More and more people around the world are discovering how
great climbing is, both indoors and outdoors. The Climbing Bible
by internationally renowned climbers and coaches Martin
Mobråtén and Stian Christophersen is a comprehensive guide to
help you train effectively to become a better climber. The authors
have been climbing coaches for a number of years. Based on their
own extensive experience and research, this book collates the
best European training techniques into one book with information
on how to specifically train for the technical, physical and mental
performance factors in climbing - including endurance, power,
motivation, fear of falling, and much more. It also deals with
tactics, fingerboarding and finger strength, general training and
injury prevention, injuries related to climbing, and training plans.
It is illustrated with 400 technique and action photos, and
features stories from top climbers as well as a foreword by
climber and bestselling author Jo Nesbø. The Climbing Bible will
help and motivate you to improve and develop as a climber and

find even more joy in this fantastic sport.

Stoeger's 400-page Bassing Bible is the most complete product
and information guide to black bass fishing available on the
market today. Readers will find complete specifications and up-to-
date retail prices for boats, motors, electronics, rods, reels, lures
and much more! Whether you're in the market for a new, fully
outfitted bass boat or just want to know the sizes and colors
available for a specific lure, you'll find it here, in an easy-to-
navigate guide made specifically with the bass angler in mind.
Bassing Bible also contains crisp, informative articles submitted
by some of the country's top angler-writers; which provide a
wealth of information ranging from new tactical tips and trip
destinations to how to analyze your bassing hole and select the
right crankbait or spinnerbait to target trophy fish. A
manufacturer's directory is included, with mailing addresses,
phone numbers, and website addresses. A detailed index makes
the Bassing Bible an invaluable resource and authoritative guide
for anglers dedicated to the pursuit of America's favorite game
fish.

"This encyclopedia fills a much-needed gap between legal texts
focusing on the theory and history behind the law and more
practical guides dealing with the law and its everyday effect upon
its citizens. Containing approximately 200 articles, the
Encyclopedia includes: brief descriptions of each issue's historical
background, covering important statutes and cases; profiles of
various U.S. laws and regulations; and details of how laws and
regulations vary from state to state."--Publisher description.

For the United States, full involvement in World War II began and
ended in the Pacific Ocean. Although the accepted grand strategy
of the war was the defeat of Germany first, the sweep of Japanese
victory in the weeks and months after Pearl Harbor impelled the
United States to move as rapidly as it could to stem the enemy
tide of conquest in the Pacific. Shocked as they were by the initial
attack, the American people were also united in their

determination to defeat Japan, and the Pacific war became
peculiarly their own affair. In this great theater it was the United
States that ran the war, and had the determining voice in
answering questions of strategy and command as they arose. The
natural environment made the prosecution of war in the Pacific of
necessity an interservice effort, and any real account of it must,
as this work does, take into full account the views and actions of
the Navy as well as those of the Army and its Air Forces. These
are the factors-a predominantly American theater of war covering
nearly one-third the globe, and a joint conduct of war by land,
sea, and air on the largest scale in American history-that make
this volume on the Pacific war of particular significance today. It is
the capstone of the eleven volumes published or being published
in the Army's World War II series that deal with military
operations in the Pacific area, and it is one that should command
wide attention from the thoughtful public as well as the military
reader in these days of global tension.

Despite a dark history marked by the eugenics movement,
increasing numbers of people with disabilities are choosing to
become parents. Recent research reveals that more than 4 million
parents (six percent of American mothers and fathers) are
disabled. This number will unquestionably increase as more
people with disabilities exercise a broader range of lifestyle
options as a result of social integration, civil rights, and new
adaptive technologies. Likewise, there has been a dramatic
increase in the number of veterans who are returning from war
with service-connected disabilities, some of whom may already be
parents and others who will enter parenthood after acquiring their
disability. The right to parent without interference is protected by
the U.S. Constitution and balanced by the judicially recognized
power of the state to interfere to protect the well-being of its
children. This book provides a comprehensive review of the
barriers and facilitators people with diverse disabilities (including
intellectual and developmental disabilities, psychiatric disabilities,
sensory disabilities, and physical disabilities) experience when
they are exercising their fundamental right to create and maintain
families, with a focus on the persistent, systemic, and pervasive

discrimination against parents with disabilities.

