As media environments and communication practices evolve over time, so do theoretical concepts. This book analyzes some of the most well-known and fiercely discussed concepts of the digital age from a historical perspective, showing how many of them have pre-digital roots and how they have changed and still are constantly changing in the digital era. Written by leading authors in media and communication studies, the chapters historicize 16 concepts that have become central in the digital media literature, focusing on three main areas. The first part, Technologies and Connections, historicises concepts like network, media convergence, multimedia, interactivity and artificial intelligence. The second one is related to Agency and Politics and explores global governance, datafication, fake news, echo chambers, digital media activism. The last one, Users and Practices, is finally devoted to telepresence, digital loneliness, amateurism, user generated content, fandom and authenticity. The book aims to shed light on how concepts emerge and are co-shaped, circulated, used and reappropriated in different contexts. It argues for the need for a conceptual media and communication history that will reveal new developments without concealing continuities and it demonstrates how the analogue/digital dichotomy is often a misleading one.

Calcium entry pathways in non-excitabile cells presents a concise synthesis of thoughtfully selected topics covering from the different calcium entry mechanisms in non-excitabile cells to the cellular microdomains and organelles regulating the calcium entry process. Particular attention is given to the fascinating group of ion channels involved in different calcium entry pathways as well as the emerging role of these channels in human disease. Calcium entry is an essential mechanism for cellular function in non-excitabile cells. In general, two main calcium entry pathways

exist in non-excitabile cells: one pathway, named store-operated calcium entry (SOCE) requires store depletion and the second pathway is regulated by receptor occupation, but independently on calcium store depletion. The search for the molecular components of calcium entry has identified the stromal interaction molecule 1 (STIM1), as the calcium sensor of the intracellular calcium stores, and Orai as well as TRP channels as the calcium-permeable channels located in the plasma membrane. The location, interactions and function of these channels are finely regulated by a number of scaffolding proteins, membrane microdomains and cellular organelles that fine tune the amount of calcium entering the cell. Cutting-edge and user-friendly, this volume presents relevant background information, critical analysis of the current observations and directions for future research. The book is intended for basic scientists specializing in cellular biology or ion transport, as well as for biomedical researchers.

The analysis of how institutions are formed, how they operate and change, and how they influence behavior in society has become a major subject of inquiry in politics, sociology, and economics. A leader in applying game theory to the understanding of institutional analysis, Elinor Ostrom provides in this book a coherent method for undertaking the analysis of diverse economic, political, and social institutions. Understanding Institutional Diversity explains the Institutional Analysis and Development (IAD) framework, which enables a scholar to choose the most relevant level of interaction for a particular question.

This framework examines the arena within which interactions occur, the rules employed by participants to order relationships, the attributes of a biophysical world that structures and is structured by interactions, and the attributes of a community in which a particular arena is placed. The book explains and illustrates how to use the IAD in the context of both field and experimental studies. Concentrating primarily on the rules aspect of the IAD framework, it provides empirical evidence about the diversity of rules, the calculation process used by participants in changing rules, and the design principles that characterize robust,

self-organized resource governance institutions.

In *Socialism of Fools*, Michele Battini focuses on the critical moment during the Enlightenment in which anti-Jewish stereotypes morphed into a sophisticated, modern social anti-Semitism. He recovers the potent anti-Jewish, anticapitalist propaganda that cemented the idea of a Jewish conspiracy in the European mind and connects it to the atrocities that characterized the Jewish experience in the nineteenth and twentieth centuries. Beginning in the eighteenth century, counter-Enlightenment intellectuals and intransigent Catholic writers singled out Jews for conspiring to exploit self-sustaining markets and the liberal state. These ideas spread among socialist and labor movements in the nineteenth century and intensified during the Long Depression of the 1870s. Anti-Jewish anticapitalism then migrated to the Habsburg Empire with the Christian Social Party; to Germany with the Anti-Semitic Leagues; to France with the nationalist movements; and to Italy, where Revolutionary Syndicalists made anti-Jewish anticapitalism the basis of an alliance with the nationalists. Exemplified best in the Protocols of the Elders of Zion, the infamous document that "leaked" Jewish plans to conquer the world, the Jewish-conspiracy myth inverts reality and creates a perverse relationship to historical and judicial truth. Isolating the intellectual roots of this phenomenon and its contemporary resonances, Battini shows us why, so many decades after the Holocaust, Jewish people continue to be a powerful political target.

