BARTLETT MATHEWS

A Perambulation of Kent HarperCollins

Humanity's place in the natural order is under scrutiny as never before, held in a precarious balance between visible and invisible forces: from the microscopic threat of a virus to the monumental power of climate change. Drawing on indigenous traditions from the Amazon rainforest; alternative perspectives on Western scientific rationalism; and new thinking around plant intelligence, philosophy and cultural theory, The Botanical Mind Online investigates the significance of the plant kingdom to human life, consciousness and spirituality across cultures and through time. It positions the plant as both a universal symbol found in almost every civilisation and religion across the globe, and the most fundamental but misunderstood form of life on our planet. This new online project has been developed in response to the COVID-19 crisis and the closure of our galleries due to the pandemic. 'The Botanical Mind: Art, Mysticism and The Cosmic

Tree' was originally conceived as a trans-generational group exhibition, but has been postponed. In the meantime, we have launched this complimentary online programme of new artist commissions, podcasts, films, texts, images and audio, expanding on and enriching the ideas and issues informing the show over at botanicalmind.online ... During this period of enforced stillness, our behaviour might be seen to resonate with plants: like them we are now fixed in one place, subject to new rhythms of time, contemplation, personal growth and transformation. Millions of years ago plants chose to forego mobility in favour of a life rooted in place, embedded in a particular context or environment. The life of a plant is one of constant, sensitive response to its environment - a process of growth, problem-solving, nourishment and transformation, played out at speeds and scales very different to our own. In this moment of global crisis and change there has perhaps never been a better moment to reflect on and learn from them.--

RSPB Garden Birds Square Wall Calendar 2025 Faber & Faber

This open access volume presents a comprehensive account of all aspects of biological invasions in

South Africa, where research has been conducted over more than three decades, and where bold initiatives have been implemented in attempts to control invasions and to reduce their ecological, economic and social effects. It covers a broad range of themes, including history, policy development and implementation, the status of invasions of animals and plants in terrestrial, marine and freshwater environments, the development of a robust ecological theory around biological invasions, the effectiveness of management interventions, and scenarios for the future. The South African situation stands out because of the remarkable diversity of the country, and the wide range of problems encountered in its varied ecosystems, which has resulted in a disproportionate investment into both research and management. The South African experience holds many lessons for other parts of the world, and this book should be of immense value to researchers, students, managers, and policy-makers who deal with biological invasions and ecosystem management and conservation in most other regions.

Discover cool cars with i-SPY - facts, photos and fantastic spots! Beat the boredom and take time

out from screens with this pocket-sized book packed with facts, photos and fantastic spots for hours of fun! Kids will have fun collecting points with more than 120 cool cars to find. From Chevrolets to Chryslers, Rolls Royces to Porsches, they'll learn all about the model range and origins along the way. And once they've scored 1000 points, super-spotters can claim their official i-SPY certificate and badge. With more than 30 i-SPY books to collect, there's something for everyone! For even more fun check out i-SPY On a Car Journey (ISBN 9780008386504).

Birds of the West Indies Springer Science & Business Media

Harmful algal blooms (HABs) - blooms that cause fish kills, contaminate seafood with toxins, or cause human or ecological health impacts and harm to local economies - are occurring more often, in more places and lasting longer than in past decades. This expansion is primarily the result of human activities, through increased nutrient inputs and various aspects of climate change. The Global Ecology and Oceanography of Harmful Algal Blooms (GEOHAB) programme promoted international collaboration to understand HAB population dynamics in various oceanographic regimes and to improve the prediction of HABs. This volume introduces readers to the overarching framework of the GEOHAB programme, factors contributing to the global expansion of harmful algal blooms, the complexities of HABs in different habitats, and the forward-looking issues to be tackled by the next generation of GEOHAB, GlobalHAB. The programme brought together an international team of contributing scientists and ecosystem managers, and its outcomes will greatly benefit the international research community.

Biological Invasions in South Africa Collins

The galaxy is an exciting place, full of peril and wrought with danger - particularly for the young. Experience this adventure through the eyes of Groggu as you collect points, solve puzzles, and complete quests. Together, the Mandalorian and Groggu are ready for action! Are you?

Pinch of Nom Food Planner Independently Published

Collection of poems including three dealing with women's issues and votes for women, Woman, Woman's plea for suffrage and Woman's song of freedom.

KEW: Grow, Forage and Make HarperCollins

The London Bird Atlas is an authoritative and detailed account of just under 200 of the regularly occurring birds of London. It provides the most up-to-date analyses of the changes to London's birds based on a comprehensive survey run in conjunction with the British Trust for Ornithology's National Bird Atlas project.

