Democratic Transition and Security in Pakistan Vij Books India Pvt Ltd

This new handbook provides a wide-ranging overview of the current state of academic analysis and debate on insurgency and counterinsurgency, as well as an up-to-date survey of contemporary insurgent movements and counter-insurgencies. In recent years, and more specifically since the insurgency in Iraq from 2003, academic interest in insurgency and counterinsurgency has substantially increased. These topics have become dominant themes on the security

agenda, replacing peacekeeping, humanitarian operations and terrorism as key concepts. The aim of this volume is to showcase the rich thinking that is available in the area of insurgency and counterinsurgency studies and act as a further guide for study and research. In order to contain this wide-ranging topic within an accessible and informative framework, the Editors have divided the text into three key parts: Part I: Theoretical and Analytical Issues Part II: Insurgent Movements Part III: Counterinsurgency Cases The Routledge Handbook of Insurgency and Counterinsurgency will be of great interest to

all students of insurgency and small wars, terrorism/counter-terrorism, strategic studies, security studies and IR in general, as well as professional military colleges and policymakers.

Military justice systems across the world are in a state of transition. These changes are due to a combination of both domestic and international legal pressures. The domestic influences include constitutional principles, bills of rights and the presence of increasingly strong oversight bodies such as parliamentary committees. Military justice has also come under pressure from

international law, particularly when applied on operations. The common theme in these many different influences is the growing role of external legal principles and institutions on military justice. This book provides insights from both scholars and practitioners on reforms to military justice in individual countries (including the UK, Canada, the Netherlands and Australia) and in wider regions (for example, South Asia and Latin America). It also analyses the impact of 'civilianisation', the changing nature of operations and the decisions of domestic and international courts on efforts to reform military justice.

The Idea of Pakistan

Waxmann Verlag

This volume examines the trajectory of Pakistan's democratic transition and the implications of this change for its security. In May 2013, for the first time in its 66-year history, Pakistan saw an elected government complete a full term in office and transfer power through the ballot box to another civilian government. At this important moment in Pakistan's history, this collection brings together twelve leading academics and writers with an aim to provide a far-reaching analysis of the current situation in Pakistan and emergent trends. Drawing on history, diverse theoretical perspectives, and empirical evidence, three themed sections deal respectively with

democratic transition (including Islam and democracy, civil-military relations, and economics), contested borders and contested spaces (the Pashtun belt, Kashmir, and intra-Islamic conflict), and regionalism (bilateral relations from both Pakistani and Indian perspectives, US-Pakistan relations, and nuclear weapons dynamics). Together the contributors explore the status of Pakistan's democratic transition, contemporary security dynamics, and wider regional security and political dynamics, and the complex interplay of the three, to provide a wide-ranging analysis of Pakistan's contemporary national and regional challenges, its impact on the region, and

evidence of some positive trends for Pakistan's future. The book will be of much interest to students of South Asian politics, Asian security, governance, and IR in general as well as policy-makers, diplomats, and military professionals.

Summary.

Out of Islam IGI

Global

When Pakistan was carved out of India in 1947 as a homeland for the Muslims of the subcontinent, it was envisioned as a secular state where non-Muslims would be granted freedom of religion and equal citizenship. However, the subsequent historical events led to a fast Islamization of nearly every part of public life and discrimination against the country's religious minorities, who today make up less than 4 per cent of the overall population. Based on extensive field work involving more than 100 non-structured qualitative interviews, this study explores the situation of the religious minorities and the dynamics of interfaith

peacebuilding in the Islamic Republic of Pakistan. Primary focus was laid on the practice of interfaith dialogue, which - given the draconic blasphemy laws - differs from interfaith dialogue as conceived of in the West. Additionally, other peacebuilding measures, as offered by various non-governmental organizations, were taken into account, be they advocacy, promotion of human rights and unbiased education, or policy negotiation with the government. Heike Ruhland holds two master's degrees, one in Islamic Studies (University of Zurich) and one in International Information Management

(University of Hildesheim). She attained her PhD from the Academy of World Religions, University of Hamburg.