Oral Surgery Univ of California Press

The creation of new lexical units and patterns has been studied in different research frameworks, focusing on either system-internal or system-external aspects, from which no comprehensive view has emerged. The volume aims to fill this gap by studying dynamic processes in the lexicon – understood in a wide sense as not being necessarily limited to the word level – by bringing together approaches directed to morphological productivity as well as approaches analyzing general types of lexical innovation and the role of discourse-related factors. The papers deal with ongoing changes as well as with historical processes of change in

different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers' motivations for innovating. Moreover, the diffusion and conventionalization of innovations will be addressed. In this way, the volume contributes to understanding the complex interplay of structural, cognitive and functional factors in the lexicon as a highly dynamic domain.

Written for Higher Education educators, managers and policy-makers, *Plagiarism, the Internet and Student Learning* combines theoretical understandings with a practical model of plagiarism and aims to explain why and how plagiarism developed. It offers a new way to conceptualize plagiarism and provides a framework for professionals dealing with plagiarism in higher education. Sutherland-Smith presents a model of plagiarism, called the plagiarism continuum, which usefully informs discussion and direction of plagiarism management in most educational settings. The model was developed from a cross-disciplinary examination of plagiarism with a particular focus on understanding how educators and students perceive and respond to issues of plagiarism. The evolution of plagiarism, from its birth in Law, to a global issue, poses challenges to international educators in diverse cultural settings. The case studies included are the voices of educators and students discussing the complexity of plagiarism in policy and practice, as well as the tensions between institutional and individual responses. A review of international studies plus qualitative empirical research on plagiarism, conducted in Australia between 2004-2006, explain why it has emerged as a major issue. The book examines current teaching approaches in light of issues surrounding plagiarism, particularly Internet plagiarism. The model affords insight into ways in which teaching and learning approaches can be enhanced to cope with the ever-changing face of plagiarism. This book challenges Higher Education educators, managers and policy-makers to examine their own beliefs and practices in managing the phenomenon of plagiarism in academic writing.

Catalog Penn State Press

The classic work on the music of Afrofuturism, from jazz to jungle *More Brilliant than the Sun: Adventures in Sonic Fiction* is one of the most extraordinary books on music ever written. Part

manifesto for a militant posthumanism, part journey through the unacknowledged traditions of diasporic science fiction, this book finds the future shock in Afrofuturist sounds from jazz, dub and techno to funk, hip hop and jungle. By exploring the music of such musical luminaries as Sun Ra, Alice Coltrane, Lee Perry, Dr Octagon, Parliament and Underground Resistance, theorist and artist Kodwo Eshun mobilises their concepts in order to open the possibilities of sonic fiction: the hitherto unexplored intersections between science fiction and organised sound. Situated between electronic music history, media theory, science fiction and Afrodiasporic studies, *More Brilliant than the Sun* is one of the key works to stake a claim for the generative possibilities of Afrofuturism. Much referenced since its original publication in 1998, but long unavailable, this new edition includes an introduction by Kodwo Eshun as well as texts by filmmaker John Akomfrah and producer Steve Goodman aka kode9.

Why are carefully designed, sensible policies too often not adopted or implemented? When they are, why do they often fail to generate development outcomes such as security, growth, and equity? And why do some bad policies endure? *World Development Report 2017: Governance and the Law* addresses these fundamental questions, which are at the heart of development. Policy making and policy implementation do not occur in a vacuum. Rather, they take place in complex political and social settings, in which individuals and groups with unequal power interact within changing rules as they pursue conflicting interests. The process of these interactions is what this Report calls governance, and the space in which these interactions take place, the policy arena. The capacity of actors to commit and their willingness to cooperate and coordinate to achieve socially desirable goals are what matter for effectiveness. However, who bargains, who is excluded, and what barriers block entry to the policy arena determine the selection and implementation of policies and, consequently, their impact on development outcomes. Exclusion, capture, and clientelism are manifestations of power asymmetries that lead to failures to achieve security, growth, and equity. The distribution of power in society is partly determined by history. Yet, there is room for positive change. This Report reveals that governance can mitigate, even overcome, power asymmetries to bring about more effective policy

interventions that achieve sustainable improvements in security, growth, and equity. This happens by shifting the incentives of those with power, reshaping their preferences in favor of good outcomes, and taking into account the interests of previously excluded participants. These changes can come about through bargains among elites and greater citizen engagement, as well as by international actors supporting rules that strengthen coalitions for reform.

