**DIRECTIONS FOR USE**

1. Pull off the label.
2. Hang the roll near windows or where flies are most bothersome.
3. Pull straight down with the glue surfacing facing into the room.
4. Pull out the length that is needed. Tack bottom edge if needed.
5. When exposed catcher is full of flies, tear off and pull down a fresh length.
6. Keep away from pets and livestock so they don’t pull the catcher down.

*Note: If glue gets on your hands, remove easily with vegetable oil.*