Lt Gen Sagat Singh is unarguably the only military genius post independence India has produced. He commenced his military career through humble beginnings in the Bikaner State Forces with only a smattering knowledge

of English. At the outbreak of World War 2 he was commissioned as an officer and served in the Middle East with his Battalion and on staff. By the time the War was over he was the only officer to have done two staff courses, including the prestigious course at Quetta. On being absorbed into the Indian Army after Independence, he was transferred to 3rd Gorkha Rifles, where he commanded two battalions. He was given command of the Para Brigade on promotion and led it in the Goa Operations with aplomb. He was primarily responsible for liberating this Portuguese Colony. Sagat's drive and energy stood out. On promotion as Major

General, he commanded 17 Mountain Division in Sikkim, where in 1967, in a bloody skirmish which lasted several days, he gave the Chinese a bloody nose, proving that the Indian Army was no pushover. That year he was transferred to Shillong and tasked to curb the Mizo Insurgency. In two years he succeeded in doing so effectively. In 1970, he was promoted to Lt Gen and given command of 4 Corps. It seemed his whole life was geared to leading a Corps into battle. In 1971, in a major logistic achievement he moved and staged his Corps at Agartala. When operations commenced to liberate Bangladesh, his Corps relentlessly attacked and defeated Pakistan forces,

crossed river lines and terrain considered impassable. His innovative use of helicopters has never been repeated. His is the only example in the Indian Army of a successful corps level campaign, which can stand out historically. His knowledge of the operational art was perhaps without parallel. He retired in Dec 1974 and settled down in Jaipur, where till his death in 2001, he tried to ameliorate the lives of ex-servicemen and his people. His achievements were recognised by the Government of Bangladesh, when the President, publicly and formally honoured his son and daughter-in-law in Mar 2013. Security, Strategy and Military Change in the

21st Century KW

Publishers Pvt Ltd

This book analyses the strategic and economic significance of the

China-Pakistan

Economic Corridor

(CPEC), with a

particular focus on the region of Balochistan.

Given the history of multiple insurgencies

that the Pakistani

Military has confronted

in Balochistan, the

book examines the

region's intricate

conflict ecosystem and

security landscape,

which poses potential

threats to the CPEC.

Structured

chronologically, the

book traces the

evolution of the

Pakistani Army's

counterinsurgency

practices inherited in

1947 from the British

Indian Army's culture

of fighting small wars

through to the

contemporary

counterinsurgency

(COIN) adaptation in

the 'war on terror', and

afterwards, to the fifth

round of the

Balochistan

insurgency. The

analysis centres on the

development of

counterinsurgency

theory and practice by

the Pakistani Army. It

empirically

investigates the

efficacy of the COIN

strategy in Balochistan.

The author argues that

the approach

significantly changed

after conceptualising

the doctrine, especially

from 2016 onwards,

from 'butcher and bolt'

to the inclusion of

critical components

like political primacy,

affect-based and

focused use of force,

'winning hearts and

minds' and rules of

engagement. As a

result, there was reduced violence and an increased number of insurgent surrenders. The book concludes that the Pakistani Army has largely controlled the insurgency in Balochistan. However, simultaneously, there is an urgent need to reduce tangible support to the insurgents through porous borders and implement an effective strategy to sever the nexus between the Islamic State of Khorasan (ISKP) and the Baloch insurgent organisations, as well as the sectarian militant organisations in Balochistan province. This is crucial to ending the insurgency and ensuring the security of CPEC. A novel contribution to the

study of counterinsurgency and the importance of CPEC to China's foreign policy and diplomacy, as well as its effects on the conflict dynamics in Balochistan, the book will be of interest to researchers studying War and Conflict Studies, Terrorism Studies, International Relations, Security and Strategic Studies, and South Asian and Chinese Studies.