Electric propulsion for boats was developed in the early 19th century and—despite the advent of the internal combustion engine—continued with the perfecting of the modern turbo-electric ship. Sustainable and hybrid technologies, pioneered in small inland watercraft toward the end of the 20th century, have in recent years been scaled up to create integrated electric drives for the largest ocean-going vessels. This comprehensive history traces the birth and rebirth of the electric boat from 1835 to the present, celebrating the Golden Age of electric launches, 1880-1910.

The guiding inspiration of this book is the attraction and distance that mark the relation between anthropology and philosophy. This theme is explored through encounters between individual anthropologists and particular regions of philosophy. Several of the most basic concepts of the discipline—including notions of ethics, politics, temporality, self and other, and the nature of human life—are products of a dialogue, both implicit and explicit, between anthropology and philosophy. These philosophical undercurrents in anthropology also speak to the question of what it is to experience our being in a world marked by radical difference and otherness. In *The Ground Between*, twelve leading anthropologists offer intimate reflections on the influence of particular philosophers on their way of seeing the world, and on what ethnography has taught them about philosophy. Ethnographies of the mundane and the everyday raise fundamental issues that the contributors grapple with in both their lives and their thinking. With directness and honesty, they relate particular philosophers to matters such as how to respond to the suffering of the other, how concepts arise in the give and

take of everyday life, and how to be attuned to the world through the senses. Their essays challenge the idea that philosophy is solely the province of professional philosophers, and suggest that certain modalities of being in the world might be construed as ways of doing philosophy. While the achievement gap has dominated policy discussions over the past two decades, relatively little attention has been paid to a gap even more at odds with American ideals: the opportunity gap. Opportunity and achievement, while inextricably connected, are very different goals. Every American will not go to college, but every American should be given a fair chance to be prepared for college. In communities across the U.S., children lack the crucial resources and opportunities, inside and outside of schools that they need if they are to reach their potential. *Closing the Opportunity Gap* offers accessible, research-based essays written by top experts who highlight the discrepancies that exist in our public schools, focusing on how policy decisions and life

circumstances conspire to create the "opportunity gap" that leads inexorably to stark achievement gaps. They also describe sensible policies grounded in evidence that can restore and enhance opportunities. Moving beyond conventional academic discourse, *Closing the Opportunity Gap* will spark vital new conversations about what schools, parents, educators, and policymakers can and should do to give all children a fair chance to thrive.

Since the Revolutionary War, America's military and political leaders have recognized that U.S. national security depends upon the collection of intelligence. Absent information about foreign threats, the thinking went, the country and its citizens stood in great peril. To address this, the Courts and Congress have historically given the President broad leeway to obtain foreign intelligence. But in order to find information about an individual in the United States, the executive branch had to demonstrate that the person was an agent of a foreign power. Today, that barrier no longer exists. The intelligence community now collects massive amounts of data and then looks for potential threats to the United States. As renowned national security law scholar Laura K. Donohue explains in *The Future of Foreign Intelligence*, global communications systems and digital technologies have changed our lives in countless ways. But they have also contributed to a worrying transformation. Together with statutory alterations instituted in the wake of 9/11, and secret legal interpretations that have only recently become public, new and emerging technologies have radically expanded the amount and type of information that the government collects about U.S. citizens. Traditionally, for national security, the Courts have allowed weaker Fourth Amendment standards for search and seizure than those that mark criminal law. Information that is being collected for foreign intelligence purposes, though, is now being used for criminal prosecution. The expansion in the government's acquisition of private information, and the convergence between national security and criminal law threaten individual liberty. Donohue traces the evolution of U.S. foreign intelligence law and pairs it with the progress of Fourth Amendment jurisprudence. She argues that the bulk collection programs instituted by the National Security Agency amount to a general warrant, the prevention of which was the reason the Founders introduced the Fourth Amendment. The expansion of

