This is the first large scale study on the link between the concepts of intellect and grace in the writings of St. Augustine of Hippo. Its five chapters deal with Augustine's writings on grace as they focus on questions concerning epistemology and hermeneutics. Already non-Christian ancient philosophers identified intellectual perfection with salvation as caused by divine grace. Under their influence (I) Augustine developed also his biblical thought (II). The culmination of his concept of intellectus gratiae, however, came in the later works

on sacraments (III), hermeneutics (IV) and against Pelagius and Julian of Eclanum (V). This study highlights that development and recommends the concept of intellectus gratiae as a possible key to Augustine's theological thought as a whole.

Monatsschrift Für Das Deutsche Geistesleben Springer Science & Business Media

The 1.5th of June, 1.966 marked the 25th anniversary of the death of OTFRID FOERSTER, one of those scientists who achieve international recognition in their younger years. He ranks among the greatest of the German neurologists and he stands as a peer among the great names of the world responsible for the shaping of the image of Neurology: HUGHLINGS JACKSON, CHARCOT, DUCHENNE DE BOULOGNE, DEJERINE,

ERB, Sir HENRY HEAD, MONAKow, and SHERRINGTON. As if possessed by ademon FOERSTER spent himself indefatigably to achieve his almost superhuman task during his lifetime. His work will remain a deterrinant for Neurology for a long time to come. Let his own publications speak for him. The epilogues, written shortly after his death, picture him more vividly than can be done today. A short biography and a number of memoirs introduce excerpts from his scientific presentations, many of which are introduced by a brief prefatory note regarding the circumstances of the specific project. Our gratitude is extended to the Springer Publishing House for facilitating an English translation of the original German edition prepared for the Joint Annual Meeting of the "German Society for Neurology" and the "German Society for Internal Medicine", 1.966. And I should also like to express my gratitude to Dr. ADOLF ROSENAUER and Dr. JOSEPH EVANS for their translations.

Theological Writings / Theologische Schriften Routledge

New Directions in Biblical Theology contains the papers of an international conference on Biblical Theology which was organized by the Faculty of Theology of Aarhus University on the occasion of its 50th anniversary. The papers delivered at the conference address a number of fundamental issues evolving from the recently revived debate on Biblical Theology. The first group of contributions deals with essential topics such as the biblical concept of revelation, and the interpretation of the Old Testament as presented by the apostle Paul, by the evangelists Matthew, Mark and John, and

by the Letter to the Hebrews. Further contributions treat themes such as the 're-use' of a given biblical tradition, theology of creation, apocalyptic, the concept of mercy, the community's role in transmission and interpretation, and the primary aspects of the concept of God.

Coming of Age in Byzantium BRILL

The various phases of life and their manifestations in theory and social reality constitute a well-established area of research in the fields of western medieval studies and ancient history. In this respect the Byzantine East has been widely neglected. This volume will focus on the Byzantine experience of adolescence, which may be defined as the biological transition from childhood to adulthood as well as the social and psychological experience of leaving the care of parents, guardians and family groups and the gradual integration into adult society. The contributions gathered therein treat seven subtopics that correspond to crucial questions in the current research on adolescence: the legal status of adolescents; the mechanisms of transition from childhood to adolescence; the socialisation and gradual integration into adult society; adolescents in Byzantine art; psychological aspects of adolescence from medieval to modern times; illnesses of adolescents; adolescents in the western medieval world. The focus is on the Middle and Late Byzantine Period, where historical, hagiographical, legal and medical sources offer rich material for an investigation of these aspects. The book contributes to a better understanding of all these questions and to show future trajectories for research.
