ROBINSON ONEILL

The Colonial Records of the State of Georgia TheBookEdition
 This is the sixth volume to be dedicated to the pioneering linguistic work produced by missionaries in Asia. This volume presents research into the documentation, study and description of Chinese, Japanese, Vietnamese and Tamil. It provides a selection of papers which primarily concentrate on the Society of Jesus and their linguistic production, but also covers linguistic works written by Franciscans, the Order of Discalced Carmelites and works of other religious institutions, such as the Propaganda Fide and the Missions Étrangères de Paris. New insights are provided regarding these works and their reception among European scholars interested in these 'exotic' languages and

cultures. Each text is placed in its historical context and various approaches to some of the most important descriptive problems faced by these linguists avant la lettre are analyzed, such as the establishment of an adequate romanization system, the description of typological features of these Asian languages, such as tonality and aspiration in Chinese and Vietnamese, agglutination and derivational morphology in Japanese and Tamil, and, pragmatics, in particular politeness in Japanese. This volume not only looks at methodology and descriptive techniques, but also comments on missionary linguistic policies in Asia and offers articles of interest to historiographers of linguistics, historians, typologists, descriptive linguists and those interested in translation studies.

Oeuvres choisies de Bossuet: Panégyriques. 1822 Academic Press
 Consideration of the interactions between decisions made at one point in the supply chain and its effects on the subsequent stages

is the core concept of a systems approach. Postharvest Handling is unique in its application of this systems approach to the handling of fruits and vegetables, exploring multiple aspects of this important process through chapters written by experts from a variety of backgrounds. Newly updated and revised, this second edition includes coverage of the logistics of fresh produce from multiple perspectives, postharvest handling under varying weather conditions, quality control, changes in consumer eating habits and other factors key to successful postharvest handling. The ideal book for understanding the economic as well as physical impacts of postharvest handling decisions. Key Features: *Features contributions from leading experts providing a variety of perspectives *Updated with 12 new chapters *Focuses on application-based information for practical implementation *System approach is unique in the handling of fruits and vegetables

Missionary Linguistics VI St. Martin's Press

The fourth edition of CMOS Digital Integrated Circuits: Analysis and Design continues the well-established tradition of the earlier editions by offering the most comprehensive coverage of digital CMOS circuit design, as well as addressing state-of-the-art technology issues highlighted by the widespread use of nanometer-scale CMOS technologies. In this latest edition, virtually all chapters have been re-written, the transistor model equations and device parameters have been revised to reflect the significant changes that must be taken into account for new technology generations, and the material has been reinforced with up-to-date examples. The broad-ranging coverage of this textbook starts with the fundamentals of CMOS process technology, and continues with MOS transistor models, basic

CMOS gates, interconnect effects, dynamic circuits, memory circuits, arithmetic building blocks, clock and I/O circuits, low power design techniques, design for manufacturability and design for testability.
