 From birth through age fifty-seven, I considered myself a staunch believer in my creator, but failed to embrace the reality that Jesus was truly the son of God in human form. Those struggles lead me to contrast my life to other organized groups of believers and wonder what I might have been capable of doing if my conceptual belief system had a Jihadist foundation instead of my reality. I describe two brushes with death in which the second event took my life in a totally unexpected direction. I describe that profound shift as if I were writing an op-ed, and the wild-goose chase that ensued. Included is an appendix for struggling and skeptical Christians everywhere. It is a contemporary guide to help the reader become comfortable reading the Bible, so that he or she might discover the answer to each and every issue that faces humankind today. In this unfiltered look at living the American dream and great loss, Jim shares his candid assessment of struggles with his conceptual belief system and the faith required to keep his faith alive for the next generation. His unique early-life encounters provided Jim with a sound foundation, a foundation that will be critically tested from unsuspecting angles as he navigates through life. Shan Rutherford, Senior Pastor, Greenwood Christian Church, Greenwood, Indiana.

 The Standards of Conduct Office of the Department of Defense General Counsel's Office has assembled an "encyclopedia" of cases of ethical failure for use as a training tool. These are real examples of Federal employees who have intentionally or unwittingly violated standards of conduct. Some cases are

humorous, some sad, and all are real. Some will anger you as a Federal employee and some will anger you as an American taxpayer. Note the multiple jail and probation sentences, fines, employment terminations and other sanctions that were taken as a result of these ethical failures. Violations of many ethical standards involve criminal statutes. This updated (end of 2009) edition is organized by type of violations, including conflicts of interest, misuse of Government equipment, violations of post-employment restrictions, and travel.

A notable contribution to our understanding of ourselves. This book explores the realm of human behavior in social situations and the way that we appear to others. Dr. Goffman uses the metaphor of theatrical performance as a framework. Each person in everyday social intercourse presents himself and his activity to others, attempts to guide and control the impressions they form of him, and employs certain techniques in order to sustain his performance, just as an actor presents a character to an audience. The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions.

 World Literature for the Wretched of the Earth recovers a genealogy of anticolonial thought that advocated collective inexperience, unknowing, and unrecognizability. Early-twentieth-century anticolonial thinkers endeavored to imagine a world emancipated from colonial rule, but it was a world they knew they would likely not live to see. Written in exile, in abjection, or in the face of death, anticolonial thought could not afford to base its politics on the hope of eventual success, mastery, or national sovereignty. J. Daniel Elam shows how anticolonial thinkers theorized inconsequential practices of egalitarianism in the service of an impossibility: a world without colonialism. Framed by a suggestive reading of the surprising affinities between Frantz Fanon's political writings and Erich Auerbach's philological project, *World Literature for the Wretched of the Earth* foregrounds anticolonial theories of reading and critique in the writing of Lala Har Dayal, B. R. Ambedkar, M. K. Gandhi, and Bhagat Singh. These anticolonial activists theorized reading not as a way to cultivate mastery and expertise but as a way, rather, to disavow mastery altogether. To become or remain an inexperienced reader, divesting oneself of authorial claims, was to fundamentally challenge the logic of the British Empire and European fascism, which prized self-mastery, authority, and national sovereignty. Bringing together the histories of comparative literature and anticolonial thought, Elam demonstrates how these early-twentieth-century theories of reading force us to reconsider the commitments of humanistic critique and egalitarian politics in the still-colonial present.

"Pollan keeps you turning the pages . . . clear-eyed and assured." —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

Black Skin, White Masks is a classic, devastating account of the dehumanising effects of colonisation experienced by black subjects living in a white world. First published in English in 1967, this book provides an unsurpassed study of the psychology of

racism using scientific analysis and poetic grace. Franz Fanon identifies a devastating pathology at the heart of Western culture, a denial of difference, that persists to this day. A major influence on civil rights, anti-colonial, and black consciousness movements around the world, his writings speak to all who continue the struggle for political and cultural liberation. With an introduction by Paul Gilroy, author of *There Ain't No Black in the Union Jack*.