Pratigyogita Darpan

Vij Books India Pvt Ltd
This path-breaking volume reveals a little-known aspect of how Lashkar-e-Tayyaba, a jihadist terrorist group, functions in Pakistan and beyond by translating and commenting upon a range of publications produced and disseminated by Dar-ul-Andlus, the

publishing wing of LeT. Only a fraction of LeT's cadres ever see battle: most of them are despatched on nationwide "prozelytising" (dawa) missions to convert Pakistanis to their particular interpretation of Islam, in support of which LeT has developed a sophisticated propagandist literature. This canon of Islamist texts is the most popular and potent weapon in LeT's arsenal, and its scrutiny affords insights into how and who the group recruits; LeT's justification for jihad; its vision of itself in global and regional politics; the enemies LeT identifies and the allies it cultivates; and how and where it conducts its operations. Particular attention is paid to the

role that LeT assigns to women by examining those writings which heap extravagant praise upon the mothers of aspirant jihadis, who bless their operations and martyrdom. It is only by understanding LeT's domestic functions as set out in these texts that one can begin to appreciate why Pakistan so fiercely supports it, despite mounting international pressure to disband the group.

This is an absolutely factual and truthful narration of occurrences in the life of the author, who is an immigrant from one of the South Asian countries. The events are told in the best

possible storytelling manner and are kept as interesting as possible. I had never even thought of writing my true life history because it is mostly a private thing, and customarily, it is guarded as a state secret by almost everyone. It so happened that remaining under continuous threat and depression made me a psychiatric patient, and I had to seek medical help. I was referred to a psychiatrist who, during one of his sessions, advised me to write my life history briefly. I did so and presented the few pages to him during my next visit. He read it and liked the narration. I noticed that after a couple of paragraphs, there was a broad smile on his

face, which remained there till end. I decided that I would bring a similar smile on the faces of people who would care to read my recital. Read on, my dear reader. You wouldnt be disappointed.

The Gazette of Pakistan APH Publishing

This edited volume explores and analyses strategic thinking, military reform and adaptation in an era of Asian growth, European austerity and US rebalancing. A significant shift in policy, strategy and military affairs is underway in both Asia and Europe, with the former gaining increasing prominence in the domain of global security. At the same time, the world's powers are now faced

with an array of diverse challenges. The resurgence of great power politics in both Europe and Asia, along with the long term threats of terrorism, piracy and sustained geopolitical instability has placed great strain on militaries and security institutions operating with constrained budgets and wary public support. The volume covers a wide range of case studies, including the transformation of China's military in the 21st century, the internal and external challenges facing India, Russia's military modernization program and the USA's reassessment of its strategic interests. In doing so, the book provides the reader with the opportunity to conceptualize how

strategic thinking, military reform, operational adaptation and technological integration have interacted with the challenges outlined above. With contributions by leading scholars and practitioners from Europe and Asia, this book provides a valuable contribution to the understanding of strategic and operational thinking and adjustment across the world. This book will be of much interest to students of military and strategic studies, security studies, defence studies, Asian politics, Russian politics, US foreign policy and IR in general.

Perseverance, trust and fond expectations will change what seems impossible in the long run. The two friends Fatima and Lavanya testified that they are truly hard workers by leading an exemplary life.

Moreover, females, whom most of us feel they should be married off soon so that we could wash off our hands, are infact treasure of obedience and hard work. Once, women are committed they are bound to win everything they touch.

An Army Oxford University Press

In recent years, technology has permeated every aspect of daily life and has drastically increased accessibility and empowerment for all demographics.

Smart technologies and mobile applications now have the ability to promote and protect the basic rights of children, women, and men alike. A child's right to education and mental growth or a woman's socio-economic stability and protection from physical, sexual, and emotional abuse can all be attributed to these advancements. Mobile Devices and Smart Gadgets in Human Rights provides emerging research exploring the theoretical and practical applications of technology in relation to human ethical treatment and interactions. Featuring coverage on a broad range of topics such as public safety, augmented reality, and safety apps, this book

is ideally designed for researchers, students, activists, academicians, policymakers, and government officials seeking current research on the influence of portable technologies in human rights and ethics.