foreign intelligence surveillance momentum by advances in technology, the Global War on Terror, and the emphasis on securing the homeland now threatens to consume protections essential to privacy, which is a necessary component of a healthy democracy. Donohue offers a road map for reining in the national security state's expansive reach, arguing for a judicial re-evaluation of third party doctrine and statutory reform that will force the executive branch to take privacy seriously, even as Congress provides for the collection of intelligence central to U.S. national security. Alarming and penetrating, this is essential reading for anyone interested in the future of foreign intelligence and privacy in the United States.

Closing the Opportunity Gap

Author's Foreword This book is unfinished. The Filipino people shall finish it for me. I wrote this volume very, very slowly. I could have done with it in three months after my defection from the conjugal dictatorship of Ferdinand and Imelda Marcos on February 20, 1975. Instead, I found myself availing of every excuse to slow it down. A close associate, Marcelino P. Sarmiento, even warned me, "Baka mapanis 'yan." (Your book could become stale.) While I availed of almost any excuse not to finish the manuscript of this volume, I felt the tangible voices of a muted people back home in the Philippines beckoning to me from across the vast Pacific Ocean. In whichever way I turned, I was confronted by the distraught images of the Filipino multitudes crying out to me to finish this work, lest the frailty of human memory -- or any incident a la Nalundasan - consign to oblivion the matters I had in

mind to form the vital parts of this book. It was as if the Filipino multitudes and history itself were surging in an endless wave presenting a compelling demand on me to San Francisco, California perpetuate the personal knowledge I have gained on the infamous machinations of Ferdinand E. Marcos and his overly ambitious wife, Imelda, that led to a day of infamy in my country, that Black Friday on September 22, 1972, when martial law was declared as a means to establish history's first conjugal dictatorship. The sense of urgency in finishing this work was also goaded by the thought that Marcos does not have eternal life and that the Filipino people are of unimaginable forgiving posture. I thought that, if I did not perpetuate this work for posterity, Marcos might unduly benefit from a Laurelian statement that, when a man dies, the virtues of his past are magnified and his faults are reduced to molehills. This is a book for which so much has been offered and done by Marcos and his minions so that it would never see the light of print. Now that it is off the press, I entertain greater fear that so much more will be done to prevent its circulation, not only in the Philippines but also in the United States. But this work now belongs to history. Let it speak for itself in the context of developments within the coming months or years. Although it finds great relevance in the present life of the present life of the Filipinos and of Americans interested in the study of subversion of democratic governments by apparently legal means, this work seeks to find its proper niche in history which must inevitably render its judgment on the seizure of government power from the people by a lame duck Philippine

President. If I had finished this work immediately after my defection from the totalitarian regime of Ferdinand and Imelda, or after the vicious campaign of the dictatorship to vilify me in July-August, 1975, then I could have done so only in anger. Anger did influence my production of certain portions of the manuscript. However, as I put the finishing touches to my work, I found myself expurgating it of the personal venom, the virulence and intemperate language of my original draft. Some of the materials that went into this work had been of public knowledge in the Philippines. If I had used them, it was with the intention of utilizing them as links to heretofore unrevealed facets of the various ruses that Marcos employed to establish his dictatorship. Now, I have kept faith with the Filipino people. I have kept my rendezvous with history. I have, with this work, discharged my obligation to myself, my profession of journalism, my family and my country. I had one other compelling reason for coming out with this work at the great risks of being uprooted from my beloved country, of forced separation from my wife and children and losing their affection, and of losing everything I have in my name in the Philippines - or losing life itself. It is that I wanted to make a public expiation for the little influence that I had . . . (more inside)
