Hannah Ryggen
(1894-1970) was a
Swedish-Norwegian
modern artist who began
her career as a painter
before switching to

creating political art in the
form of monumental
tapestries. Combining the
decorative and the
political, Ryggen was
ahead of her time with her
turn to "political weaving."
She was also a feminist
with strong communist
sympathies involved in
the international workers'
movement. Her dramatic,
beautiful tapestries were
shown at both the Paris

and Brussels World's
Fairs, but she was largely
forgotten by the
international art world in
the decades after her
death. In recent years,
however, as interest in
both fiber arts and
pioneering women artists
has grown, Ryggen's work
has returned to the public
eye, with major
international exhibitions
and fresh attention from

curators, collectors, and critics. A widely recognized authority on Ryggen, Marit Paasche brings this important Scandinavian artist to the foreground in this biography, the first published on Ryggen in English. Paasche looks at Ryggen within the social, political, and cultural contexts of her time and explores how these issues informed her work, from her anti-fascist tapestry that depicted a spear piercing Mussolini's head to one protesting the war in Vietnam. Published to

correspond with a major retrospective in Frankfurt, of which Paasche is one of the curators, Hannah Ryggen is a foundational book that will provide a crucial introduction of this artist to a broader audience.

Fragmentation and Repair, Phaidon Press
Shoelaces, nautical ropes, bits of string. For two decades Sheila Pepe has been transforming these items into transcendent works that can fit on a lap or fill a room. Her versatility, humor, and feminist perspective are

on brilliant display in this book that traces her development over the past twenty years. Essays look at how the artist plays with feminist and craft traditions to counter patriarchal notions, and the site-specific nature of her work. Arranged both chronologically and thematically, this lushly illustrated book focuses on an artist doing important work in the fields of queer theory, craft making, and personal geography. --

A global survey of 100 of
today's most important
clay and ceramic artists,
chosen by leading art
world professionals.
Vitamin C celebrates the
revival of clay as a
material for contemporary
visual artists, featuring a
wide range of global
talent as selected by the
world's leading curators,
critics, and art
professionals. Clay and
ceramics have in recent
years been elevated from
craft to high art material,
with the resulting
artworks being coveted by

collectors and exhibited in
museums around the
world. Packed with
illustrations, Vitamin C is
a vibrant and incredibly
timely survey - the first of
its kind. Artists include:
Caroline Achaintre, Ai
Weiwei, Aaron Angell,
Edmund de Waal,
Theaster Gates, Marisa
Merz, Ron Nagle, Gabriel
Orozco, Grayson Perry,
Sterling Ruby, Thomas
Schütte, Richard Slee,
Clare Twomey, Jesse
Wine, and Betty
Woodman. Nominators
include: Pablo Leon de la
Barra, Iwona Blazwick,

Mary Ceruti, Dan Fox, Jens Hoffmann, Christine Macel, James Meyer, Jed Morse, Beatrix Ruf, Patrizia Sandretto Re Rebaudengo, Nancy Spector, Sheena Wagstaff, and Jonathan Watkins.

A Poor Excuse for a Dragon Vintage

NAMED ONE OF THE BEST COOKBOOKS OF THE YEAR BY REAL SIMPLE “I have never read a more

passionate and heartfelt expression of Colombian culture and cuisine in English. I’ve been waiting for years for a book like this to come out.” -J. Kenji López-Alt, New York Times bestselling author of *The Food Lab* A recipe developer and food stylist—whose work has taken her across the globe to work with clients like Michelle Obama and into the test kitchens of today’s most esteemed culinary publications—pays homage to her native country with this vibrant,

visually stunning cooking, the first dedicated solely to Colombian food, featuring 100 recipes that meld the contemporary and the traditional. To Mariana Velásquez, a native of Bogotá, the diverse mix of heritages, cultures, and regions that comprise Colombian food can be summed up in one simple concept: More is more. No matter what rung of society, Colombians feed their guests well, and leave them feeling nourished in body and soul. In *Colombiana*, the award-

winning recipe developer and food stylist draws on the rich culinary traditions of her native land and puts her own modern twist on dishes beloved by generations of Colombians. Here are recipes for classics such as arepas and empanadas, as well as “Colombian-ish” recipes like Lomito de Cerdo al Tamarindo y Menta (Tamarind Pork Tenderloin with Mint), Gazpacho de Papaya y Camarón Tostado (Spicy Papaya and Charred Shrimp Gazpacho), and Cuchuco

