Chosen Soldier Crown

We could call this book Special Operations Recon Mission Impossible. A small group of highly trained, resourceful US Special Forces (SF) men is asked to go in teams behind the enemy lines to gather intelligence on the North Vietnamese Army units that had infiltrated through Laos and Cambodia down the Ho Chi Minh trails to their

secret bases inside the Cambodian border west of South Vietnam. The covert reconnaissance teams, of only two or three SF men with four or five experienced indigenous mercenaries each, were tasked to go into enemy target areas by foot or helicopter insertion. They could be 15 kilometers beyond any other friendly forces, with no artillery support. In sterile uniforms - with no insignia or identification, if they were killed or captured, their government would deny their military connection. The enemy had placed a

price on their heads and had spies in their Top Secret headquarters known as SOG. SOG had three identical recon ground units along the border areas. This book tells the history of Command and Control Detachment South (CCS). The CCS volunteer warriors and its Air Partners the Army and Air Force helicopter transport and gunship crews who lived and fought together and sometimes died together. This is the first published history of CCS as compiled by its last living commander, some forty years after they were disbanded. It tells of the struggles and intrigue involved in SOGs development as the modern-day legacy of our modern Special Operations Commands. Forbidden to tell of their experiences for over twenty years; their After Action Reports destroyed even

before they were declassified surviving veterans team together to tell how Recon men wounded averaged 100 percent; and SOG became the most highly decorated unit in Vietnam and all were awarded the Presidential Unit Citation.

The INSTANT New York Times bestseller
Instant Los Angeles Times bestseller “In
Nuclear War: A Scenario, Annie Jacobsen
gives us a vivid picture of what could
happen if our nuclear guardians
fail...Terrifying.”—Wall Street Journal

There is only one scenario other than an
asteroid strike that could end the world
as we know it in a matter of hours:
nuclear war. And one of the triggers for
that war would be a nuclear missile
inbound toward the United States. Every
generation, a journalist has looked deep
into the heart of the nuclear military
establishment: the technologies, the
safeguards, the plans, and the risks.
These investigations are vital to how we
understand the world we really live

in—where one nuclear missile will beget
one in return, and where the
choreography of the world’s end requires
massive decisions made on seconds’
notice with information that is only as
good as the intelligence we have.

Pulitzer Prize finalist Annie Jacobsen’s
Nuclear War: A Scenario explores this
ticking-clock scenario, based on dozens
of exclusive new interviews with military
and civilian experts who have built the
weapons, have been privy to the
response plans, and have been
responsible for those decisions should
they have needed to be made. *Nuclear
War: A Scenario* examines the handful of
minutes after a nuclear missile launch. It
is essential reading, and unlike any other
book in its depth and urgency.
