Student engagement relies on the students and their willingness to participate in the learning process and can be enhanced through the application of various technologies within learning environments. However, strategies for implementing these technologies need research and development to be implemented effectively. The Handbook of Research on Fostering Student Engagement With Instructional Technology in Higher Education is a comprehensive academic publication that focuses on the engagement of learners with academics in higher education and especially how this engagement can be fostered with the integration of new technologies. Featuring an array of topics such as gamification, digital literacy, and social networking, this book is ideal for instructors, educators, administrators, curriculum developers, instructional designers, IT consultants, educational software developers, researchers, academicians, and students.

The properties and function of human communication. Called "one of the best books ever about human communication," and a perennial bestseller, *Pragmatics of Human Communication* has formed the foundation of much contemporary research into interpersonal communication, in addition to laying the groundwork for context-based approaches to psychotherapy. The authors present the simple but radical idea that problems in life often arise

from issues of communication, rather than from deep psychological disorders, reinforcing their conceptual explorations with case studies and well-known literary examples. Written with humor and for a variety of readers, this book identifies simple properties and axioms of human communication and demonstrates how all communications are actually a function of their contexts. Topics covered in this wide-ranging book include: the origins of communication; the idea that all behavior is communication; meta-communication; the properties of an open system; the family as a system of communication; the nature of paradox in psychotherapy; existentialism and human communication.

Con la gran mayoría de los usuarios de Facebook atrapados en un frenesí de friending, liking y commenting, ¿en qué momento podemos desconectar para comprender las consecuencias de nuestras infosaturadas vidas? ¿Qué nos obliga a participar tan diligentemente con los sistemas de redes sociales? *Redes sin causa* examina nuestra obsesión colectiva con la identidad y la autogestión, junto con la fragmentación y la información de sobrecarga endémica de la cultura contemporánea en línea. Con escasez de teoría sobre las consecuencias sociales y culturales de los servicios en línea más populares, Lovink ofrece un análisis crítico pionero de nuestro sobrevalorado mundo en red a partir de estudios de casos en los motores de búsqueda, video online, blogging, radio digital, activismo en los media y la saga de Wikileaks. Este libro ofrece un poderoso mensaje a profesionales de los medios y a los teóricos: colectivamente vamos a dar

rienda suelta a nuestra capacidad crítica para influir en el diseño de la tecnología y en los espacios de trabajo, si no queremos desaparecer en la nube. Incisivo pero nunca pesimista, Lovink, partiendo de su larga experiencia en la investigación de medios de comunicación, nos ofrece una crítica de las estructuras políticas y poderes conceptuales incluidos en las tecnologías que dan forma a nuestra vida cotidiana. *Nam June Paik* UNICEF

The *Untimely Present* examines the fiction produced in the aftermath of the recent Latin American dictatorships, particularly those in Argentina, Brazil, and Chile. Idelber Avelar argues that through their legacy of social trauma and obliteration of history, these military regimes gave rise to unique and revealing practices of mourning that pervade the literature of this region. The theory of postdictatorial writing developed here is informed by a rereading of the links between mourning and mimesis in Plato, Nietzsche's notion of the untimely, Benjamin's theory of allegory, and psychoanalytic / deconstructive conceptions of mourning. Avelar starts by offering new readings of works produced before the dictatorship era, in what is often considered the boom of Latin American fiction. Distancing himself from previous celebratory interpretations, he understands the boom as a manifestation of mourning for literature's declining aura. Against this background, Avelar offers a reassessment of testimonial forms, social scientific theories of authoritarianism, current transformations undergone by the university, and an analysis of a number of novels by some of today's foremost Latin American writers--such as Ricardo Piglia, Silviano Santiago, Diamela Eltit,

João Gilberto Noll, and Tununa Mercado. Avelar shows how the 'untimely' quality of these narratives is related to the position of literature itself, a mode of expression threatened with obsolescence. This book will appeal to scholars and students of Latin American literature and politics, cultural studies, and comparative literature, as well as to all those interested in the role of literature in postmodernity.

On 20 November 2009, the global community celebrates the 20th anniversary of the adoption by the United Nations General Assembly of the Convention on the Rights of the Child, the unique document that sets international standards for the care, treatment and protection of all individuals below age 18. To celebrate this landmark, the United Nations Children's Fund is dedicating a special edition of its flagship report *The State of the World's Children* to examining the Convention's evolution, progress achieved on child rights, challenges remaining, and actions to be taken to ensure that its promise becomes a reality for all children. The statistical tables presented in this volume assist in meeting the demand for timely, reliable, comparable and comprehensive data on the state of the world's children.

This book documents and disseminates experiences from a wide range of universities, across the five continents,

which showcase how the principles of sustainable development may be incorporated as part of university programmes, and present transformatory projects and programmes, showing how sustainability can be implemented across disciplines. Sustainability in a higher education context is a fast growing field.

Thousands of universities across the world have signed declarations or have committed themselves to integrate the principles of sustainable development in their activities: teaching, research and extension, and many more will follow.

While signs of racial progress are everywhere, the reality is that America is hardly more integrated than it was before the civil rights movement.

Beyond the rhetoric of politicians, the media, and the prevalent symbols of integration lies a very different reality: 70 percent of black children attend predominantly black schools; and an Hispanic or Asian American with a third grade education is more likely to live in an integrated neighborhood than is a black with a Ph.D. Fueled by these startling statistics, *By the Color of Our Skin* argues that integration does not exist now; that it never had a chance to exist in the past; and that it will never exist in the future. Leonard Steinhorn and Barbara Diggs-Brown would themselves like to see integration become a reality but find--through polls, statistics, interviews, and anecdotes--that the illusion of integration is more damaging than useful because it keeps society from having an honest dialogue about the problem of race. *By the Color of Our Skin* explodes powerful myths and outlines a new vision of race in America. *State of the World's Children* IGI Global

With a Foreword by José David Saldívar  
Since its first publication in Spanish nearly a decade ago, Julio Ramos's *Desencuentros de la modernidad en America Latina por el siglo XIX* has been recognized as one of the most important studies of modernity in the western hemisphere. Available for the first time in English—and now published with new material—Ramos's study not only offers an analysis of the complex relationships between history, literature, and nation-building in the modern Latin American context but also takes crucial steps toward the development of a truly comparative inter-American cultural criticism. With his focus on the

nineteenth century, Ramos begins his genealogy of an emerging Latin Americanism with an examination of Argentinean Domingo Sarmiento and Chilean Andrés Bello, representing the "enlightened letrados" of tradition. In contrast to these "lettered men," he turns to Cuban journalist, revolutionary, and poet José Martí, who, Ramos suggests, inaugurated a new kind of intellectual subject for the Americas. Though tracing Latin American modernity in general, it is the analysis of Martí—particularly his work in the United States—that becomes the focal point of Ramos's study. Martí's confrontation with the unequal modernization of the New World, the dependent status of Latin America, and the contrast between Latin America's culture of elites and the northern mass culture of commodification are, for Ramos, key elements in understanding the complex Latin American experience of modernity. Including two new chapters written for this edition, as well as translations of three of Martí's most important works, *Divergent Modernities* will be indispensable for anyone seeking to understand development and modernity across the Americas.

Examines international cases to understand what causes a society's ethnic conflicts to escalate or de-escalate. This book contains examinations of the political and historical antecedents to conflict around the world, combining them with psychological analyses of group identity and intergroup conflict. In examining the escalation of ethnic conflict, the chapters highlight the critical role of group identification, stressing how group identification becomes enmeshed with

threatened economic resources, violent political subcultures, and media manipulation of collective fear.