En este viaje transcontinental pasaremos por África, Europa, Oceanía, y las Américas, conociendo situaciones lingüísticas de lo más diversas, en las cuales encontraremos lenguas que parecen haber caído en coma, otras que despiertan, o se refuerzan, se recrean y dinamizan en distintos grados. Las situaciones y experiencias que se presentan son diversas, heterogéneas y retadoras, al igual que los esfuerzos que se despliegan desde distintos frentes, ya sea desde las familias, las comunidades de habla, las de práctica, las diaspóricas; o desde la academia o las instancias políticas. Todavía, estos esfuerzos son insuficientes; y es que la pérdida de las lenguas, no solo conlleva el olvido de palabras o frases, sino de valores, principios y formas de vida inmersos en contextos históricos complejos, por lo general caracterizados por ideologías lingüísticas negativas interseccionadas, que poco aportan a su revitalización. De ahí, la importancia de desarrollar procesos integrales, situados, que vayan más allá del sistema lingüístico a la defensa de los derechos humanos, y la búsqueda de justicia social.

Deze bundel gaat over de vorming van identiteit door het samenspel van etniciteit, nationalisme en de effecten van globalisering. De essays in *Crossroad Civilisations: Ethnicity, Nationalism and Globalism in Asia* maken de gelaagdheid en de complexiteit hiervan duidelijk.

*Identity in Crossroad Civilisations* Syracuse University Press  
The past is what happened. History is what we remember and write about that past, the narratives we craft to make sense out of our memories and their sources. But what does it mean to look at the past and to remember that "nothing happened"? Why might we feel as if "nothing is the way it was"? This book transforms these utterly ordinary observations and redefines

"Nothing" as something we have known and can remember. "Nothing" has been a catch-all term for everything that is supposedly uninteresting or is just not there. It will take some—possibly considerable—mental adjustment before we can see Nothing as Susan A. Crane does here, with a capital "n." But Nothing has actually been happening all along. As Crane shows in her witty and provocative discussion, Nothing is nothing less than fascinating. When Nothing has changed but we think that it should have, we might call that injustice; when Nothing has happened over a long, slow period of time, we might call that boring. Justice and boredom have histories. So too does being relieved or disappointed when Nothing happens—for instance, when a forecasted end of the world does not occur, and millennial movements have to regroup. By paying attention to how we understand Nothing to be happening in the present, what it means to "know Nothing" or to "do Nothing," we can begin to ask how those experiences will be remembered. Susan A. Crane moves effortlessly between different modes of seeing Nothing, drawing on visual analysis and cultural studies to suggest a new way of thinking about history. By remembering how Nothing happened, or how Nothing is the way it was, or how Nothing has changed, we can recover histories that were there all along. Haiti may well be the only country in the Americas with a last name. References to the land of the "black Jacobins" are almost always followed by the phrase "the poorest country in the Western Hemisphere". To that dubious distinction, on 12 January 2010 Haiti added another, when it was hit by the most devastating natural disaster in the Americas, a 7.0 Richter scale earthquake. More than 220,000 people lost their lives and much of its vibrant capital, Port-au-Prince, was reduced to rubble. Since 2004, the United Nations has been in Haiti through MINUSTAH, in an ambitious attempt to help Haiti raise itself by its bootstraps. This effort has now acquired additional urgency. Is Haiti a failed state? Does it deserve a Marshall-plan-like program? What will it

take to address the Haitian predicament? In this book, some of the world's leading experts on Haiti examine the challenges faced by the first black republic, the tasks undertaken by the UN, and the new role of hemispheric players like Argentina, Brazil and Chile, as well as that of Canada, France and the United States. [The Encyclopaedia Britannica ...](#) BRILL

