Human Origins University of Hawaii Press
 Sheds new light on the identity of the alchemist Fulcanelli • Provides new understanding of the relationships between the most important figures of the esoteric milieu of Paris in the first half of the 20th century • Includes a wealth of rarely seen documents, photos, and letters Fulcanelli, operative alchemist and author of *The Mystery of the Cathedrals* and *The Dwellings of the Philosophers*--two of the most important esoteric works of the twentieth century--remains himself a mystery. The true identity of the man who allegedly succeeded in creating the philosopher's stone has never been discovered, despite ardent searches by many--even the OSS (the wartime U.S. intelligence agency, later to become the CIA) claimed to have looked for him following the end of World War II. Geneviève Dubois looks at the esoteric milieu of Paris at the turn of the century, a time that witnessed a great revival of the alchemical tradition, and investigates some of its salient personalities. Could one of these have been this

enigmatic man, reported to have last appeared in Seville, Spain, in 1952 when he would have been 113 years of age? The trail followed by the author encounters such figures as Papus, René Guénon, Schwaller de Lubicz, Pierre Dujols, Eugene Canseliet, and Jean-Julien Champagne. Working from rare documents, letters, and photos, Dubois suggests that one of these men could have been hiding his activity behind the pseudonym of Fulcanelli or that Fulcanelli may even have been a composite fabricated by several of these individuals working together. Beyond its attempt to reveal the actual identity of Fulcanelli, *Fulcanelli and the Alchemical Revival* also presents an explanation of the alchemical doctrine and reveals the unsuspected relationships among the important twentieth-century truth seekers it highlights.

Annotation. *Inscribed Landscapes* explores the role of inscription in the social construction of place, power, and identity. Bringing together twenty-one scholars across a range of fields--primarily archaeology, anthropology, and geography--it examines how social codes and hegemonic practices have resulted in the production of particular senses of place, exploring the physical and metaphysical marking of place as a means of accessing

social history.

In July of 2012, Celtic coins over two thousand years old and valued at sixteen million dollars were found on an island off the coast of France. Learning of the discovery, amateur treasure hunters, Mick and Joelle Scott, begin their research. Believing that they might find additional Celtic treasures in the same area, they decide to travel to western France. At the same time, Marcus Demetrius, a wealthy shipping mogul who believes he is related to Julius Caesar, becomes obsessed with acquiring the same antiquities. He will stop at nothing, including murder to obtain the treasure he desires. Demetrius's associates begin sending death threats and the Scott family soon realize that they are all in danger. After a kidnapping takes place, Interpol, an International Criminal Police Organization, gets involved. A complex double-cross is planned that will lure Demetrius into the open, but not without placing the Scott family more deeply into danger. Will they find more Celtic treasure that has been hidden for over two thousand years? What ancient secrets will be revealed? In this fast-paced novel by DC Johnston, the Mick Scott Adventure begins.

Le Druidisme est une des plus magnifiques doctrines métaphysiques qui se soient perpétuées jusqu'à nos jours. Les Druides sont toujours vivants, et de plus en plus présents. Le Druidisme est une des expressions de la Tradition Universelle. Il en est l'expression, répondant au génie de la Gaule et des Celtes, celui de nos ancêtres, qui se réveille en nous. Se pencher sur le Druidisme, c'est honorer ses ancêtres et en découvrir les qualités. Et si le Druidisme redevenait la solution actuelle pour appréhender au mieux la Divinité ?

Published in two volumes, the purpose of Jersey Folklore & Superstitions is three-fold: To bring all the previously published

and any non-published material on Jersey folktales and superstitions together in one publication, to expand on the detail of this material and to place it in context by comparing it with similar or more complete traditions from the Gulf of St. Malo as a whole (Guernsey, Normandy and Brittany) and to consider its functions and origins. To this end they are further compared with traditions from Europe generally, with some examples from further afield and with mythologies worldwide. For Jersey readers this work will give an overview of their oral tradition, its significance and how it relates to the body of such traditions within Europe as a whole. For general readers the use of the Island's traditions as a template for those elsewhere, the process of comparison with those from other regions and the attempt to outline the broad range of sources from which they are drawn, may give an insight into particular areas of folk tradition generally, such as fairy-lore, indigenous sorcery (witchcraft), domestic superstitions and the roles and origins of spectral animals and other beings. For this purpose, most chapters are broadly divided into four main sections. The Jersey material is presented first, followed by that from Guernsey, Normandy and Brittany, followed by an analysis using examples from further afield and from mythology. Each chapter concludes with a review and summary of this material. Liberal quotations of related 'ditons' or sayings in Jèrriais (the Jersey Language) are included with each chapter. The author has four previous publications; Jersey Superstitions in Etching & Poetry (hardcover 1981), An Introduction to Channel Islands' Pewter (softcover 1993), Jersey Maritime Folklore (M/S format, 1996) and Sunbonnets in the Channel Islands & worldwide (CD-R 2005).

Professor Alexander Thom, who died in 1985, was a distinguished engineer. Independently of his 'mainstream' academic career, he developed a deep and active interest in the prehistoric megalithic sites of Britain and Brittany. Thom's interpretations of the field data have aroused strong interest and some intense controversy.
