is an acceptable and righteous

reason for civil disobedience. This beautifully designed edition presents Dr. King's speech in its entirety, paying tribute to this extraordinary leader and his immeasurable contribution, and inspiring a new generation of activists dedicated to carrying on the fight for justice and equality.

*Powering Through* CRC Press

A dark and compulsive medical thriller written by a doctor who has seen it all, perfect for fans of *Don't Wake Up* and *Tess Gerritsen*. 'A suspenseful and frightening thriller' Lynda La Plante Not all doctors are heroes . . . Renowned surgeon Michael Trenchard locks his office door and prepares for a relaxing evening. But what follows is a living nightmare when later he is discovered in a locked-in coma, the victim of an auto-erotic asphyxiation. It is left to Doctor Kash Devan, Trenchard's young protégé, to uncover the truth. And what he discovers is chilling . . . In his ruthless pursuit of wealth and success, Trenchard has left a trail of wrecked lives, and angry people, behind him. Which of Trenchard's victims hated him so much that they wanted to ruin not only his reputation, but his life as well?

Some issues, 1943-July 1948, include separately paged and numbered section

called Radio-electronic engineering edition (called Radionics edition in 1943).

*The London Gazette* University of Virginia Press

The face of the pedestrian safety crisis looks a lot like Ignacio Duarte-Rodriguez. The 77-year old grandfather was struck in a hit-and-run crash while trying to cross a high-speed, six-lane road without crosswalks near his son's home in Phoenix, Arizona. He was one of the more than 6,000 people killed while walking in America in 2018. In the last ten years, there has been a 50 percent increase in pedestrian deaths. The tragedy of traffic violence has barely registered with the media and wider culture.

Disproportionately the victims are like Duarte-Rodriguez—immigrants, the poor, and people of color. They have largely been blamed and forgotten. In *Right of Way*, journalist Angie Schmitt shows us that deaths like Duarte-Rodriguez's are not unavoidable "accidents." They don't happen because of jaywalking or distracted walking. They are predictable, occurring in stark geographic patterns that tell a story about systemic inequality.

These deaths are the forgotten faces of an

increasingly urgent public-health crisis that we have the tools, but not the will, to solve. Schmitt examines the possible causes of the increase in pedestrian deaths as well as programs and movements that are beginning to respond to the epidemic. Her investigation unveils why pedestrians are dying—and she demands action. *Right of Way* is a call to reframe the problem, acknowledge the role of racism and classism in the public response to these deaths, and energize advocacy around road safety. Ultimately, Schmitt argues that we need improvements in infrastructure and changes to policy to save lives. *Right of Way* unveils a crisis that is rooted in both inequality and the undeterred reign of the automobile in our cities. It challenges us to imagine and demand safer and more equitable cities, where no one is expendable.

The history of African Americans in southern Appalachia after the Civil War has largely escaped the attention of scholars of both African Americans and the region. In *Facing Freedom*, Daniel Thorp

relates the complex experience of an African American community in southern Appalachia as it negotiated a radically new world in the four decades following the Civil War. Drawing on extensive research in private collections as well as local, state, and federal records, Thorp narrates in intimate detail the experiences of black Appalachians as they struggled to establish autonomous families, improve their economic standing, operate black schools within a white-controlled school system, form independent black churches, and exercise expanded—if contested—roles as citizens and members of the body politic. Black out-migration increased markedly near the close of the nineteenth century, but the generation that transitioned from slavery to freedom in Montgomery County established the community institutions that would survive disenfranchisement and Jim Crow. *Facing Freedom* reveals the stories and strategies of those who pioneered these resilient bulwarks against the rising tide of racism.

The threats to the electricity grid are on the rise at the same time as society is increasing its dependence on electricity for every aspect of our personal, social, and economic lives. We are accelerating that dependence - looking to the

electrification of transportation and buildings as a way to stem the threats of climate change. Those threats have now arrived (in the form of more extreme weather, droughts, and wildfire) and they are joined by increasing threats from an aging grid and cyberattacks. The grid we rely on is experiencing increasingly vulnerable external forces. We aren't helpless. Effective planning around these threats can dramatically reduce the havoc they engender on the electric grid. At every level, from a single building, to a city, to the electric grid and the federal government, steps can be taken to improve our resilience to threats to the electricity system. When those efforts are coordinated, their benefits multiply. This book aims to provide every level of decision-maker with tools and best practices for reducing the risk of and from electricity loss. It is written in non-technical language, with a focus on actionable, easily implemented steps.