de Trigo con Pollito y Limón (Lemony Bulgur Farmer’s Chicken Soup). In addition to offering a unique perspective on Colombian food, Mariana shares the vibrant style of Colombian tablescapes and entertaining. For her, the best meals are never simply about the food on the table—they are an alchemy of atmosphere, drinks, and simple snacks and sweets that complete the experience and make it memorable. Rich with culture and stories as well as one-of-a-kind recipes and stunning

photography, *Colombiana* is a gastronomic excursion that reminds us of the power of food to keep tradition alive.

Smart Polymers and Their Applications Woodhead Publishing

“An antidote to the veneer of perfectionism so often presented by books of its kind, *Wabi-Sabi Welcome* offers readers license to slow down and host guests with humility, intention, and contentment.”

—Nathan Williams, founder of *Kinfolk Wabi-Sabi Welcome* is sharing a

pot of tea with friends. It is preparing delicious food to nourish, not to show off. It's keeping a basket of cozy slippers at the door for guests. It is well-worn linens, bouquets of foraged branches, mismatched silverware, and heirloom bowls infused with the spirit of meals served with love. In this lush entertaining manual, author Julie Pointer Adams invites readers into artful, easygoing homes around the world—in Denmark, California, France, Italy, and Japan—and teaches

us how to turn the generous act of getting together into the deeper art of being together. In this book, readers will find: unexpected, thoughtful ideas and recipes from around the world; tips for creating an intimate, welcoming environment; guidelines for choosing enduring, natural decor for the home; and inspiring photographs from homes where wabi-sabi is woven into daily living.

Hannah Ryggen U·X·L
Sarah Burwash has been visiting rural communities

and remote areas to attend artist residencies, travelling to different cities for art and craft sales, volunteering on farms and working at lodges in the rocky mountains. The Far Woods is a collection of watercolours and other works she produced during these residencies and travels. These drawings celebrate the wilderness, rural lifestyles and resourcefulness. Burwash turns to past generations who, by necessity, had to be self-sufficient and create

systems of mutual dependence among community members. Burwash has been researching and immersing herself in environments where she can learn the stories, skills and gain the experience and perspective from earlier generations to create narratives that uproot her own personal mythologies. She seeks to uncover both humble and provocative histories, more specifically those of women who were brazen and persistent in forging

for a new social order. She creates characters, environments and narratives that are lyrical yet quiet, like frozen moments from dreams or nightmares. Her work seeks the threads that connect the past and present, weaving imagery that urges people to wander through the drawings, discovering more upon each view and unfolding questions about our relationships to land, nature, spirituality and community. *Entangled* Schiffer Craft Japanese woodblock

prints, or ukiyo-e, are the most recognizable Japanese art form. Their massive popularity has spread from Japan to be embraced by a worldwide audience. Covering the period from the beginning of the Japanese woodblock print in the 1680s until the year 1900, *Japanese Woodblock Prints* provides a detailed survey of all the famous ukiyo-e artists, along with over 500 full-color prints. Unlike previous examinations of this art form, *Japanese Woodblock Prints* includes detailed

histories of the publishers of woodblock prints--who were often the driving force determining which prints, and therefore which artists, would make it into mass circulation for a chance at critical and popular success. Invaluable as a guide for ukiyo-e enthusiasts looking for detailed information about their favorite Japanese woodblock print artists and prints, it is also an ideal introduction for newcomers to the world of the woodblock print. This lavishly illustrated

book will be a valued addition to the libraries of scholars, as well as the general art enthusiast. **Cloth that Changed the World** Bloomsbury Publishing USA
 Natural Dyeing reveals the endless possibilities of plant-based dyes and how they will inspire you for years to come. Natural Dyeing explores the versatility of plant-based dyes, from understanding, choosing and preparing your fibre for dyeing to foraging for your dyes and the different dyeing methods used. You can

then put your skills to the test with eight projects, including a Silk-dyed Bandana, Furoshiki-inspired bag and a Korean-style Cloth used to wrap gifts. Natural Dyeing inspires you to experiment with natural dyes to give old garments a new lease of life, to create beautiful tablecloths and napkins from offcuts of linen and to inject a pop of colour into your cushions. The Far Woods Prestel Pub
 Learn how to cultivate your own magical garden,

