Political Hinduism was once considered a sort of fringe ideology, shadowy and even misunderstood. Its ideas and narratives

seemed, in popular discourse, to lack analytical rigour and were easily dismissed. But history shows that political Hinduism as an intellectual idea was a pioneering theme in India's nationhood. In fact, it precedes the Indian republic and has been one of the most resilient political theories of India, which survived many bans, boycotts and decades out of power to become, in the twenty-first century, the predominant political force of India. The adherents of political Hinduism are as

determined as its detractors—one complains about facing relentless prejudice; the other throws accusations of promoting continuous religious strife. One believes that India cannot be saved without decimating political Hinduism; the other is sanguine that only political Hinduism can save the future of India. Soul and Sword traces the journey of political Hinduism from events that are critical to its self-narration, that is, early Indian resistance to invasions, to intellectual

definitions by nineteenth-century *littérateurs* and more contemporary electoral politics. It tries to understand the context and historical sources used to construct and promote political Hinduism's world view. From award-winning writer Hindol Sengupta, *Soul and Sword* is absolutely critical reading to understand India's present and future.

This 2001 book provides a selective annotated bibliography of the principal floras and related works of inventory for vascular plants. The second edition was completely updated and expanded to take into account the substantial literature of the late twentieth century, and features a more fully developed review of the history of floristic documentation. The works covered are principally specialist publications such as floras, checklists, distribution atlases, systematic iconographies and enumerations or catalogues, although a relatively few more popularly oriented books are also included. The Guide is organised in ten geographical divisions, with these successively divided into regions and units, each of which is prefaced with a historical review of floristic studies. In addition to the bibliography, the book includes general chapters on botanical bibliography, the history of floras, and general principles and current

trends, plus an appendix on bibliographic searching, a lexicon of serial abbreviations, and author and geographical indexes.

The Routledge History of Emotions in the Modern World brings together a diverse array of scholars to offer an overview of the current and emerging scholarship of emotions in the modern world. Across thirty-six chapters, this work enters the field of emotion from a range of angles.

Named emotions – love, anger, fear – highlight how particular categories have been deployed to make sense of feeling and their evolution over time.

Geographical perspectives provide access to the historiographies of regions that are less well-covered by English-language sources, opening up global perspectives and new literatures. Key thematic sections are designed to intersect with critical historiographies, demonstrating the value of an emotions perspective to a range of areas. Topical sections direct attention to the role of emotions in relations of power, to intimate lives and histories of place, as products of exchanges across groups, and

as deployed by new technologies and medias. The concepts of globalisation and modernity run through the volume, acting as foils for comparison and analytical tools. The Routledge History of Emotions in the Modern World is the perfect resource for all students and scholars interested in the history of emotions across the world from 1700.

This fourth edition of A History of India presents the grand sweep of Indian history from antiquity to the present in a compact and readable survey. The authors examine the major political, economic, social and cultural forces which have shaped the history of the subcontinent. Providing an

authoritative and detailed account, Hermann Kulke and Dietmar Rothermund emphasize and analyze the structural pattern of Indian history. The fourth edition of this highly accessible book brings the history of India up to date to consider, for example, the recent developments in the Kashmir conflict. Along with a new glossary, this edition also includes expanded discussions of the Mughal empire and the economic history of India.

This book reinterprets the Muslim architecture and urban planning of South India, looking beyond the Deccan to the regions of Tamil Nadu and Kerala - the historic coasts of Coromandel and Malabar. For the first time a detailed survey of the Muslim monuments of the historic ports and towns demonstrates a rich and diverse architectural tradition entirely independent from the better known architecture of North India and the Deccan sultanates. The book, extensively

illustrated with photographs and architectural drawings, widens the horizons of our understanding of Muslim India and will no doubt pave new paths for future studies in the field.

The History of the Book in South Asia covers not only the various modern states that make up South Asia today but also a multitude of languages and scripts. For centuries it was manuscripts that dominated book production and circulation, and printing technology only began to make an impact in the late eighteenth century. Print flourished in the colonial period and in particular lithographic printing proved particularly popular in South Asia both because it was economical and because it enabled multi-script printing. There are now vibrant publishing cultures in the nation states of South Asia, and the essays in this volume cover the whole range from palm-leaf manuscripts to contemporary print culture. *A Catalogue of Superior Second-hand Books in Literature, Science, and the Fine Arts* Popular Prakashan  
First published in 1990, *Deconstructing America* breaks new ground by locating the European discovery of America within the study of representations of Otherness. Peter Mason acknowledges that America

was part of the European imagination before its discovery, but challenges the claim that the European vision of America is merely a distorted view of some extra-European reality. He relates the way in which Europe tended to see the inhabitants of South America as monstrous figures to a longstanding European tradition on the 'Plinian' human races, and goes on to point out that the existence of similar representations among contemporary Amerindian peoples calls into question the extent to which ethnocentrism is an exclusively European idea. Drawing on anthropological, literary and philosophical studies, he shows how European representations of America constitute a cultural monologue which tells more about the Old World than the New. This book will be a stimulating reading for all those working in the fields of symbolic and cultural anthropology, semiotics, cultural studies, Latin America, structuralism and deconstruction. *50 Christian Books: Scripture, History, Theology, Spirituality and Fiction* Routledge  
The idea of transitions in Indian history emerged early when the term 'transition'

denoted shifts from one period to another. The notion of transition itself has moved beyond being primarily economic to include dimensions of society, culture and ideology. This volume brings together scholarly works that re-examine and re-define the concept of transition by looking into a range of subjects including religion, culture, gender, caste and community networks, maritime and mercantile modes, ideas of nationalism and historiographies across geographical and temporal settings. With contributions by leading scholars from South Asia, this book will be useful to scholars and researchers of ancient history, modern Indian history, sociology and social anthropology, and South Asian studies.

A key factor in improving accountability in achieving an entity's mission is to implement an effective internal control system. An effective internal control system helps an entity adapt to shifting environments, evolving demands, changing risks, and new priorities. As programs change and entities strive to improve operational processes and implement new technology, management continually evaluates its

internal control system so that it is effective and updated when necessary. Section 3512 (c) and (d) of Title 31 of the United States Code (commonly known as the Federal Managers' Financial Integrity Act (FMFIA)) requires the Comptroller General to issue standards for internal control in the federal government.

#### **Deconstructing America**

Regular commercial contacts between Europe and Asia date back to at least the

early years of the Christian era, but the pattern of trade underwent a structural modification following the Portuguese discovery of a route to the East Indies via the Cape of Good Hope. This volume illustrates the consequences of the arrival of large numbers of Europeans in the East. Europeans both participated in, modified and exploited existing trade relationships in the Indian Ocean and the Pacific. The studies reprinted here show how some environments, such as Japan, were hostile, whilst most states welcomed the European commercial contact. The necessity for Europeans to pay for Asian goods using precious metals is emphasised by the inclusion of articles in monetary transfers in Asian trade, a phenomenon which provides a link between economic developments in the Americas and those in Asia from the 16th century onwards.