RSPB Owls Slim Calendar 2025 Bloomsbury Publishing

A SUNDAY TIMES NATURE BOOK OF THE YEAR A nature diary by award-winning novelist, nature writer and hit podcaster Melissa Harrison, following her journey from urban south London to the rural Suffolk countryside. 'A writer of great gifts.' Robert Macfarlane 'The journal of a writer to compare to Thomas Hardy. Melissa Harrison is among our most celebrated nature writers.' John Carey, The Times A Londoner for over twenty years, moving from flat to Tube to air-conditioned office, Melissa Harrison knew what it was to be insulated from the seasons. Adopting a dog and going on daily walks helped reconnect her with the cycle of the year and the quiet richness of nature all around her: swifts nesting in a nearby church; ivy-leaved toadflax growing out of brick walls; the first blackbird's song; an exhilarating glimpse of a hobby over Tooting Common. Moving from scrappy city verges to ancient, rural Suffolk, where Harrison eventually relocates, this diary - compiled from her beloved Nature Notebook column in The Times - maps her joyful engagement with the natural world and demonstrates how we must first learn to see, and then act to preserve, the beauty we have on our doorsteps - no matter where we live. A perceptive and powerful call-to-arms written in mesmerising prose, *The Stubborn Light of Things* confirms Harrison as a central voice in British nature writing.

The Rational Optimist Lulu.com

This book provides the first systematic and accessible text for students of hospitality and the culinary arts that directly addresses how more sustainable restaurants and commercial food services can be achieved. Food systems receive growing attention because they link various sustainability dimensions. Restaurants are at the heart of these developments, and their decisions to purchase regional foods, or to prepare menus that are healthier and less environmentally problematic, have great influence on food production processes. This book is systematically designed around understanding the inputs and outputs of the commercial kitchen as well as what happens in the restaurant from the perspective of operators, staff and the consumer. The book considers different management approaches and further looks at the role of restaurants, chefs and

staff in the wider community and the positive contributions that commercial kitchens can make to promoting sustainable food ways. Case studies from all over the world illustrate the tools and techniques helping to meet environmental and economic bottom lines. This will be essential reading for all students of hospitality and the culinary arts.

Star Wars the Mandalorian: Groggu Annual 2022 UNESCO

The Fortean Research Center was founded in Lincoln, Nebraska in 1982. During the two decades of its existence, this volunteer group of researchers and investigators delved deep into the unexplained. Exploring events in Nebraska - and far beyond - that included ghosts, UFOs, Bigfoot encounters, animal mutilations, government cover-ups, alleged alien abductions, psychic phenomena, cult activity, and even a sighting of a blob-like mystery creature the Fortean Research Center became recognized among members of the Fortean, paranormal, and UFO research communities around the world, as a reliable and trusted source of information. Here is the entire collection of the Journal of the Fortean Research Center, 23 issues in all. These publications are a reflection of their time, and demonstrate in many cases the beginning steps into subjects familiar to the public today: alleged UFO crashes and landings at government installations, alien abductions, cryptozoology and more.

Game of Spies Oxford University Press, USA

Described as one of the most beautiful and unique sculpture parks in the United Kingdom, Sculpture by the Lakes marries the soft beauty of nature's wild river landscape with the more formal presentation of monumental outdoor sculpture. It is that combination of art and landscape that inspires Sculpture by the Lakes. Whether it is work on a monumental scale that relates to its environment, or smaller works, the sculptures of Simon Gudgeon are perfectly placed in the delicately nurtured natural landscape to visually enhance their surroundings. The effect is a balance, a harmony of form and context where the experience is central. Without walls, without interpretation, each person can engage with the art and the ever-changing environment.

The Sustainable Chef Island Press

Biophilic and Bioclimatic Architecture is a guide to innovative architectural design for architects, engineers and other specialists who are working with biophilic and bioclimatic architectural concepts. Biophilic and Bioclimatic Architecture has three parts: • Part I focuses on the relationship between architecture and human needs and the creation process, demonstrating the meaning of architectural value in architectural hypothesis. • Part II opens the way towards a new understanding of biophilic architecture as a response to the negative actions of humans and the negative effects of using natural resources. • Part III shows the benefits of combining the effects of the climate with the notion of human comfort in bioclimatic architecture.

The Stubborn Light of Things Summersdale

Australians have stewardship of a beautiful, diverse and unique environment. We have long had a sense that the biodiversity of this country is special. Yet, despite our sense of its importance, in many parts of our country biodiversity is in trouble. Given the economic, ecological and social importance of biodiversity to our nation, CSIRO has been conducting research into Australia's biodiversity for nearly 90 years. This research has not simply focused on quantifying the challenge, but also on identifying practical solutions for its sustainable management. Biodiversity: Science and Solutions for Australia aims to provide access to the latest scientific knowledge on Australia's biodiversity in an engaging and clear format. The book describes the ancient origins and unique features of Australia's species, as well as the current status of our biodiversity. It outlines tools for management and planning, highlights Indigenous perspectives on biodiversity, and looks at how Australia's biodiversity interacts with agriculture, the resources sector, cities, and with our changing global environment. Importantly, it also shows that biodiversity is in the eye of the beholder: for some it is our life support system, for others it is a resource to be used, for others it is a precious cultural symbol.