begin your journey with folk herbalism, and awaken to your place in nature through practical skills from an experienced Appalachian forager and witch. Witchcraft is wild at heart, calling us into a relationship with the untamed world around us. Through the power of developing a relationship with plants, a witch—beginner or experienced—can practice their art more deeply and authentically by interacting with the beings that grow around us all. Bridging the gap

between armchair witchcraft and the hedge witches of old, *Wild Witchcraft* empowers you to work directly with a wide variety of plants and trees safely and sustainably. With *Wild Witchcraft*, Rebecca Beyer draws from her years of experience as an Appalachian witch and forager to give you a practical guide to herbalism and natural magic that will share: -The history of witchcraft and Western herbalism -How to create and maintain your own herbal garden -

Recipes for tinctures, teas, salves, and other potions to use in rites and rituals -Spells, remedies, and rituals created with the wild green world around you, covering a range of topics, from self-healing to love to celebrating the turning of the seasons -And much more! *Wild Witchcraft* welcomes us home to the natural world we all dwell in by exploring practical folk herbal and magical rites grounded in historical practices and a sustainable, green ethic. *Fabric of Myth* Woodhead

Publishing

This book offers a detailed understanding of the principles, procedures, equipment, and operation of selected technologies used to manufacture and evaluate intelligent multifunctional textiles and apparel goods. Leading experts from different domains of polymers, fiber production, nanotechnology, and textile chemical finishing address the entire production process by delving into crucial concepts and topics such

as the development, characterization, and potential applications of functional materials. *Textiles for Functional Applications* is an excellent resource for researchers, designers, and academics who want to learn more about designing feasible functional textiles. Worn New Age International A global survey of drawing today featuring over 100 contemporary artists Vitamin D offers a fresh and pioneering overview of the current state and

underlying significance of drawing as an artistic medium. It highlights the originality and innovation with which contemporary artists in the genre - from across the world and in a vast variety of contexts - experiment with a diversity of styles and statements. *Vitamin D* features the work of 109 contemporary artists, selected by some of the world's foremost critics and curators for their unique outlook. It is in itself an artistic compilation of the endless possibilities that drawing

offers an artist from any background. This book is a captivating composition of examples of the evolution of drawing in the twenty-first century. It reveals the energy of contemporary drawing, in a subtle presentation of the richness and versatility of the medium. With several pages dedicated to images of each artist's work and a deeply analytical parallel text, Vitamin D is at once a detailed reference book for art world aficionados and an absorbing introduction for

newcomers to the scene. Highly informative and aesthetically stimulating, this book is an essential work in its own right, through its exposition of just how fundamental an artistic medium drawing continues to be.

The Attic, the Pearls & Three Fine Girls Chelsea Green Publishing

Woven Fabric Engineering Black Dog Pub Limited
Smart Polymers and Their

Applications, Second Edition presents an up-to-date resource of information on the synthesis and properties of different types of smart polymers, including temperature, pH, electro, magnetic and photo-responsive polymers, amongst others. It is an ideal introduction to this field, as well as a review of the latest research in this area. Shape memory polymers, smart polymer hydrogels, and self-healing polymer systems are also explored. In addition, a very strong

focus on applications of smart polymers is included for tissue engineering, smart polymer nanocarriers for drug delivery, and the use of smart polymers in medical devices. Additionally, the book covers the use of smart polymers for textile applications, packaging, energy storage, optical data storage, environmental protection, and more. This book is an ideal, technical resource for chemists, chemical engineers, materials scientists, mechanical

engineers and other professionals in a range of industries. - Includes a significant number of new chapters on smart polymer materials development, as well as new applications development in energy storage, sensors and devices, and environmental protection - Provides a multidisciplinary approach to the development of responsive polymers, approaching the subject by the different types of polymer (e.g. temperature-responsive)

and its range of applications
Vitamin T: Threads and Textiles in Contemporary Art Artisan Books
 Winner of the Pulitzer Prize and a documentary from Ken Burns on PBS, this New York Times bestseller is “an extraordinary achievement” (The New Yorker)—a magnificent, profoundly humane “biography” of cancer—from its first documented appearances thousands of years ago through the epic battles in the twentieth century to

