SAS Guide to Tracking, New and Revised SAS Press

Anyone who has spent any time outdoors has come across strange tracks and wondered, "What was here?" In this new and revised edition of The SAS Guide to

Tracking, a veteran of Britain's elite Special Air Service shows how to track any moving thing, in any environment, and under nearly any circumstance. An essential handbook for developing a new awareness of the outdoors, this book is the perfect companion for naturalists, outdoorspeople, hunters, wildlife photographers, search-and-rescue teams, and law enforcement organizations. Included are tips on: Tracking in desert, forest, jungle,

marsh, and grassy areas
 Interpreting animal, human, and vehicle signs
 Preserving night vision
 Using time frames to eliminate misleading signs
 Detecting quarry when they backtrack or circle around
 Interpreting how time and weather affect signs
 Spotting intentionally misleading signs

HarperCollins UK
SAS Programming for R Users, based on the free SAS Education course of the same name, is designed for experienced R users who want to transfer their programming skills to SAS. Emphasis is on programming and not statistical theory or

interpretation. You will learn how to write programs in SAS that replicate familiar functions and capabilities in R. This book covers a wide range of topics including the basics of the SAS programming language, how to import data, how to create new variables, random number generation, linear modeling, Interactive Matrix Language (IML), and many other SAS procedures. This book also explains how to write R code directly in the SAS code editor for seamless

integration between the two tools. Exercises are provided at the end of each chapter so that you can test your knowledge and practice your programming skills.