Through High Windows Springer Nature

A stylish hardback notebook from the bestselling illustrator Millie Marotta, complete with elastic closer. The notebook features 15 full page illustrations of wild animals, birds and insects from Millie Marotta's Wild Savannah for colouring in. This handy narrow-ruled journal is perfect for fans of Millie Marotta's illustrations as well as those looking to relax and get creative with their coloured pencils.

RSPB Birds Slim Calendar 2025 CSIRO PUBLISHING

How can environmental degradation be stopped? How can it be reversed? And how can the damage already done be repaired? The authors of this volume argue that a two-pronged approach is needed: reducing demand for ecosystem goods and services and better management of them, coupled with an increase in supply through environmental restoration. Restoring Natural Capital brings together economists and ecologists, theoreticians, practitioners, policy makers, and scientists from the developed and developing worlds to consider the costs and benefits of repairing ecosystem goods and services in natural and socioecological systems. It examines the business and practice of restoring natural capital, and seeks to establish common ground between economists and ecologists with respect to the restoration of degraded ecosystems and landscapes and the still broader task of restoring natural capital. The book focuses on developing strategies that can achieve the best outcomes in the shortest amount of time as it: • considers conceptual and theoretical issues from both an economic and ecological perspective • examines specific strategies to foster the restoration of natural capital and offers a synthesis and a vision of the way forward Nineteen case studies from around the world illustrate challenges and achievements in setting targets, refining approaches to finding and implementing restoration projects, and using restoration of natural capital as an economic opportunity. Throughout, contributors make the case that the restoration of natural capital requires close collaboration among scientists from across disciplines as well as local people, and when successfully executed represents a practical, realistic, and essential tool for achieving lasting sustainable development.

The Bat Book Routledge

""Game of Spies' tells the story of a lethal spy triangle between 1942 and 1944 in Bordeaux - and of France's greatest betrayal by aristocratic and right-wing Resistance leader Andre Grandclement. The story centres on three men: one British, one French and one German and the duel they fought out in an atmosphere of collaboration, betrayal and assassination, in which comrades sold fellow comrades, Allied agents and downed pilots to the Germans, as casually as they would a bottle of wine. It is a story of SOE, treachery, bed-hopping and executions in the city labelled 'la plus collaboratrice' in the whole of France."--Publisher description.

Sculpture by the Lakes William Collins

A blue-covered edition of the classic journal devotes a page to every day of a five-year time span and features illustrations by an artist whose work is regularly featured in The New York Times, in a volume that is complemented by a red ribbon bookmark and additional pages for recording literary and travel experiences.

Cat Yoga Harper Collins

Covering more than 900 species, and illustrated with 4,700 photographs, Europe's Birds is the most comprehensive, authoritative and ambitious single-volume photographic guide to Europe's birds ever produced. Easy-to-use, practical and accessible, this guide provides the information necessary for birdwatchers of all abilities to name any bird they see. Detailed descriptions cover the birds in all their plumages--male, female, breeding, non-breeding, adult and immatures, as well as distinctive subspecies. The clear text covers all aspects of identification, including moult and vocalizations, and provides details on range, status and habitat. An unrivalled selection of photographs, chosen to be as informative as possible, makes this a beautiful book to enjoy, as well as an up-to-date and essential source of identification knowledge. Europe's Birds is produced by the same team that created Britain's Birds, which has been described as "without doubt the best photo guide on the market" (Andy Stoddart, Rare Bird Alert). The authors include top-class wildlife photographers, writers and editors, and an imaginative, highly skilled designer. All are experienced birdwatchers themselves, who know what is needed in an identification guide for birdwatchers living or travelling in Europe.

RSPB Deluxe Slim Diary 2025 Penguin

Based on study of Indian bird life extending over the four decades, this book covers all that one would like to know about birds.

RSPB Robins Slim Calendar 2025 Bluebird

Err, I think you mean Downward Cat How can you tell whether your cat is purrfecting its Sphinx pose or just being, well, a cat? You may think your cat is just a naturally bendy weirdo, but the truth is, they're probably one of the growing number of Zen Yogi Cats - and this book is here to expose what happens when yoga and cats collide. Whether they're paws-ing to enjoy their morning Sun Salutations, working on their flexibility, searching for the divine (laser) light or exhaling hairballs, these cats are getting their om-meow on in the world of Cat Yoga.
