MATLAB is a high-level language and environment for numerical computation, visualization, and programming. Using MATLAB, you can analyze data, develop algorithms, and create models and

applications. The

language, tools, and built-in math functions enable you to explore multiple approaches and reach a solution faster than with spreadsheets or traditional programming

languages, such as C/C++ or Java. MATLAB Matrix Algebra introduces you to the MATLAB language with practical hands-on instructions and results, allowing you to quickly achieve your goals.

Starting with a look at symbolic and numeric variables, with an emphasis on vector and matrix variables, you will go on to examine

functions and operations that support vectors and matrices as arguments, including those based on analytic parent functions. Computational methods for finding eigenvalues and eigenvectors of matrices are detailed, leading to various matrix decompositions.

Applications such as change of bases, the classification of quadratic forms and how to solve systems of linear equations are described, with numerous examples. A section is dedicated to sparse matrices and other types of special matrices.

In addition to its treatment of matrices, you will also learn how MATLAB can be used to work with arrays, lists, tables, sequences and sets.

Maple is in fifth grade—again. Now everyone will find out she struggles with reading—or will they? An engaging read for anyone who has ever felt different. Maple Mehta-Cohen has been keeping a secret: she can't read all that well. She has an impressive vocabulary and loves dictating stories into her recorder—especially the adventures of a daring sleuth who's half Indian and half Jewish like Maple herself—but words on the page just don't seem to make sense to her.

Despite all Maple's clever tricks to hide her troubles with reading, her teacher is on to her, and now Maple has to repeat fifth grade. Maple is devastated—what will her friends think? Will they forget about her? She uses her storytelling skills to convince her classmates that she's staying back as a special teacher's assistant (because of budget cuts, you know). But as Maple

navigates the loss of old friendships, the possibility of new ones, and facing her reading challenges head-on, her deception becomes harder to keep up. Can Maple begin to recognize her own strengths, and to love herself—and her brain—just the way she is? Readers who have faced their own trials with school and friendships will enjoy this heartwarming story and its bright, creative heroine.

Lori Nichols' enchanting debut features an irresistible, free-spirited, nature-loving little girl who greets the changing seasons and a new sibling with arms wide open. When Maple is tiny, her parents plant a maple tree in her honor. She and her tree grow up together, and even though a tree doesn't always make an ideal playmate, it doesn't mind when Maple is in the mood to be loud—which is often. Then Maple becomes a big sister, and finds that babies have their loud days, too. Fortunately, Maple and

A UFC champion and a boy with leukemia, in the fight of their lives. Cody Garbrandt dreamed of being a UFC champion. In his darkest moments, when those dreams were dashed, he dug deep with the help of an unlikely friend—five-year-old Maddux Maple, a local hometown fan with leukemia. They made a

pact: Cody would be in the UFC and win the championship, and Maddux would beat cancer. Read their moving story in Cody's new book, *The Pact*, and go behind the scenes into Cody's training and how he made his dreams come true. Cody Garbrandt grew up in a rough town in the Central Appalachian region of Ohio, surrounded by a longstanding culture of fighting—and drugs. Raised in this environment by a single mom (his dad left him at the young age of three to reside in the Ohio State Penitentiary), Cody grew up fighting, and he grew up wild. His future seemed predestined to end in the coal mines, or in prison. Thankfully, Cody had visions of something more. His American Dream? Mixed Martial Arts. But a path to success wasn't clear. He spent as much time fighting in the streets as he did in the gym—one bad decision away from losing everything. Then, at age 20, Cody's brother introduced him to five-year old Maddux Maple. Maddux was deathly ill with leukemia, his survival by no means assured. A unique friendship developed as they made a

promise to each other: Maddux would beat cancer, and Cody would make it to the UFC and become world champion. Through five long years of pain and hardship, they both persevered; Cody, through the agony and sacrifices of fighting his way to the top, and Maddux through the horrors of chemotherapy. They loved and supported each other. They served as each other's inspiration. And in December 2016, they made good on their pact: Cody won his UFC Championship belt, which he promptly presented to Maddux—the boy who had beaten cancer into remission.
