Chess For Dummies Marcombo

On 24 April 1942, Czechoslovak journalist and active CPC member Julius Fucik was detained in Pankrác Prison in Prague, where he was subsequently interrogated and tortured, before being sent to Germany to stand trial for high treason. It was during this time that Fucik's Notes from the Gallows (Czech: Reportáž psaná na oprátce, literally Reports Written Under the Noose) arose—written on pieces of cigarette paper and smuggled out by two sympathetic prison warders named Kolinsky and Hora. The notes were treated as great literary works after his death in 1943 and translated into many languages worldwide, resulting in this book, which was first published in English in 1948. It describes events in the prison since Fucik's arrest and is filled with hope for a better, Communist future.

Manual de automóviles Oxford University Press

El emprendimiento es un determinante fundamental del crecimiento y la creación de empleo. Pese a que los emprendedores abundan en América Latina y el Caribe, las empresas de la región son más pequeñas y menos propensas a crecer e innovar que las de otras regiones. El crecimiento de la productividad lleva décadas siendo mediocre y el reciente period de auge de las materias primas no ha supuesto una excepción. Así pues, la presencia de emprendedores dinámicos será necesaria para impulsar la creación de puestos de trabajo de calidad y la aceleración del crecimiento de la productividad en la región. En El emprendimiento en América Latina: muchas empresas y poca innovación se estudia el panorama del emprendimiento en América Latina y el Caribe. El libro recurre a nuevas bases de datos que abordan cuestiones como la creación de empresas, las dinámicas empresariales, las decisiones de exportar y el comportamiento de las corporaciones multinacionales y sintetiza los resultados de un análisis exhaustivo del estatus, las perspectivas y los retos del emprendimiento en la región. Asimismo, el libro suministra herramientas útiles e información para ayudar a los profesionales y responsables de las políticas a identificar los ámbitos de las mismas que los gobiernos pueden explorar para impulsar la innovación e incentivar el emprendimiento transformador con potencial de crecimiento elevado.

The Washington Manual of Emergency Medicine Penguin

KEY BENEFIT: This text allows students to apply what they've learned to real company challenges and best practices by offering a multitude of problems in the text and integrated case studies on video. KEY TOPICS: Its coverage includes an extensive amount of service applications and firms to give students an in-depth look at operations in the real world. MARKET: For general business students interested in operations management and gaining the fundamental working knowledge of a firm.

Narcoland Bantam

This "investigative magnum opus" offers a jaw-dropping history of Mexican drug cartels as it transports readers to the frontlines of the 'war on drugs' in Latin America (Los Angeles Times). "A riveting story . . . [from] an incredibly brave journalist." —NPR The "war on drugs" has so far cost more than 60,000 lives. Hernández explains in riveting detail how Mexico became a base for the mega-cartels of Latin America and one of the most violent places on the planet. At every turn, Hernández names not just the narcos, but also the politicians, functionaries, judges, and entrepreneurs who have collaborated with them. In doing so, she reveals the mind-boggling depth of corruption in Mexico's government and business elite. Hernández became a journalist after her

father was kidnapped and killed and the police refused to investigate without a bribe. She gained national prominence in 2001 with her exposure of excess and misconduct at the presidential palace, and previous books have focused on criminality at the summit of power, under presidents Vicente Fox and Felipe Calderón. The product of 5 years' investigative reporting—and the subject of intense national controversy—Narcoland is a publishing and political sensation in Mexico.

Manual de automóviles World Scientific

The Encyclopedia of Classic Cars lists over 1000 of the world's most coveted cars, clearly ordered by manufacturer for easy reference. Detailed text is included on development and technical features as well as specification tables, listing every fact and figure imaginable. With over 1300 color and black-and-white photographs and illustrations, this is the ideal reference work for car enthusiasts and casual readers alike.

Catalysis and Electrocatalysis at Nanoparticle Surfaces Lippincott Williams & Wilkins

This book leads readers from a basic foundation to an advanced-level understanding of fluid and solid mechanics. Perfect for graduate or PhD mathematical-science students looking for help in understanding the fundamentals of the topic, it also explores more specific areas such as multi-deck theory, time-mean turbulent shear flows, non-linear free surface flows, and internal fluid dynamics. Fluid and Solid Mechanics is the second volume of the LTCC Advanced Mathematics Series. This series is the first to provide advanced introductions to mathematical science topics to advanced students of mathematics. Edited by the three joint heads of the London Taught Course Centre for PhD Students in the Mathematical Sciences (LTCC), each book supports readers in broadening their mathematical knowledge outside of their immediate research disciplines while also covering specialized key areas.