The book analyzes the place of religious difference in late modernity through a study of the role played by Jews and Muslims in the construction of contemporary Spanish national identity. The focus is on the transition from an exclusive, homogeneous sense of collective Self toward a more pluralistic, open and tolerant one in an European context. This process is approached from different dimensions. At the national level, it follows the changes in nationalist historiography, the education system and the public debates on national identity. At the international level, it tackles the problem from the perspective of Spanish foreign policy towards Israel and the Arab-Muslim states in a changing global context. From the social-communicational point of view, the emphasis is on the construction of the Self-Other dichotomy (with Jewish and Muslim others) as reflected in the three leading Spanish newspapers. [Voces indígenas amenazadas y el despertar de sus lenguas](#) Univ of California Press

This book covers a wide range of topics in oral surgery with detailed, step-by-step analysis of surgical techniques, with many examples. Various aspects of surgical techniques are analyzed. These include the instruments and materials used in oral surgery, types of flaps and suturing techniques, radiographic techniques, complications and treatment, and odontogenic infections. Also covered is the latest scientific information concerning preventive and therapeutic use of antibiotics in dentistry. The abundant photographic material, together with figures which are of excellent quality, make this book a must in every dental library. [United States Code Service, Lawyers Edition](#) Lexington Books

In 1803 in the colonial South American city of La Plata, Doña Martina Vilvado y Balverde presented herself to church and crown officials to denounce her husband of more than four years, Don Antonio Yta, as a "woman in disguise." Forced to submit to a medical inspection that revealed a woman's body, Don Antonio confessed to having been María Yta, but continued to assert his maleness and claimed to have a functional "member" that

appeared, he said, when necessary. Passing to América is at once a historical biography and an in-depth examination of the sex/gender complex in an era before "gender" had been divorced from "sex." The book presents readers with the original court docket, including Don Antonio's extended confession, in which he tells his life story, and the equally extraordinary biographical sketch offered by Felipa Ybañez of her "son María," both in English translation and the original Spanish. Thomas A. Abercrombie's analysis not only grapples with how to understand the sex/gender system within the Spanish Atlantic empire at the turn of the nineteenth century but also explores what Antonio/María and contemporaries can teach us about the complexities of the relationship between sex and gender today. Passing to América brings to light a previously obscure case of gender transgression and puts Don Antonio's life into its social and historical context in order to explore the meaning of "trans" identity in Spain and its American colonies. This accessible and intriguing study provides new insight into historical and contemporary gender construction that will interest students and scholars of gender studies and colonial Spanish literature and history. This book is freely available in an open access edition thanks to TOME (Toward an Open Monograph Ecosystem)—a collaboration of the Association of American Universities, the Association of University Presses and the Association of Research Libraries—and the generous support of New York University. Learn more at the TOME website: [openmonographs.org](http://openmonographs.org).

Abstract:

**Jews and Muslims in Contemporary Spain** Premières loges

In this book, the author develops a relational concept of space that encompasses social structure, the material world of objects and bodies, and the symbolic dimension of the social world. Löw's guiding principle is the assumption that space emerges in the interplay between objects, structures and actions. Based on a critical discussion of classic theories of space, Löw develops a new dynamic theory of space that accounts for the relational context in which space is constituted. This innovative view on the interdependency of material, social, and symbolic dimensions of space also permits a new perspective on architecture and urban development.

The essays in this book critically examine the ways in which gendered subjects negotiate their life-worlds in Middle Eastern, South Asian, and African urban landscapes. They raise issues surrounding the city as a representative site of personal autonomy and political possibilities for women and/or men.

*World Development Report 2017* Walter de Gruyter GmbH & Co KG

The Castrato is a nuanced exploration of why innumerable boys

were castrated for singing between the mid-sixteenth and late-nineteenth centuries. It shows that the entire foundation of Western classical singing, culminating in bel canto, was birthed from an unlikely and historically unique set of desires, public and private, aesthetic, economic, and political. In Italy, castration for singing was understood through the lens of Catholic blood sacrifice as expressed in idioms of offering and renunciation and, paradoxically, in satire, verbal abuse, and even the symbolism of the castrato's comic cousin Pulcinella. Sacrifice in turn was

inseparable from the system of patriarchy—involving teachers, patrons, colleagues, and relatives—whereby castrated males were produced not as nonmen, as often thought nowadays, but as idealized males. Yet what captivated audiences and composers—from Cavalli and Pergolesi to Handel, Mozart, and Rossini—were the extraordinary capacities of castrato voices, a phenomenon ultimately unsettled by Enlightenment morality. Although the castrati failed to survive, their musicality and vocality have persisted long past their literal demise.
