This book is concerned to explore the changing role of the Parole Board across the range of its responsibilities, including the prediction of risk and deciding on the release (or continued detention) of the growing number of recalled prisoners and of those subject to indeterminate sentences. In doing so it aims to rectify the lack of attention that has been given by lawyers, academics and practitioners to back door sentencing (where the real length of a sentence is decided by those who take the decision to release) compared to front door sentencing' (decisions taken by judges or

magistrates in court). Particular attention is given in this book to the important changes made to the role and working of the Parole Board as a result of the impact of the early release scheme of the Criminal Justice Act 2005, with the Parole Board now deciding in Panels concerned with determinate sentence prisoners, lifers and recalled prisoners. A wide range of significant issues, and case law, has arisen as a result of these changes, which the contributors to this book, leading authorities in the field, aim to explore.

The Persuasion Handbook provides readers with cogent, comprehensive summaries of research in a wide range of areas related to persuasion. From a topical standpoint, this handbook takes an interdisciplinary approach, covering issues of interest to interpersonal and mass communication researchers as well as psychologists and public health practitioners. Persuasion is presented in this volume on a micro to macro continuum, moving from chapters on cognitive processes, the individual, and theories of persuasion to chapters highlighting broader social factors and phenomena related to persuasion, such as social context and larger scale persuasive campaigns. Each chapter identifies key challenges to the area and lays out research strategies for addressing those challenges.

Manual of Forensic Emergency Medicine is a comprehensive guide to the clinical approach to criminal illness and injury. This resource offers emergency care professionals the knowledge needed to make an accurate diagnosis of abuse, neglect, sexual assault or other conditions in which forensic investigation is needed. This book offers information on victim services and resources available for patients, as well as relevant aspects of the legal system. This essential guide contains color photos, a forensic glossary, and forensic forms that can be used in a clinical practice. Key Topics include Forensic Documentation, Firearms, Evidence Collection in the ED, and Gang Violence.

The Calendar of Owens college, Manchester SAGE Publications

Handbook of Forensic Mental Health Services focuses on assessment, treatment, and policy issues regarding juveniles and adults in the criminal and civil systems. Uniquely, this volume is designed for professionals who deliver mental health services, rather than researchers. Just like its parent series, its goal revolves around improving the quality of mental health care services in forensic settings. It achieves this by integrating the findings related to clinical practice, administration, and policy from trends and best practice internationally that mental health professionals can implement.

The most efficient, readable, and reasonable option for preparing for the Texas Medical Jurisprudence Examination, a required test for physician licensure in Texas. The goal of this study guide is to hit the sweet spot between concise and terse, between reasonably inclusive and needlessly thorough. This short book is intended to be something that you can read over a few times

for a few hours before your test and easily pass for a reasonable price, with enough context to make it informative and professionally meaningful without being a \$200 video course or a 300-page legal treatise. After all, the Texas JP exam isn't Step 1-it's a \$58 pass/fail test!

A Handbook of Medical and Surgical Electricity The Oxford Handbook of Counseling Psychology Truly global in scope and with contributions from leading researchers around the world, The Handbook of Cannabis is the definitive resource on this fascinating drug. Combining scientific perspectives and clinical applications, it covers a vast array of topics, from why over the centuries cannabis has been used as a medicine, through the regulations facing those wishing to self-administer cannabis or provide cannabis-based medicines, to the chemical structure of its many constituents and the rapidly growing group of synthetic cannabinoids that are currently being used for 'legal highs'. With each chapter written by a group of one or more internationally recognised subject experts, it provides academics and researchers with authoritative scientific material on the main pharmacological actions and their effects, as well as their pharmacokinetics, metabolism, and forensic detection. In addition it also examines the complex morphology, cultivation, harvesting, and processing of cannabis and the ways in which the plant's chemical composition can be controlled. As well as offering a raft of scientific information there is extensive coverage of cannabinoid-based medicines. Helping readers to identify and evaluate their benefits, chapters explore pharmacological actions and the effects that seem to underlie approved therapeutic uses, how they are currently used to treat certain disorders, and the ever-growing number of wide-ranging potential clinical applications. There is also coverage of both the legal and illegal sources of cannabis, including 'coffee shops' and 'cannabis dispensaries'. The complex issue of 'recreational cannabis' is also tackled. The sought-after and adverse psychological and non-psychological effects are described and discussions are included on how some adverse effects can be lessened by at least one constituent of cannabis, and that it might be possible to reduce the harm that cannabis does to some by changing current regulatory policies. The Handbook of Cannabis is a one-stop reference; essential reading for all clinicians, pharmacologists, psychologists, and psychiatrists interested in this drug, as well as those working in the field of public health.