Mecanica Del Automovil World Bank Publications

Cecilia Valdés is arguably the most important novel of 19th century Cuba. Originally published in New York City in 1882, Cirilo Villaverde's novel has fascinated readers inside and outside Cuba since the late 19th century. In this new English translation, a vast landscape emerges of the moral, political, and sexual depravity caused by slavery and colonialism. Set in the Havana of the 1830s, the novel introduces us to Cecilia, a beautiful light-skinned mulatta, who is being pursued by the son of a Spanish slave trader, named Leonardo. Unbeknownst to the two, they are the children of the same father. Eventually Cecilia gives in to Leonardo's advances; she becomes pregnant and gives birth to a baby girl. When Leonardo, who gets bored with Cecilia after a while, agrees to marry a white upper class woman, Cecilia vows revenge. A mulatto friend and suitor of hers kills Leonardo, and Cecilia is thrown into prison as an accessory to the crime. For the contemporary reader Helen Lane's masterful translation of Cecilia Valdés opens a new window into the intricate problems of race relations in Cuba and the Caribbean. There are the elite social circles of European and New World Whites, the rich culture of the free people of color, the class to which Cecilia herself belonged, and then the slaves, divided among themselves between those who were born in Africa and those who were born in the New World, and those who worked on the sugar plantation and those who worked in the households of the rich people in Havana. Cecilia Valdés thus presents a vast portrait of sexual, social, and racial oppression, and the lived experience of Spanish colonialism in Cuba.

Manual de automóviles Penguin

This book describes the weapons and vehicles of all the countries that fought in World War II in a clear and comprehensive manner. It offers an excellent overview of the divers weaponry used by both the Axis Powers and the Allies, with everything you might want to know about the development and deployment of each type of weapon along with the relevant technical specifications.

"Vintage Iacocca . . . He is fast-talking, blunt, boastful, and unabashedly patriotic. Lee Iacocca is also a genuine folk hero. . . . His career is breathtaking."—Business Week He's an American legend, a straight-shooting businessman who brought Chrysler back from the brink and in the process became a media celebrity, newsmaker, and a man many had urged to run for president. The son of Italian immigrants, Lee Iacocca rose spectacularly through the ranks of Ford Motor Company to become its president, only to be toppled eight years later in a power play that should have shattered him. But Lee Iacocca didn't get mad, he got even. He led a battle for Chrysler's survival that made his name a symbol of integrity, know-how, and guts for millions of Americans. In his classic hard-hitting style, he tells us how he changed the automobile industry in the 1960s by creating the phenomenal Mustang. He goes behind the scenes for a look at Henry Ford's reign of intimidation and manipulation. He recounts the miraculous rebirth of Chrysler from near bankruptcy to repayment of its \$1.2 billion government loan so early that Washington didn't know how to cash the check.

From the bestselling author of The 48 Laws of Power and The Laws of Human Nature, a vital work revealing that the secret to mastery is already within you. Each one of us has within us the potential to be a Master. Learn the secrets of the field you have chosen, submit to a rigorous apprenticeship, absorb the hidden knowledge possessed by those with years of experience, surge past competitors

to surpass them in brilliance, and explode established patterns from within. Study the behaviors of Albert Einstein, Charles Darwin, Leonardo da Vinci and the nine contemporary Masters interviewed for this book. The bestseller author of The 48 Laws of Power, The Art of Seduction, and The 33 Strategies of War, Robert Greene has spent a lifetime studying the laws of power. Now, he shares the secret path to greatness. With this seminal text as a guide, readers will learn how to unlock the passion within and become masters.

Libros en venta en Hispanoamérica y España Chartwell Books

When Bob Lutz retired from General Motors in 2010, after an unparalleled forty-seven-year career in the auto industry, he was one of the most respected leaders in American business. He had survived all kinds of managers over those decades: tough and timid, analytical and irrational, charismatic and antisocial, and some who seemed to shift frequently among all those traits. His experiences made him an expert on leadership, every bit as much as he was an expert on cars and trucks. Now Lutz is revealing the leaders-good, bad, and ugly-who made the strongest impression on him throughout his career. Icons and Idiots is a collection of shocking and often hilarious true stories and the lessons Lutz drew from them. From enduring the sadism of a Marine Corps drill instructor, to working with a washed-up alcoholic, to taking over the reins from a convicted felon, he reflects on the complexities of all-too-human leaders. No textbook or business school course can fully capture their idiosyncrasies, foibles and weaknesses - which can make or break companies in the real world. Lutz shows that we can learn just as much from the most stubborn, stupid, and corrupt leaders as we can from the inspiring geniuses. The result is a powerful and entertaining guide for any aspiring leader.

Weapons of World War II CRC Press

Bringing together contributions by leaders in the field of clinical psychology, this highly readable textbook provides a current perspective on theory, training, assessment, consultation, research, and outpatient and inpatient practice. Bridging the gap between theory and practice, contributors offer a professional perspective on the various specialized activities and settings of a clinical psychologist. With this unique insight, advanced undergraduate and beginning graduate students gain a realistic understanding of the life of a clinical psychologist as well as the diverse professional opportunities in the field.

The Encyclopedia of Classic Cars

Illustrating developments in electrochemical nanotechnology, heterogeneous catalysis, surface science and theoretical modelling, this reference describes the manipulation, characterization, control, and application of nanoparticles for enhanced catalytic activity and selectivity. It also offers experimental and synthetic strategies in nanoscale surface science. This standard-setting work clarifies several practical methods used to control the size, shape, crystal structure, and composition of nanoparticles; simulate metal-support interactions; predict nanoparticle behavior; enhance catalytic rates in gas phases; and examine catalytic functions on wet and dry surfaces.
