Resources in Education Oxford University Press - Children  
This series has been developed for the Cambridge Lower Secondary Global Perspectives Curriculum Framework (1129). This Stage 9 learner's skills book

helps students develop key 21st century skills, including research, analysis and more. Written by experienced teacher and author, Keely Laycock, learners are encouraged to reflect on your chosen topics - such as sport and recreation or language and communication - at a personal, national and global level. This series enables students to develop skills for their future in a scaffolded and measurable way, and has been produced

with feedback from teachers and students all around the world.

Educational Data Collins

I am very pleased to have been asked by Rod Gerber to provide a preface to such a book. Not least because of the twenty-four chapters, eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education. It is with a certain pride and joy that I note

the progress which has been made in geographical education both in its day to day teaching and in research, in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union (CGEIUG). My successors, Joe Stoltman, Hartwig Haubrich, Rod Gerber and now Lea Houtsonen, have done much and are continuing to work hard, to foster the development of geographical education. This book is proof, if proof were needed, that the international collaboration in this field, is alive and well, with contributions coming from all the continents (except Antarctica!). It would be a moribund subject that remained unaffected in one way or another by developments on the 'great world stage', as Fairgrieve (1926) would have put it. And, as Rod Gerber shows, the issues of globalisation, of cultural encounters, of differing value systems, of new technologies, of variable economic development and of environmental quality, all feature as topics which influence and are influenced by, geographical education.

Inclusion and Education - All Means All  
Routledge

Developed with the IB for the latest syllabus at SL and HL, this comprehensive course book is packed with topical case studies to drive critical thought. Written by an IB team leader and workshop leader, it integrates the learner profile and includes skills development and fieldwork support, for optimal achievement.

**Global Perspectives on Issues and Solutions in Urban Education** Edward Elgar Publishing

The 2010s have been a dramatic period for most primary commodity markets. Producers suffered heavily as prices fell in response to new supply facilities going into production, juxtaposed against disappointing demand evolution from China in particular, marking the end of the most powerful and enduring commodity boom since the Second World War. This book is a guide to the primary commodity universe, an increasingly crucial part of the world economy. In this updated

edition, Marian Radetzki and Linda Wårell introduce and explain pertinent issues surrounding international commodity markets, including the importance of fossil markets among commodities, price formation, price trends, the shift in primary commodity consumption towards Asia, the increasing reliance on commodity exchanges, new relaxed attitude towards depletion, cartel action, and the revival of nationalism and state ownership. This is an accessible read for graduates, academic researchers, and professionals in the mineral and energy sectors.

Prepare IB learners to achieve and progress. Developed directly with the IB for the revised syllabus first examined 2019, this Course Book fully supports all the SL and HL themes. Integrating concept-based learning and with even more support for EAL learners, this text helps you truly deliver the IB approach to learning Geography. Fully support the revised syllabus for first examination 2019, developed directly with the IB Engage learners with topical case studies they can instantly relate to the world

around them Get the best from your EAL students with straightforward language and integrated definitions Simplify complex ideas and develop conceptual awareness with a focused, concept-based approach Build assessment potential, with assessment support that secures the essential exam foundations Supporting Study Guide fully prepares learners to succeed in IB assessment Covers all the core and optional themes for SL and HL Geography Success: Springer Science & Business Media

This exemplary Handbook provides readers with a novel synthesis of international research, evidence-based practice and personal reflections to offer an overview of the current state of knowledge in the field of teaching geography in higher education. Chapters cover the three key transitions – into, through, and out of higher education – to present a thorough analysis of the topic.

*Africa's Geography* OECD Publishing  
This book presents an international perspective on environmental educational and specifically the influence that context has on this aspect of curriculum. The focus is on environmental education both formal

and non formal and the factors that impact upon its effectiveness, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc. ).

*An International Perspective on the Development Environmental Education*  
Routledge

This publication assesses progress towards Sustainable Development Goal 4 (SDG 4) on education and its ten targets, as well as other related education targets in the SDG agenda. It addresses inclusion in education, drawing attention to all those excluded from education, because of background or ability. The report is motivated by the explicit reference to inclusion in the 2015 Incheon Declaration, and the call to ensure an inclusive and equitable quality education in the formulation of SDG 4, the global goal for education. It reminds us that, no matter what argument may be built to the contrary, we have a moral imperative to ensure every child has a right to an appropriate education of high quality.

*People-Making and Nation-Building*  
Routledge

This book provides a practical illustration

of the skills, knowledge and understanding required to teach in the secondary classroom. As well as discussing concepts and ideas, the book gives a critical examination of some of the key issues, and will encourage the reader to engage with the ideas and consider their views and beliefs. It is an invaluable resource for those who are learning to teach or for those teachers who wish to reflect on their teaching practice.

