The 1995 National Household Education Survey (NHES:95) was a random digit dial telephone survey of households developed by the National Center for Education Statistics. The NHES:95 included two topical survey components: the Adult Education component, which collected information about adults' participation in adult education, and the Early Childhood Program Participation (ECPP) component, which collected information about children's participation in nonparental child care and early childhood programs. This manual provides documentation and guidance for users of the public release data file for the ECPP component. Information about the purpose of the study, the data collection instruments, the sample design, and data collection and data processing procedures is provided. Some information about factors that should be kept in mind when using ECPP data is also provided. For the ECPP component, interviews were conducted with parents of 14,064 children, a figure that included 101 home schooled children. Four appendixes present screening and study questionnaires, information about the file layout, the Statistical Analysis System code for derived variables, and the ECPP codebook. (Contains 8 tables, 2 figures, and 23 references.) (SLD)

The world's linguistic map has changed in recent years due to the vast disappearance of indigenous languages. Many factors affect the alteration of languages in various areas of the world including governmental policies, education, and colonization. As indigenous languages continue to be affected by modern influences, there is a need for research on the current state of native linguistics that remain across the globe. Indigenous Language Acquisition, Maintenance, and Loss and Current Language Policies is a collection of innovative research on the diverse policies, influences, and frameworks of indigenous languages in various regions of the world. It discusses the maintenance, attrition, or loss of the indigenous languages; language status in the society; language policies; and the grammatical characteristics of the indigenous language that people maintained and spoke. This book is ideally designed for anthropologists, language professionals, linguists, cultural researchers, geographers, educators, government officials, policymakers, academicians, and students.

Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyze the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

This edited volume brings together the work of a number of researchers working in the framework of Processability Theory (PT), a psycholinguistic theory of second language acquisition (SLA) (Pienemann 1998; 2005). The aim of the volume is two-fold: It engages with current issues in both theory development and theory application and focuses on theoretical developments within the framework of PT as well as issues related to second language teaching and assessment. In coordinating approaches to addressing both theoretical and applied aspects of SLA, this volume aims at bridging the gap between theory and practice. It also reflects the richness of debate within the field of PT-based research. The volume is intended for postgraduate students, SLA researchers as well as language teachers. As of January 2019, this e-book is freely available, thanks to the support of libraries working with Knowledge Unlatched.

Told through the fictional experiences of Okonkwo, a wealthy and fearless Igbo warrior of Umuofia in the late 1800s, Things Fall Apart explores one man's futile resistance to the devaluing of his Igbo traditions by British political and religious forces and his despair as his community capitulates to the powerful new order.