The Pakistan Army is poised for perpetual conflict with India which it cannot win militarily or politically. What explains Pakistan's persistent revisionism despite increasing costs and decreasing likelihood of success? This book argues that an understanding of the army's strategic

culture explains its willingness to fight to the end

Debates Mereo Books, mereobook, mereobooks

The Bangladesh War of Liberation was fought in several fronts by people in all walks of life. While the main war is largely known by the battles fought by brave freedom fighters both inside and outside the borders of then East Pakistan, much of the war's success depended on the resistance and random acts of bravery by people in all nooks and corners of the country. The ranks of these unknown and forgotten fighters for liberty were filled by students, farmers, small shop keepers, and village wives. They are the unsung heroes of the war of liberation who

people may not remember. The author of this book spent much of the dark nine-month period as a young chief of civil administration two sub-districts (called sub-divisions) of the then Dhaka district- Munshiganj and Manikganj. Like the vast majority of his civil service colleagues working in the country that time he served under the watchful eyes of a malevolent army dictatorship, helplessly watching the atrocities as they continued to occur during those terrible months. Like all Bengali government officers working in the country that time he was a suspect in the eyes of the occupation forces and was subject to surveillance. While working through the

difficult times the author also had the occasions to hear and witness some courageous acts of our people that in their own way registered a protest against the atrocities, and even frustrated the cruel agents of Pakistan Government. The articles in this book are the author's personal accounts of events and occurrences in the most turbulent period of the national history of Bangladesh. Some of these are simply narrations of some dire events, some are stories of chicanery and treachery, and some are stories of bravery of people in the villages who suffered the tumultuous time. The book is an assembly of these articles around a common theme, and a

message that 1971 was essentially a people's war, a war we all fought to rid us of an evil that had descended on us, and had launched a wanton act of aggression and mayhem. The recollections are expected to help our new generation to realize that our freedom did not come cheap; and that the harrowing experience of their previous generation and the murderous sufferings they endured knew no gender or religious boundaries. All of the articles were published earlier in Dailies and Magazines in Bangladesh. My Daughter's desire International Labour Organization During emergency situations, society relies upon the efficient

response time and effective services of emergency facilities that include fire departments, law enforcement, search and rescue, and emergency medical services (EMS). As such, it is imperative that emergency crews are outfitted with technologies that can cut response time and can also predict where such events may occur and prevent them from happening. The safety of first responders is also of paramount concern. New tools can be implemented to map areas of vulnerability for emergency responders, and new strategies can be devised in their training to ensure that they are conditioned to respond efficiently to an emergency and also

conscious of best safety protocols. Improving the Safety and Efficiency of Emergency Services: Emerging Tools and Technologies for First Responders addresses the latest tools that can support first responders in their ultimate goal: delivering their patients to safety. It also explores how new techniques and devices can support first responders in their work by addressing their safety, alerting them to accidents in real time, connecting them with medical experts to improve the chances of survival of critical patients, predicting criminal and terrorist activity, locating missing persons, and allocating resources. Highlighting a range of topics such

as crisis management, medical/fire emergency warning systems, and predictive policing technologies, this publication is an ideal reference source for law enforcement, emergency professionals, medical professionals, EMTs, fire departments, government officials, policymakers, IT consultants, technology developers, academicians, researchers, and students.

Jeremy Clarkson borrowed my Blog - Volume 4 Xlibris Corporation

The book explains genesis, expansion, development, and modernisation of the Pakistan Army. It undertakes only the Pakistan Army and does not include the

Pakistan Navy and the Pakistan Air Force. The book comprehensively explains and analyses the Pakistan Army.

Initially, Pakistan had faced several challenges to meet its defence needs.

Pakistan pursued strategy of external alignment to get arms and financial assistance. Pakistan obtained arms from various sources such as the US, Britain, China, Russia (former USSR), France, and others. It explains Pakistan's tie with arms suppliers and dynamics in their relationships. China transferred not only arms to Pakistan but also assisted in establishing defence industries. Pakistan-China complex relationship and Beijing's arms transfer

policy towards Islamabad added intricacies in the regional security. Pakistan's arms acquisitions policy helped not only in expanding and modernising the Pakistan Army but also contributed in

expanding and strengthening the defence industrial base. With the 550000 strength, modern and sophisticated arms, missiles and nuclear capable delivery missiles, the Pakistan Army has emerged a force in the region.