International Handbook on Geographical Education IAP

A new edition of geog.2 students' book, revised and updated to deliver both the Programme of Study for Geography at Key Stage 3 and new teaching and learning needs for greater preparation for GCSE. Contains direct, student-friendly language with illustrated step-by-step explanations. *A Handbook of Primary Commodities in the Global Economy* Cambridge University Press

Mobility is fundamental to economic and social activities such as commuting, manufacturing, or supplying energy. Each movement has an origin, a potential set of intermediate locations, a destination, and a nature which is linked with geographical

attributes. Transport systems composed of infrastructures, modes and terminals are so embedded in the socio-economic life of individuals, institutions and corporations that they are often invisible to the consumer. This is paradoxical as the perceived invisibility of transportation is derived from its efficiency. Understanding how mobility is linked with geography is main the purpose of this book. The third edition of *The Geography of Transport Systems* has been revised and updated to provide an overview of the spatial aspects of transportation. This text provides greater discussion of security, energy, green logistics, as well as new and updated case studies, a revised content structure, and new figures. Each chapter covers a specific conceptual dimension including networks, modes, terminals, freight transportation, urban transportation and environmental impacts. A final chapter contains core methodologies linked with transport geography such as accessibility, spatial interactions, graph theory and Geographic Information Systems for transportation (GIS-T). This book provides a comprehensive and accessible

introduction to the field, with a broad overview of its concepts, methods, and areas of application. The accompanying website for this text contains a useful additional material, including digital maps, PowerPoint slides, databases, and links to further reading and websites. The website can be accessed at:

<http://people.hofstra.edu/geotrans> This text is an essential resource for undergraduates studying transport geography, as well as those interest in economic and urban geography, transport planning and engineering.

*A global review of how environmental issues are integrated in education* Vikas Publishing House

Oxford International Primary Geography is a complete six year course that provides an engaging introduction to the subject. Using real life examples from around the globe, the course covers both human and physical geography, from the basics of mapping to current hot topics such as how to meet the resource needs of the world's population.

1961-1971 Cambridge University Press  
This book argues that the international development sector is in crisis which can

be mostly sourced to its side-stepping the dominant development question of our age, the neoliberal growth paradigm. It argues that this crisis can be addressed, at least in part, by the sector's re-engagement with the radical development education process that it helped to foster and sustain for over two decades. The recent safeguarding scandal is symptomatic of a sector that is becoming overly hierarchical, brand conscious and disconnected from its base. This book argues that many of the problems the sector is facing can be sourced to its failings in grappling with the question of neoliberalism and formulating a coherent critique of how market orthodoxy has accelerated poverty in the global North and South. This book recommends re-embracing the radical origins of global learning, situated in the participative methodology and praxis (reflection and action) of Paulo Freire, both as internal capacity-building and external public engagement. The book proposes a new development paradigm, focusing on bottomup, participative approaches to policy-making based on the needs of those NGOs claim to represent – the poor,

marginalised and voiceless – rather than constantly following the agenda of donors and governments. The recommendations made by this book will serve as an important resource for researchers and students of international development and global learning, as well as to NGOs, civil society activists and education practitioners looking for solutions to the problems within the sector.

Routledge

This book is devoted to the Anthropocene, the period of unprecedented human impacts on Earth's environmental systems, and illustrates how Geographers envision the concept of the Anthropocene. This edited volume illustrates that geographers have a diverse perspective on what the Anthropocene is and

represents. The chapters also show that geographers do not feel it necessary to identify only one starting point for the temporal onset of the Anthropocene. Several starting points are suggested, and some authors support the concept of a time-transgressive Anthropocene. Chapters in this book are organized into six sections, but many of them transcend easy categorization and could easily have fit into two or even three different sections. Geographers embrace the concept of the Anthropocene while defining it and studying it in a variety of ways that clearly show the breadth and diversity of the discipline. This book will be of great value to scholars, researchers, and students interested in geography, environmental humanities, environmental studies, and anthropology. The chapters in this book were originally published as a special issue of the journal *Annals of the American Association of Geographers*.

International Primary Geography: Student  
A student-friendly and engaging textbook for Year 2 of the Edexcel GCE A Level specification. Written to match the

demands of the new spec, this Student Book motivates your students with accessible, interesting content and up-to-date case studies, while retaining the required rigour.

*Approaches to Learning and Teaching Geography* Wiley

This book provides a collection of critical pieces that support the idea that good teaching and learning of geography in fieldwork and using technology should consider the dimensions of curriculum design, instructional design and resource provision, as well as assessment for such learning activities. Further, it clearly describes the thinking, experiences and critical comments concerning two broad areas of learning outside the traditional classroom – in the field and with technology.