cure, control, and conquer it to a radical new understanding of its essence. Physician, researcher, and award-winning science writer, Siddhartha Mukherjee examines cancer with a cellular biologist's precision, a historian's perspective, and a biographer's passion. The result is an astonishingly lucid and eloquent chronicle of a disease humans have lived with—and perished from—for more than five thousand years. The story of cancer is a story of

human ingenuity, resilience, and perseverance, but also of hubris, paternalism, and misperception. Mukherjee recounts centuries of discoveries, setbacks, victories, and deaths, told through the eyes of his predecessors and peers, training their wits against an infinitely resourceful adversary that, just three decades ago, was thought to be easily vanquished in an all-out “war against cancer.” The book reads like a literary thriller with cancer as the protagonist. Riveting, urgent, and

surprising, *The Emperor of All Maladies* provides a fascinating glimpse into the future of cancer treatments. It is an illuminating book that provides hope and clarity to those seeking to demystify cancer.

Down to Earth Phaidon Press

Explore the work of three generations of fine artists who have opened their minds and spirits to the boundless range of expressive possibilities in textile methods or materials. Even as the art on these pages references

weaving, crochet or quilting, traditional textile notions disappear in the hands of serious artists, appropriating essential elements for their contemporary concepts
Colombiana BoD – Books on Demand

Discover the rich creative possibilities of fragmentation and repair in textile art.

Fragmentation and repair are two of the biggest buzzwords in textile and mixed-media art. In this fascinating book, renowned artist Shelley Rhodes explores both

concepts, with a wealth of fresh ideas and practical advice. Drawing on her own practice, Shelley explains how she reconstructs and reassembles cloth, paper and other materials to create new pieces, often incorporating found objects and items she has collected over the years to add depth and emotional resonance. From piercing and devoré to patching and darning, techniques include: Fragmentation of materials, text and image. Repair using darning and

patching along with pins, tape, adhesive and plaster. The Japanese concepts of wabi-sabi (finding beauty in imperfection) and mottainai (using every last scrap). Using salvaged and recycled materials, and repurposing household items. Methods of distressing and manipulating surfaces including weathering, abrasion, burning, piercing, staining and burying. Collage, working in a series and collecting fragments. Beautifully

illustrated with Shelley's own pieces alongside those of other leading artists, this fascinating book is the ideal companion for any textile artist wanting to bring notions of fragility, fragmentation and repair into their own work. *Natural Dyeing* Elsevier This important book provides a guide to the fundamentals and latest developments in smart technology for textiles and clothing. The contributors represent a distinguished international panel of

experts and the book covers many aspects of cutting edge research and development. Smart fibres, fabrics and clothing starts with a review of the background to smart technology and goes on to cover a wide range of the material science and fibre science aspects of the technology including: Electrically active polymeric materials and the applications of nonionic polymer gel and elastomers for artificial muscles; Thermally sensitive fibres and fabrics; Cross-linked

polyol fibrous substrates stimuli-responsive interpenetrating polymer network hydrogel; Permeation control through stimuli-responsive polymer membranes; optical fibre sensors, hollow fibre membranes for gas separation; integrating fibre-formed components into textile structures; Wearable electronic and photonic technologies; Adaptive and responsive textile structures (ARTS); Biomedical applications including the applications of scaffolds in tissue

engineeringIt is essential reading for academics in textile and materials science departments, researchers, designers and engineers in the textiles and clothing product design field. Product managers and senior executives within textile and clothing manufacturing will also find the latest insights into technological developments in the field valuable and fascinating.

Wabi-Sabi Welcome

Phaidon Press

'I was pulled into simple living before I knew what it was. It crept up on me using the smallest of steps and didn't reveal its true beauty and real power until I was totally hooked. I was searching for a way to live well while spending very little money. What I found was a way of life that also gave me independence, opportunity and freedom.'

Rhonda Hetzel gently encourages readers to find the pleasure and meaning in a simpler life, sharing all the practical information she has gathered on her own journey. Whether you want to learn how to grow tomatoes, bake bread, make your own soap and preserve fruit, or just be inspired to slow down and live more sustainably, *Down to Earth* will be your guide.
