**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

*See back panel for additional precautionary statements*

**DUAL LURE** containing a food-floral attractant and a sex lure attractant in a sealed tray with removable top

**IT LASTS ALL SEASON**

**JAPANESE BEETLE TRAP**

**THIS PACKAGE CONTAINS:**

- 1 Dual release floral & pheromone lure
- 1 Lure holder
- 2 Disposable collection bags

**TRAP RATE:**

When using lure(s) on land, away from water.

**FOLIAGE LURE**

*Active Ingredients:
- Coccinellidae (mating pheromone)
- Euphorbia cladophylla (floral lure)

**REPLACEMENT LURE**

*Active Ingredients:
- Coccinellidae (mating pheromone)
- Euphorbia cladophylla (floral lure)

**DIRECTIONS FOR USE**

**It is a violation of Federal law to use this product in a manner inconsistent with its labeling.**

**For outdoor residential use.**

**TRAP ASSEMBLY:**

1) Remove vanes, bag and lure from box
2) Slide vanes together at open slots (to form an "X"). Make sure the ends slide into the channels of the vanes.
3) Attach the bag to the hooks on the vanes.
4) Peel foil covering off of the dual lure package, as marked on the package. Do not remove contents (lures). Position the dual lure plastic package so that the open (exposed) side faces inward toward the trap. Insert one edge of the lure package into one vane slot, then tip upward to insert into the opposite vane slot.
5) Your trap is now ready to hang and use.

**PLACEMENT:**

The hanger loop on the top of the vane is used to suspend the trap. Using a twist-tie, string or wire, hang the trap from a tree, or a metal or wooden stake, about 3 to 5 feet above the ground. To be most effective, the trap should be located about 10 feet downwind of the foliage to intercept beetles heading toward it. Do not place the trap near or in the foliage as it will attract more beetles into the foliage.

**SUGGESTED TRAP MAINTENANCE:**

- To replace bag, grasp the neck of the bag firmly in one hand and detach at each vane hook with the other hand.
- Twist neck of bag and secure with a 6" twist tie.
- Place bag in securely covered garbage container.
- Replace bags when full or when they begin to emit an offensive odor, which can repel Japanese beetles.
- To reduce build up of odors or when holes become blocked during wet conditions, use a toothpick to unplug holes in bag to allow for drainage.
- Replace DUAL-LURE at end of infestation period; it lasts all season.

**STORAGE AND DISPOSAL**

**STORAGE:**

Do not contaminate water, food, or feed by storage or disposal. Store in a cool, dry place. Do not open until ready to use.

**DISPOSAL:**

At end of infestation season (or 3 months, whichever comes first), place in trash or offer for recycling. Do not reuse lure container.

**Notice:** Buyer assumes all risk of use, storage or handling of this product not in strict accordance with directions.

**Guarantee**

If for any reason you are not satisfied with this product, mail us proof of purchase to obtain a full refund of your purchase price.
