Simple objects elegantly made of leather are featured everywhere on maker blogs, photo-sharing sites, tutorials, and craft marketplaces. Leather is in the real world, too, in heavily curated hipster boutiques and well-edited coffee shops that sell sundries. *Idiot's Guides®: Leather Crafts* offers 20 projects (illustrated with copious step-by-step photos), ranging from beginner to advanced, each one building on the skills that have been taught in prior projects. Parachute cord, which is now universally known as paracord, is a lightweight nylon rope originally

used by paratroopers during World War II. It is now employed as a general purpose utility cord by military personnel and civilians alike. Hikers and other outdoor enthusiasts have made "survival bracelets" from paracord, which are meant to be unraveled when needed to secure cargo, lash together poles, and fix broken straps and laces. As more colors become available, crafters are discovering that paracord makes an excellent material for fun and stylish friendship bracelets, lanyards, belts, dog leashes, key chains, and more. Originating from Instructables, a popular project-based community made up of all sorts of people with a desire to pass on their wisdom to others, *Practical Paracord Projects* contains ideas from a number of authors who show just how easy it is to make virtually anything from paracord. *Practical Paracord Projects* provides step-by-step instructions on a variety of useful and fun objects involving paracord. Guided by detailed photographs, the reader will create such practical and unusual projects as: A laptop harness A can koozie An eyeglass lanyard A hanging chair Sandals A leatherman pouch And much more!
