This book is a very concise introduction to the basic knowledge of scientific publishing. It starts with the basics of writing a scientific paper, and recalls the different types of scientific documents. It gives an overview on the major scientific publishing companies and different business models. The book also introduces to abstracting and indexing

services and how they can be used for the evaluation of science, scientists, and institutions. Last but not least, this short book faces the problem of plagiarism and publication ethics.

Cambridge English For Engineering Students Book With Audio Cds (2) South Asian Edition MC/Summertown ELT

Biosocialities, Genetics and the Social Sciences explores the social, cultural and economic transformations that result from innovations in genomic knowledge and technology. This pioneering collection uses Paul Rabinow's concept of biosociality to chart the shifts in social relations and ideas about nature, biology and identity brought about by developments in biomedicine. Based on new empirical research, it contains chapters on genomic research into embryonic stem cell therapy, breast cancer, autism, Parkinson's and IVF treatment, as well as on the expectations and education surrounding genomic research. It covers four main themes: novel modes of identity and identification, such as genetic citizenship the role of institutions, ranging from

disease advocacy organizations and voluntary organizations to the state the production of biological knowledge, novel life-forms, and technologies the generation of wealth and commercial interests in biology. Including an afterword by Paul Rabinow and case studies on the UK, US, Canada, Germany, India and Israel, this book is key reading for students and researchers of the new genetics and the social sciences – particularly medical sociologists, medical anthropologists and those involved with science and technology studies.

Once close friends, writers Gwyn Barry and Richard Tull now find themselves in fierce competition. While Tull has

spiralled into a mire of literary obscurity and belletristic odd jobs, Barry's atrocious attempts at novels have brought him untold success. Prizes, prestige and wealth abound, and from far below Tull can only watch, stewing in torment. Until, that is, resentment turns to revenge. Consumed by the question of how one writer can really hurt another, Tull's quest for an answer will unleash increasingly violent urges on both writers' lives. TECHNICAL VOCABULARY, ENGLISH-FRENCH, FOR SCIENTIFIC, TECHNICAL, AND INDUSTRIAL

STUDENTS ... Random House
Anthropomorphism – the projection of the human form onto the every aspect of the world – closely relates to early modern notions of analogy and microcosm. What had been construed in Antiquity as a ready metaphor for the order of creation was reworked into a complex system relating the human body to the body of the world. Numerous books and images - cosmological diagrams, illustrated treatises of botany and zoology, maps, alphabets, collections of ornaments, architectural essays – are entirely constructed on the anthropomorphic analogy. Exploring the complexities inherent in such work, the interdisciplinary essays in this volume address how the anthropomorphic model is fraught with contradictions and

tensions, between magical and rational, speculative and practical thought. Contributors include Pamela Brekka, Anne-Laure van Bruaene, Ralph Dekoninck, Agnès Guiderdoni, Christopher P. Heuer, Sarah Kyle, Walter S. Melion, Christina Normore, Elizabeth Petcu, Bertrand Prevost, Bret Rothstein, Paul Smith, Miya Tokumitsu, Michel Weemans, and Elke Werner.

Lingüística textual y enseñanza del español LE/L2 ofrece una visión de conjunto teórico-práctica y actualizada de la Lingüística textual aplicada a la enseñanza del español como lengua extranjera y/o segunda, destinada especialmente a estudiantes graduados y a profesores en formación nativos y no nativos. El volumen, escrito por un

elenco internacional de profesores-investigadores, presenta una visión actualizada y práctica de los géneros textuales más frecuentes en programaciones universitarias. Enmarcado por una síntesis actualizada de estudios e investigaciones en lingüística aplicada que recorre distintas perspectivas teóricas y metodológicas, recoge datos y propuestas procedentes de aulas de aprendizaje de español de distintos contextos internacionales. Su principal propósito es suscitar la reflexión teórico-práctica sobre los géneros discursivos y su papel en el aula, y ofrecer una descripción pormenorizada de los mismos para proporcionar al profesorado en formación, nativo y no nativo, recursos prácticos y propuestas didácticas que

ejemplifican y guían de manera razonada cómo llevar al aula los distintos géneros textuales.

Características principales: • Amplitud de aspectos de la lingüística textual y géneros discursivos abordados enteramente para el español LE/L2 y en español. • Estructuración homogénea de los capítulos que facilita la lectura y da coherencia al conjunto. Atención a géneros escritos y orales desde una perspectiva teórico-práctica que puede inspirar nuevas investigaciones.

Atención a la diversidad geolectal del español, a los contextos en que este es L2 (Europa, EEUU) y a la de sus aprendices (hablantes de herencia, L2, LE). Orientado a la aplicación práctica y docente en la clase de L2/LE, cada capítulo dedicado a un género incluye

consejos, pautas o actividades para el aula. Incluye temática actual en lingüística textual y aprendizaje de lenguas: escritura académica, divulgación científica, textos jurídicos, aprendizaje mediado por ordenador o el lenguaje de las redes. Capítulos bien fundamentados teórica y bibliográficamente, con sólido respaldo de datos empíricos procedentes de corpus, bien contextualizados. Aborda los aspectos teóricos tradicionales relativos al estudio de la tipología textual y los desafíos metodológicos que afronta el profesor al llevar al aula los distintos géneros discursivos. La presente obra presenta, en un solo volumen, una visión actualizada y práctica de los tipos textuales y géneros discursivos de uso más frecuente desde

una perspectiva teórico-práctica: presentación, descripción y puesta en práctica es un esquema de trabajo directo y enormemente útil para su aplicación en el aula. El ámbito internacional en el que se mueven los autores le da una amplitud nunca antes recogida en una obra de lingüística textual. Todo ello hace de Lingüística textual y enseñanza del español LE/L2 una obra de consulta obligada para docentes de español como LE/L2, para estudiantes graduados y formadores de profesores, así como para cualquier persona que desee adquirir una perspectiva actual sobre lingüística textual, géneros discursivos y enseñanza e investigación en español nativo y no nativo.

Teaching Transformation Archaeopress
Lambda Literary Award for Best Book in Transgender Nonfiction, 2013 If feminist studies and transgender studies are so intimately connected, why are they not more deeply integrated? Offering multidisciplinary models for this assimilation, the vibrant essays in *Transfeminist Perspectives in and beyond Transgender and Gender Studies* suggest timely and necessary changes for institutions of higher learning.

Responding to the more visible presence of transgender persons as well as gender theories, the contributing essayists focus

on how gender is practiced in academia, health care, social services, and even national border patrols. Working from the premise that transgender is both material and cultural, the contributors address such aspects of the university as administration, sports, curriculum, pedagogy, and the appropriate location for transgender studies. Combining feminist theory, transgender studies, and activism centered on social diversity and justice, these essays examine how institutions as lived contexts shape everyday life.
